

## COVID-19: Contact tracing locations of interest

Locations of interest for people who may be 'Casual Plus Contacts' or 'Casual Contacts' of COVID-19 cases in the community. While risk from these locations is most often low, contacts who attended one of the locations during the relevant timeframes are asked to follow the directions of health officials.

*Last updated: 29 January 2021*

See also: [Contact tracing for COVID-19 \(our-work/diseases-and-conditions/covid-19-novel-coronavirus/covid-19-health-advice-public/contact-tracing-covid-19\)](#).

### What you need to do

For contact tracing purposes, anyone who attended one of the locations listed here during the relevant timeframes is considered to be either a 'Casual Plus Contact' or a 'Casual Contact'.

Our current advice is that although there is a low risk of exposure, out of an abundance of caution, we are asking individuals to follow the instructions in the table below if they visited these locations during the relevant times.

#### Casual Contacts

If you were at a location categorised as 'Casual Contact' during the relevant timeframe, please take the following steps:

- Monitor your health for the next 14 days.
- If you begin to feel unwell or develop any COVID-19 symptoms, contact Healthline on 0800 358 5453 to understand if and when you need to get tested.
- Practice good hygiene and use the [NZ COVID Tracer App \(our-work/diseases-and-conditions/covid-19-novel-coronavirus/covid-19-resources-and-tools/nz-covid-tracer-app/contact-nz-covid-tracer\)](#).

#### Casual Plus Contacts

If you were at a location categorised as 'Casual Plus Contact' during the relevant timeframe, please take the following steps:

- Stay at home.
- Contact Healthline on [0800 358 5453 \(tel:0800 358 5453\)](#) to understand when you need to get tested.
- You will need to continue to stay at home until you receive a negative test result back.
- If you begin to feel unwell or start to develop [COVID-19 symptoms \(our-work/diseases-and-conditions/covid-19-novel-coronavirus/covid-19-health-advice-public/about-covid-19#symptoms\)](#) get a test immediately.
- If you receive a negative test, you need to continue monitoring your symptoms for the next 14 days. If you develop any COVID-19 symptoms you will need to organise another test.
- Ensure you wash your hands regularly with soap and water, or with hand sanitiser.
- Practice good hygiene and use the [NZ COVID Tracer App \(our-work/diseases-and-conditions/covid-19-novel-coronavirus/covid-19-resources-and-tools/nz-covid-tracer-app/contact-nz-covid-tracer\)](#).

### Current locations of interest

We'll be updating this table as new information is available.

**Note:** Extra time has been added on either side of each visit to ensure we reach all potential contacts. As a result of this, you will notice that some times may overlap.

### Locations of interest for Auckland border-related cases

## Information for businesses

More information for Northland businesses who had a confirmed case of COVID-19 visit their premise is available on the Northland District Health Board website.

[COVID-19 Northland Hub \(https://www.northlanddhb.org.nz/home/covid-19/covid-19-northland-hub/\)](https://www.northlanddhb.org.nz/home/covid-19/covid-19-northland-hub/)

## NZ COVID Tracer contact alerts

Receiving a yellow notification as a result of scanning a QR code through the NZ COVID Tracer app means you may have been exposed to COVID-19. A yellow contact alert will tell you if you are a Casual Contact or a Casual Plus Contact and what to do. If there is a "Send my details" button, this enables you to send your contact details directly to Healthline, who will then call you back with advice about what to do.

If you receive a yellow QR notification via the app, it means you have used the app to scan into a location at around the same time as a confirmed or probable case of COVID-19, and that contact tracers consider there may have been a risk of exposure.

A contact alert is a simple way of making you aware of this risk. However, you might not have come near the person, and if you did, it might not have been for long enough to present a significant risk of exposure.

Contact tracers will get in touch with you directly if you are identified through the contact tracing process as having a higher risk of exposure to COVID-19, for example if you were seated in close proximity to the confirmed case (or are considered a Close Contact).
