

We want to see a thriving economy that works for people and planet in the long term. To do this we focus investors, companies and cities on taking urgent action to build a truly sustainable economy by measuring and understanding their environmental impact.

*The time is past when humankind thought it could selfishly draw on exhaustible resources. We know now the world is not a commodity.*

François Hollande, Former President of the French Republic

To achieve this, CDP, formerly the Carbon Disclosure Project, runs the global disclosure system that enables companies, cities, states and regions to measure and manage their environmental impacts. We have built the most comprehensive collection of self-reported environmental data in the world.

Our network of investors and purchasers, representing over \$100 trillion, along with policy makers around the globe, use our data and insights to make better-informed decisions. Through our offices and partners in 50 countries we have driven unprecedented levels of environmental disclosure.

## How We Work

### Disclosers

We ask companies, cities, states and regions for data on their environmental performance.

Cities Companies

### CDP

We transform that data into detailed analysis on critical environmental risks, opportunities and impacts.

Research Open data portal

### Decision-makers

Investors, businesses and policy makers use our data and insights to make better decisions, manage risk and capitalize on opportunities.

Investors Supply chain

Over the past 15 years CDP has created a system that has resulted in unparalleled engagement on environmental issues between investors, companies, cities, states and regions worldwide. CDP's data enables our network to link environmental integrity, fiduciary duty and public interest to make better-informed decisions on climate action.

# 6,300+

## **companies**

Over 6,300+ companies responded to our climate change, water, forests and supply chain questionnaire this year.

# 500+

## **cities**

disclosed environmental information through CDP this year.

# \$3tn+

## **purchasing power**

CDP's 99 supply chain members represent a combined purchasing power of over \$3 trillion.

# \$87tn

## **investor assets**

Over 650 investors with US\$87 trillion in assets request information on climate change, water or forests.

# 100+

## **states and regions**

Over 100 of the world's states and regions now measure their environmental impacts through CDP.
