1.0 Introduction

1.1 Purpose

The purpose of this paper is to catalogue all government department strategy (GDS) documents that make up the 2021 *GDS Index*. The Institute hopes that, through collating all GDSs, this paper provides the basis against which future progress can be benchmarked.

1.2 Background

The 2021 *GDS Index* aims to illustrate how Aotearoa New Zealand might strengthen GDSs to be more effective, responsive, measurable, comparable and durable through public consultation, engagement and ownership. If government departments make the content of GDSs more useful, the users of these strategies will be better able to assess their quality and, where appropriate, to work with government to deliver better outcomes more cost-effectively.

This working paper is part of a series of working papers as part of the McGuinness Institute's 2021 *GDS Index*. The other documents in this series are as follows:
