

Climate Change Strategy for New Zealand

Adaptation

National climate change risk assessment (first) No later than 6 years after the last assessment was made publicly available
National climate change risk assessments (second and ongoing)
National adaptation plans For each risk assessment No later than 2 years after the most recent risk assessment was made publicly available
Progress reports 2, 4 and 6 years after the adaptation plan is made publicly available

Mitigation

Emissions budgets Prepared for each budget period (of three years) Must always be three emissions budgets prepared (one current and two prospective)
Emissions reduction plans Prepared and published after each emissions budget but before the start of the relevant budget period
Progress reports Annual report on results of emissions monitoring and progress of emissions reduction plan Progress reports within 2 years of the end of a budget period

 Minister's Role

 Climate Change Commission's Role
