The New Zealand Upgrade Programme

29 JANUARY 2020

Rail, roads, schools and hospitals will be built and upgraded across the country under the new \$12 billion New Zealand Upgrade Programme announced by Prime Minister Jacinda Ardern.

The programme:

- Includes investments in roads, rail, hospitals and schools and our regions to future-proof the economy
- Will give a \$10 billion boost to New Zealand's economy over the first five years
- Includes transport projects to boost productivity and long-term growth
- Will upgrade and modernise land, air and sea assets throughout regional New Zealand

This is a once-in-a-lifetime opportunity to invest in New Zealand – modernising our infrastructure, preparing for climate change and helping grow the economy.
