## Definitions

## Note 1

"e;Today"e;

All organisations that are currently registered - using the latest available annual return for each of these registered charities.

## Charities Count

Number of charities for selected financial year and region selected.

## Registered

All charities that were registered for at least one day of the financial year reported on.

## De-registered

Any charity that, within the span of the selected financial year, was deregistered.

## Regions

Each charity can be active in one or more regions. These regions comprise the New Zealand provinces as well as overseas areas (e.g. Asia). Because a charity can be listed in more than one region, the sum of total charities for each region will be higher than the simple charity count.

*Sector Section Filter*

Sector data is filtered by financial year, charity registration status, and region (if any) selected.

*Sector*

Each charity is assigned to one primary sector - the area in which they operate. These sectors are summarised into around twenty main ones, but the actual list comprises around 3000 sectors.
