

Marine Farm Lighting and Marking Plan – U040412 and MFL239 (Site no.8110)

I, Alexander van Wijngaarden, Harbourmaster of Marlborough District Council, hereby approve, under Maritime Delegation from the Director of Maritime New Zealand pursuant to Sections 200, 444(2) and 444(4) of the Maritime Transport Act 1994, the lighting and marking associated with coastal permit U040412 and MFL239 (Site no.8110), located in Forsyth Bay, Outer Pelorus as follows:

1. That each end of each longline display an orange buoy, as shall the middle of each of the seawardmost and landwardmost longlines.
2. That a yellow light, radar reflector and a band of reflective tape 50 millimetres in width be displayed in the positions marked 'A' on the attached structures plan. The lights shall be solar powered and shall have the following characteristics: F1 (5) Y (20 secs) 1m 1M.

3. That radar reflectors and a band of reflective tape be displayed in the positions marked 'B' on the attached structures plan.
4. That a band of reflective tape 50 millimetres in width be displayed in the positions marked 'C' on the attached structures plan.

Interpretation:

Light - a yellow light, group flash 5 every 20 seconds (minimum flash length not less than 0.5 seconds), height of light not less than 1 metre above the water, range at least 1 nautical mile.

Radar reflector – to be set at not less than 1 metre above the waterline with a band of reflective tape set above this. The radar reflector should be visible on radar at a range of at least 500 metres.

Reflective tape – should be at least 50 millimetres in width and placed around the circumference of the support tube; the tape should be visible by torchlight at a range of at least 50 metres. Alternative reflectors may be substituted for reflective tape, provided that they are mounted where they are visible by torchlight from at least 50 metres all round.

5. Each end of the most landward and most seaward longlines shall carry the name of the consent holder, and the site number issued by Marlborough District Council (e.g. #8405), displayed in bold clear letters in such a manner that they can be clearly read from a distance of 10 metres.

Given under my hand this 16th day of October 2014

**Deemed Coastal Permit - Review of Conditions
under Sections 20(3) or 21(3) of the Aquaculture Reform
(Repeals and Transitional Provisions) Act 2004**

In the Matter of an Application to Vary, Add or Delete Conditions of Coastal Permit

File Reference:	MFL239
Consent Holder:	The New Zealand King Salmon Company Limited
MFL 239 is a Deemed Coastal Permit to:	Occupy space in the coastal marine area
Location:	Forsyth Bay, Outer Pelorus
Site No:	8110
Proposal:	To vary, add or delete conditions of deemed Coastal Permit No 239 for the purpose of farming green mussels (<i>Perna canaliculus</i>), paua (<i>Haliotis iris</i> , <i>Haliotis australis</i> , <i>Haliotis virginea</i>) and salmon (<i>Oncorhynchus tshawytscha</i>) in accordance with the provisions of the Act.

Decision on Application to Vary, Add or Delete Conditions of Coastal Permit

Pursuant to Sections 20(3) or 21(3) of the Aquaculture Reform (Repeals and Transitional Provisions) Act 2004 the following decision has been made by the Marlborough District Council:

Conditions now state:

Coastal Permit - Occupancy and Activity

1. That this permit shall expire on 31 December 2024.
2. That without restricting the consent holder from reasonably undertaking the activities authorised by this resource consent, the consent holder shall not undertake the activities in such a way that would effectively exclude the public from the permit area.
3. That any feed artificially introduced into the marine farm shall comply with the terms of discharge consent U040412 and any subsequent approval thereafter.
4. That the occupancy be limited to the area illustrated on the plan attached to this consent, and confined to the area specified within the grid co-ordinates (Marlborough circuit).

Coastal Permit - Structures

5. That the structures be limited to anchors, ropes, droppers, floats, cages, racks, lights and other necessary navigational aids associated with the marine farming of the approved species. All structures shall be situated and secured so as to remain within the boundaries of the consent area at all times. The number of lines shall be at the discretion of the consent holder, but shall not exceed the total allowed, the separation distances between lines shall be no less than allowed, and lines shall be oriented as shown on the attached plan.
6. Where there are more than two blocks of longlines an accessway of no less than 50 metres in width, free of surface structures, be provided between blocks.
7. That the placement of marine farm lighting and marking shall be approved by the Harbourmaster under his Maritime Delegation from the Director of Maritime Safety pursuant to Sections 200, 444(2) and 444(4) of the Maritime Transport Act 1994. An approved lighting plan is required prior to structures being established on the site.
8. That each end of each of the landwardmost and seawardmost longlines carry the name of the consent holder, and the site number issued by Marlborough District Council (#8110), displayed in bold clear letters in such a manner that they can be clearly read from a distance of 10 metres.
9. That the consent holder maintain all structures to ensure that they are restrained, secure and in working order at all times so as to not create a navigational hazard and take whatever steps are reasonably necessary to retrieve any non-biodegradable debris lost in or from the permit area.
10. That each buoy within the approved area be permanently branded so as to clearly identify its ownership.
11. That upon the expiration, determination, forfeiture or surrender of the coastal permit the consent holder shall remove all structures, rafts, buoys, longlines, blocks, and all associated equipment from the site, and restore the area as far as is practicable to its original condition, and to the reasonable satisfaction of Council. If the consent holder fails to comply with this clause Council may arrange compliance on their behalf and at the consent holder's expense.
12. That in accordance with section 128 of the Resource Management Act 1991, the Marlborough District Council may review the conditions of this consent for the purpose of ensuring that any actual or potential effects on the environment arising from the exercise of this consent are avoided, remedied or mitigated.

Reasons for Decision

The grounds for approving these changes are that the majority of the existing conditions in the original licence are already provided for by the RMA (e.g. access), by the changes to Fisheries regulations (i.e. registration), or are no longer required (e.g. general provisions). The new conditions are consistent with the RMA and with those in current use.

As the review of conditions relates to existing structures and operations it will not adversely affect other users or values of the area, and will align all marine farms to consistent conditions and processes.

The proposal will not have any adverse effect on the environment.

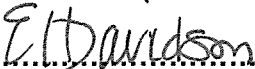

Other Matters

1. Unless otherwise specified, this is the full text of the decision.

Appeal Information

2. If intending to object to this decision, the objection must be lodged with the Marlborough District Council within 15 working days of the receipt of this decision.

Council's Instrument of Delegation by:

LICENCE UNDER THE MARINE FARMING ACT 1971

Licensor

The Minister of Agriculture and Fisheries (hereinafter referred to as "the Licensor") is the controlling authority under the Marine Farming Act 1971 (hereinafter referred to as "the Act") of the area described in the schedule hereto (hereinafter referred to as "the area").

Licensee

SUZETTE FISHER (together with executors, administrators, successors and permitted assigns hereinafter called "the Licensee").

Licence

The Licensor upon the execution of this instrument subject to the terms and conditions set out below has agreed to grant to the Licensee a Licence of the area for a term of fourteen years beginning on the FIRST day of *October* 1982 at an annual licence fee of SIXTY dollars (\$60.00) payable in advance on the FIRST day of *October* each calendar year, for the use of the area as a marine farm pursuant to the provisions of the Marine Farming Act 1971.

Conditions

1. THE LICENSEE HEREBY COVENANTS with the Licensor as follows:

- (a) The Licensee will at all times comply with the provisions of the Act and Regulations thereunder.
- (b) The Licensee shall pay the annual licence fee as and when described above to the Director-General of Agriculture

D.F.

and Fisheries (in this instrument called the "Director-General") at the Head Office of the Ministry of Agriculture and Fisheries in Wellington.

(c) If the Licensee is at any time in arrears with payment of the annual licence fee he shall not remove from the area any fish, shellfish or marine vegetation farmed in that area except with the written consent of the Director-General.

(d) The licensee shall utilize and cultivate in a proper manner the area for the purpose of farming MUSSELS and shall comply at all times with the Act and any regulations, notices and requirements made or issued pursuant to the Act.

(e) The Licensee shall not erect, place, moor or keep in the area any structure, raft, buoy or buoyed longline which is not first approved by the Ministry of Transport at Wellington and provided with such functioning beacons, lights, buoys, fog signals and other equipment as the Ministry of Transport may lawfully require.

(f) The Licensee shall on the expiration, determination, forfeiture or surrender of the licence, remove all structures, rafts, buoys, buoyed longlines and other plant from the area, and restore the area as far as is practicable to its original condition to the reasonable satisfaction of the Licensor.

(g) If the Licensee fails to comply with clause (f) of this licence the Licensor may at the expense of the Licensee, take such steps as are necessary to fulfil the Licensee's obligations under that clause.

(h) The Licensee shall take steps to ensure that the fish, shellfish or marine vegetation farmed in the area are not

O.F.

rendered unfit for human consumption by disease, infection by marine pests, or contamination by sewage.

(i) The Licensee will maintain in good order and repair all structures, rafts, buoys, buoyed longlines, beacons, noticeboards and other plant in the area and will not permit such to deteriorate through want of repair so as to be, become, or cause, in the opinion of the Licensor a hazard or potential hazard to navigation.

(j) The Licensee will permit and facilitate free access to, over and from any raft, structure, buoy or buoyed longline to any fisheries officer or any officer in the employment of the Crown authorised by the Director-General who may from time to time wish to enter and inspect the area to ensure that the provisions of the Act or of this licence are being complied with or not contravened.

(k) The Licensee shall not assign, sublet or part with the possession of the whole or any part of the area without the prior consent in writing of the Licensor.

2. THE LICENSOR HEREBY COVENANTS WITH the Licensee as follows:

The Licensor or any fisheries officer or officer of the Crown who under the terms of this licence or the Act enters and inspects the area shall cause little interference as is reasonably possible with the use of the area or with any raft, structure, buoy, buoyed longline, mooring arrangements, mooring or navigational marks, or fish or marine vegetation of the species authorised to be farmed in terms of this licence.

Provisos

3. PROVIDED ALWAYS and it is hereby agreed and declared by and between the Licensor and Licensee that:

D.F.

(a) The licence shall be liable to forfeiture without payment of compensation if the Licensee:

- (i) Cannot be found, or has abandoned the area, or has died and no personal representative has claimed the area within 12 months after his death; or
- (ii) Has not within a period of two years from the commencement of the licence, or within such further period as the Licensor may specify by notice in writing to the Licensee, begun to develop to the satisfaction of the licensor the area as a marine farm for the farming of the species specified in this licence; or
- (iii) Defaults in or is in breach of any term or condition of this licence;

(b) If after a period of seven years from the commencement of this licence the Licensee has not developed the whole of the area as a marine farm, such part of the area as shall then remain undeveloped shall be liable to forfeiture.

(c) If the licence, or part of the area, is liable to forfeiture and the Licensee has failed after notice has been given to him to remedy the default or breach, the Licensor may forfeit the licence without action and may thereupon re-enter and recover possession.

SCHEDULE

All that area containing 6.0000 hectares, more or less, in front of Sounds Foreshore Reserve and Section 3, Block XVI, Orieri Survey District, bounded by a line commencing at a point in Forsyth Bay being 53.86 metres distant along a bearing of

D.F.

102°57'30" from peg XIX on S.O. Plan 241 in Block XVI, Orieri Survey District; thence along a bearing of 95°00' for a distance of 150 metres to the northeastern corner; thence along a bearing of 185°00' for a distance of 400 metres to the south eastern corner; thence along a bearing of 275°00' for a distance of 150 metres to the south western corner; thence along a bearing of 5°00' for a distance of 400 metres to the north western corner, the point of commencement.

The above area is more particularly shown on S.O. Plan 6001.

MEMORANDUM OF VARIATION OF LICENCE

Issued under the Marine Farming Act 1971

An Agreement made this

day of

19

PARTIES to this Agreement

1. The Minister of Fisheries (hereinafter referred to as "the Licensor").
2. SOUTHERN OCEAN SEAFOODS LIMITED (together with executors, administrators, successors and permitted assigns, hereinafter referred to as "the Licensee").

WHEREAS

3. The Licensor, as the controlling authority under the Marine Farming Act 1971 (hereinafter referred to as "the Act"), has issued Marine Farming Licence Number 239 to which this Memorandum of Variation is attached.
4. The Licensor and the Licensee have, pursuant to Section 13 of the Act, agreed to vary the conditions, covenants and agreements in the said licence in the following manner:
 - A. The addition of PAUA (*Haliotis iris*, *Haliotis australis*, *Haliotis virginea*) as a species permitted to be farmed under the licence.
 - B. The licence is now permitted to farm only MUSSEL (*Perna canaliculus*) and PAUA (*Haliotis iris*, *Haliotis australis*, *Haliotis virginea*).
 - C. In accordance with Section 49 of the Marine Farming Act 1971 the licensee may take spat and juveniles of a species specified in this licence which are caught within the bounds of the licensed area.

- D. All stock and crop not obtained in accordance with Condition 4C and which is to be held on the farm must come from a source authorised under the Fisheries Act 1983 or from other marine farms licensed to take stock under the Marine Farming Act 1971 provided it is in accordance with the Ministry's policies on transfer of stock between farms.
- E. The Licensee shall not transfer any live farm stock or crop from the area to any other waters (not being a marine farm) without prior approval in writing of the Regional Manager, MAF Fisheries Central, Private Bag 14, Nelson.
- F. The Licensee shall not transfer any diseased farm stock or crop to another farm or release into any waters any diseased farm stock or crop kept at any licensed area.
- G. Any authorised officer may from time to time, by notice in writing to the Licensee:
- (i) require the Licensee to carry out such action for the prevention of disease among the stock or crop on the farm as is specified in the notice;
 - (ii) where the officer believes on reasonable grounds that any farmed stock or crop on the marine farm is diseased, require the Licensee to carry out such action for the treatment of the disease and the decontamination of any nets, buoys or other structures as is required in the notice.
- H. No compensation shall be payable in respect of any stock or crop required to be destroyed by an authorised officer pursuant to Condition 4(G) of this licence.

I. Recordkeeping requirements -

- (i) For the farming of MUSSEL (*Perna canaliculus*) the Licensee shall comply with the conditions contained in Schedule A.
- (ii) For the farming of PAUA (*Haliotis iris*, *Haliotis australis*, *Haliotis virginea*) the Licensee shall comply with the conditions contained in Schedule B.

THEREFORE, from the date of this agreement, the Marine Farm Licence Number 239 shall be varied to the extent outlined in Clauses 4(A) to 4(I) above and apart from the agreed variation, the present conditions, covenants and agreements shall continue to apply.

SCHEDULE A

MARINE FARMING LICENCE - RECORDKEEPING REQUIREMENTS

1. Manner and form in which records kept :
 - (a) Be kept in such manner and format that they can be readily retrieved and made available for examination
 - (b) Be held at either
 - (i) The place of business of the licensee, or
 - (ii) Any other premises that are appropriate having regard to where the records are initially prepared
 - (c) Be retained for a period of not less than 7 years after completion of the transactions or period to which they relate.

2. Retention of Records:

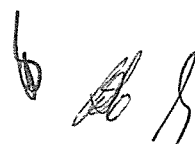

All records produced and/or available to the licensee that contribute to the audit trail of species farmed shall be retained.

3. Failure to keep Records:

Where the Director General considers that the licensee is or has not been completing or retaining the records in an appropriate manner -

- (a) The Director General may, by notice in writing, direct the licensee as to the manner in which the records are to be completed or retained; and
- (b) The licensee shall thereafter ensure that records completed or retained comply with that direction.

Failure to comply with such direction may be treated as a wilful breach of conditions of the licence.

4. Inspection of Records

Any person who is required to keep or who has control of any records required to be kept shall, on request at any reasonable time by the Director-General, forthwith (and without charge) produce the records requested and make them available for inspection.

5. Additional Requirements

Where the Director-General considers it necessary, and after consultation with the licensee, the Director-General may require the licensee to keep such additional records as are appropriate.

SCHEDULE B

MARINE FARMING LICENCE - RECORDKEEPING and REPORTING REQUIREMENTS

1. Manner and form in which records kept :

- (a) All transactions which involve a third party a minimum of two documents (ie in duplicate) shall be generated, and each party to the transaction shall obtain and keep one copy.
- (b) Be kept in such manner and format that they can be readily retrieved and made available for examination
- (c) Be held at either
 - (i) The place of business of the licensee, or
 - (ii) Any other premises that are appropriate having regard to where the records are initially prepared
- (d) Be retained for a period of not less than 7 years after completion of the transactions or period to which they relate.

2. Inter-related farming activities

In those instances where the licensee operates several inter-related activities, ie hatchery, nursery, farming (to economic sale size) an adequate audit trail relating to each of the operations should be maintained.

3. Acquisition, disposal and transfer of stock

A record by way of source documentation shall be kept of all stock acquired, disposed of or transferred to another premise not part of the licensee's current farming operation (whether for consideration or otherwise), which shall include the following information:

- (i) MAF client number (of both purchaser and seller where applicable)
- (ii) Date acquired, disposed of (or transferred)
- (iii) Name and address of both purchaser and seller
- (iv) Quantity (by specific unit)

- (iv) Description of stock
 - Scientific name and common name
 - Age/growth class
 - Any other details relevant to identifying the stock
- (v) \$price (if applicable)

4. Losses

A record of all losses (eg mortality, unexplained loss, destruction, etc), which record shall be in sufficient detail to allow the time period and circumstances of loss to be identified.

5. Retention of Records

All records produced and/or available to the licensee (whether specifically identified or not) that contribute to the audit trail of species farmed shall be retained.

6. Failure to keep Records

Where the Director General considers that the licensee is or has not been completing or keeping the records in an appropriate manner -

- (a) The Director General may, by notice in writing, direct the licensee as to the manner in which the records are to be completed or kept; and
- (b) The licensee shall thereafter ensure that records completed or kept comply with that direction

Failure to comply with such direction may be treated as a wilful breach of conditions of licence.

7. Annual Inventory Return to be furnished

- (a) The licensee shall, at least once during each fishing year (being a year commencing on the 1st day of October), furnish to the Director-General an annual inventory return of stock owned and/or held, such annual inventory return to include the following information:
 - (i) Date on which inventory return relates
 - (ii) Species
 - (iii) State and/or age/growth class
 - (iv) Weight and/or number

- (v) Any other details required to adequately identify the type and quantity of stock held
- (b) A nil return shall be furnished in the case of a nil inventory.
- (c) Every annual inventory return shall -
 - (i) Certify that the return does not contain false or misleading information, and is a true representation of all stock owned and/or held by the licensee as at inventory date; and
 - (ii) Be signed by the licensee or by a person authorised to act on behalf of the licensee.

8. Variation from strict requirements in certain cases-

- (1) Where the Director General is satisfied that in respect of any licensee or class of licensee
 - (a) compliance with any recordkeeping requirement would cause undue hardship or would be impracticable; or
 - (b) the purpose behind any recordkeeping requirement could be equally well achieved by any other mode or system of records, -

the Director General may exempt the licensee from the need to comply with that requirement

- (2) Any such exemption, -
 - (a) May be subject to such conditions, or be for such limited period, as the Director General may specify.
 - (b) May be withdrawn by the Director General at any time.

9. Inspection of records

Any person who is required to keep or who has control of any records required to be kept shall, on request at any reasonable time by the Director-General, forthwith (and without charge) produce the records requested and make them available for inspection.

[Handwritten initials]

**MEMORANDUM OF VARIATION OF LICENCE
PURSUANT TO THE MARINE FARMING ACT 1971**

BETWEEN

The Minister of Fisheries (hereinafter referred to as "the Licensor")

AND

SOUTHERN OCEAN SEAFOODS LIMITED (hereinafter referred to as "the Licensee")

WHEREAS

1. The Licensor, as the Controlling Authority under the Marine Farming Act 1971 (hereinafter referred to as "the Act") has issued Marine Farm Licence No. 239.
2. The Licensor and the Licensee agree to vary the said licence to permit the Licensee to farm CHINOOK SALMON (*Oncorhynchus tshawytscha*).
3. **THE PARTIES THEREFORE AGREE** to vary the conditions, covenants and agreements in the said licence, pursuant to Section 13 of the Act, in the following manner:
 - A. All stock which is to be held on the farm must come from a source authorised under the Fisheries Act 1983 or the Marine Farming Act 1971.

- B. The Licensee shall not transfer any live farm stock from the licensed area to any other waters without prior approval in writing of the Licensor, if previously notified of such a requirement.
- C. The Licensee shall not transfer any diseased farm stock to any farm or release into any waters any diseased farm stock kept at the licensed area.
- D. If the Licensee knows or suspects that any fish kept pursuant to this licence is or may be affected by any Category A disease specified as such from time to time by the Director-General by notice published pursuant to the Freshwater Fish Farming Regulations 1983 in the Gazette, or knows or suspects that any fish kept pursuant to this licence is or may be affected by any disease or condition the Licensee cannot identify, the Licensee shall, within 24 hours after the time when the Licensee discovers or first suspects the fish to be diseased, advise the Director-General or veterinarian or fish pathologist at the Ministry of Agriculture and Fisheries, and shall keep the fish diseased or suspected to be diseased from coming in contact with other fish.
- E. If the Licensee knows or suspects that any fish kept pursuant to this licence is or may be affected by any Category B disease specified as such from time to time by the Director-General by notice published pursuant to the Freshwater Fish Farming Regulations 1983 in the Gazette, and the fish do not respond to treatment within 14 days, advise the Director-General or veterinarian or fish bacteriologist at the

Ministry of Agriculture and Fisheries, and shall keep the fish diseased or suspected to be diseased from coming in contact with other fish.

F. Any Licensor may from time to time, by notice in writing to the Licensee:

- (i) require the Licensee to carry out such action for the prevention of disease among the stock on the farm as is specified in the notice;
- (ii) where the Licensor believes on reasonable grounds that any farmed stock on the marine farm is diseased, require the Licensee to carry out such action for the treatment of the disease and the decontamination of any nets, buoys or other structures as is required in the notice.

G. Where the Licensor believes on reasonable grounds that:

- (i) the fish is affected by any disease specified in a Category A notice; or
- (ii) the fish is affected by any disease specified in a Category B notice which cannot be treated effectively on the farm; or

- (iii) the fish is affected by any other disease of such a nature as to require his urgent action -

destroy any fish stocks affected, and may take steps as he considers necessary to decontaminate any nets, buoys, buoyed sea cages or other structures, or may, by notice in writing to the Licensee, require him to destroy those fish stocks and take such steps as are specified in the notice to decontaminate those structures.

- H. No compensation shall be payable in respect of any fish required to be destroyed by the Licensor pursuant to conditions (F) or (G) of this licence or pursuant to a notice given by the Licensor under conditions (F) or (G) of this licence.
- I. The Licensee shall not use any feed other than that occurring naturally in the area without prior approval in writing of the Licensor.
- J. The Licensee shall not use tributyl tin as an antifoulant agent on any equipment used or brought onto the licence site.
- K. Recordkeeping requirements.

For the farming of CHINOOK SALMON (*Oncorhynchus tshawytscha*)
the licensee shall comply with conditions contained in Schedule A.

THEREFORE, from the date of this agreement, the Marine Farm Licence Number 239 shall be varied to the extent outlined in Clauses 3(A) to 3(K) above and apart from the agreed variation, the present conditions, covenants and agreements shall continue to apply.

SCHEDULE A

MARINE FARMING LICENCE - RECORDKEEPING REQUIREMENTS

1. Manner and form in which records kept :

- (a) Be kept in such manner and format that they can be readily retrieved and made available for examination
- (b) Be held at either
 - (i) The place of business of the licensee, or
 - (ii) Any other premises that are appropriate having regard to where the records are initially prepared
- (c) Be retained for a period of not less than 7 years after completion of the transactions or period to which they relate.

2. Retention of Records:

All records produced and/or available to the licensee that contribute to the audit trail of species farmed shall be retained.

3. Failure to keep Records:

Where the Director General considers that the licensee is or has not been completing or retaining the records in an appropriate manner -

- (a) The Director General may, by notice in writing, direct the licensee as to the manner in which the records are to be completed or retained; and
- (b) The licensee shall thereafter ensure that records completed or retained comply with that direction.

Failure to comply with such direction may be treated as a wilful breach of conditions of the licence.

4. Inspection of Records

Any person who is required to keep or who has control of any records required to be kept shall, on request at any reasonable time by the Director-General, forthwith (and without charge) produce the records requested and make them available for inspection.

5. Additional Requirements

Where the Director-General considers it necessary, and after consultation with the licensee, the Director-General may require the licensee to keep such additional records as are appropriate.

Signed by Douglas Lorimer Kidd, ... 
Minister of Fisheries, pursuant to
section 7 of the Constitution Act 1986,
for and on behalf of Her Majesty the Queen,
in the presence of

Witness Erin Wynne

Address Parliament Buildings, Wellington

Occupation Fisheries Private Secretary

DATED this 26th day of July 1994

_____ being the Mortgagee of Marine Farm Licence Number __, by
mortgage registered on _____, hereby consent to the above
variation.

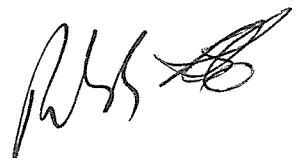

MEMORANDUM OF VARIATION OF LICENCE
(ISSUED UNDER THE MARINE FARMING ACT 1971)

PARTIES to this Agreement

1. HER MAJESTY THE QUEEN in right of the Government of New Zealand acting by and through the Minister of Fisheries (in this instrument called "the Licensor").
2. SOUTHERN OCEAN SEAFOODS LIMITED (in this instrument together with executors, administrators, successors and permitted assigns called "the Licensee").

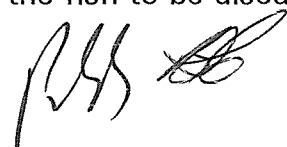

WHEREAS

3. The Licensor is the Controlling Authority in terms of the Marine Farming Act 1971 (in this instrument called "the Act") of the area described in the Schedule attached to Licence Number 239 to which this Memorandum of Variation is attached (in this instrument called "the licensed area").
4. The Licensee has applied for a variation to Licence Number 239 by way of extension to the term of the licence.
5. The Licensor is empowered under Section 13 of the Act to extend the term of the licence provided that the concurrence of the Minister of Conservation and the Minister of Transport has been obtained.
6. The concurrence of the Minister of Conservation and the Minister of Transport has been obtained for the extension of the term of Licence Number 239 to be extended for a period of 14 years from the expiry of the original term.

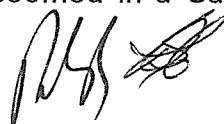

7. The Licenser and the Licensee have, pursuant to Section 13 of the Act, agreed to vary the conditions, covenants and agreements in the said licence in the following manner:

- A. In accordance with Section 49 of the Marine Farming Act 1971 the licensee may take spat and juveniles of a species specified in this licence which are caught within the bounds of the licensed area.
- B. All stock and crop not obtained in accordance with Condition 7A and which is to be held on the farm must come from a source authorised under the Fisheries Act 1983 or from other marine farms licensed to take stock under the Marine Farming Act 1971 provided it is in accordance with the Ministry's policies on transfer of stock between farms.
- C. The Licensee shall not transfer any live farm stock or crop from the area to any other waters (not being a marine farm) without prior approval in writing from the Ministry of Fisheries, Private Bag 14, Nelson.
- D. The Licensee shall not transfer any diseased farm stock or crop to another farm or release into any waters any diseased farm stock or crop kept at any licensed area.
- E. If the Licensee knows or suspects that any fish kept pursuant to this Licence is or may be affected by any Category A disease specified as such from time to time by the Chief Executive by notice published pursuant to the Freshwater Fish Farming Regulations 1983 in the Gazette, or knows or suspects that any fish kept pursuant to this Licence is or may be affected by any disease or condition the licensee cannot identify, the licensee shall, within 24 hours after the time when the licensee discovers or first suspects the fish to be diseased,

advise the Chief Executive or officer in charge of salmon diseases at the Ministry of Fisheries, and shall keep the fish diseased or suspected to be diseased from coming in contact with other fish.

- F. If the Licensee knows or suspects that any fish kept pursuant to this Licence is or may be affected by any Category B disease specified as such from time to time by the Chief Executive by notice published pursuant to the Freshwater Fish Farming Regulations 1983 in the Gazette, and the fish do not respond to treatment within 14 days, advise the Chief Executive or the officer in charge of salmon diseases at the Ministry of Fisheries, and shall keep the fish diseased or suspected to be diseased from coming in contact with other fish.
- G. Any authorised officer may from time to time, by notice in writing to the licensee:
- (a) Require the licensee to carry out such action for the prevention of disease among the stock or crop on the farm as is specified in the notice.
 - (b) Where the officer believes on reasonable grounds that any farm stock or crop on the marine farm is diseased, require the licensee to carry out such action for the treatment of the disease and the decontamination of any nets, buoys, buoyed sea cages or other structures as is required in the notice.
- H. Where an authorised officer believes on reasonable grounds that:
- (a) The fish is affected by any disease specified in a Category A notice; or
 - (b) The fish is affected by any disease specified in a Category B

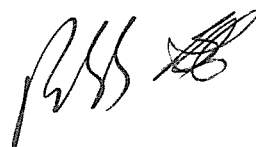

notice which cannot be treated effectively on the farm; or

- (c) The fish is affected by any other disease of such a nature as to require the authorised officer's urgent action, -

the authorised officer may destroy any fish stocks affected, and may take steps as the authorised officer considers necessary to decontaminate any nets, buoys, buoyed sea cages or other structures, or may, by notice in writing to the licensee, require the licensee to destroy those fish stocks and take such steps as are specified in the notice to decontaminate those structures.

- I. No compensation shall be payable in respect of any fish destroyed by an authorised officer pursuant to conditions 7G or 7H of this licence or pursuant to a notice given by an authorised officer under conditions 7G or 7H of this licence.
- J. Only dry pelleted feed is to be used for feeding salmon. The use of alternative food must be approved in writing by the Ministry of Fisheries, Private Bag 14, Nelson.
- K. The Licensee shall not use tributyl tin as an antifoulant agent on any equipment used or brought onto the licence site.
- L. The Licensee shall not use polystyrene or other similar material for floatation purposes unless it is encased so as to prevent the material breaking up.
- M. The Licensee shall not deposit dead salmon, salmon offal or blood water within the farm area or in the sea but shall dispose of said dead salmon, salmon offal or blood water in a manner and location approved in writing by the local Council.

- N. The Licensee may be required by notice in writing from the Ministry of Fisheries, Private Bag 14, Nelson, to inspect or have inspected the sea bed of the farm area and/or the area in the vicinity in accordance with the inspection procedures and sampling programme described in the notice.
- O. The Licensee may be required by notice in writing from the Ministry of Fisheries, Private Bag 14, Nelson, to remove waste deposits from the licence area at the licensee's own expense.
- P. The Licensee or farm operator shall keep a record of all disinfectants, antibiotics, antifoulants or any other chemicals used in the licence area which must show the following information for each application:
- (a) Chemical name
 - (b) Quantity
 - (c) Date
 - (d) Reason for use
- Q. (i) For the farming of MUSSEL (*Perna canaliculus*) and SALMON (*Oncorhynchus tshawytscha*) the licensee shall comply with conditions contained in Schedule A.
- (ii) For the farming of PAUA (*Haliotis iris*, *Haliotis australis*, *Haliotis virginea*) the licensee shall comply with conditions contained in Schedule B.

THEREFORE, from the date of this agreement, the Marine Farm Licence Number 239 shall be varied to the extent outlined in Clauses 7(A) to 7(Q) above and apart from the agreed variation, the present conditions, covenants and agreements shall continue to apply.

NOW THEREFORE this Instrument witnesses that in pursuance of the Act and by Agreement between the parties the Licensor hereby extends the term of Licence Number 239 for a period of 14 years beginning on the 1ST day of OCTOBER 1996 and expiry on the 30TH day of SEPTEMBER 2010. The Licensee hereby agrees to this extension of term and all terms and conditions contained herein and contained in Licence Number 239.

A handwritten signature in black ink, appearing to be 'BSS' followed by a stylized flourish.

SCHEDULE A

MARINE FARMING LICENCE - RECORDKEEPING REQUIREMENTS

1. Manner and form in which records kept:

- (a) Be kept in such manner and format that they can be readily retrieved and made available for examination
- (b) Be held at either
 - (i) The place of business of the licensee, or
 - (ii) Any other premises that are appropriate having regard to where the records are initially prepared
- (c) Be retained for a period of not less than 7 years after completion of the transactions or period to which they relate.

2. Retention of Records:

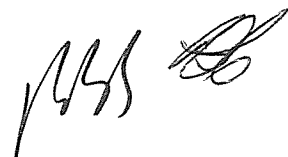

All records produced and/or available to the licensee that contribute to the audit trail of species farmed shall be retained.

3. Failure to keep Records:

Where the Chief Executive considers that the licensee is or has not been completing or retaining the records in an appropriate manner -

- (a) The Chief Executive may, by notice in writing, direct the licensee as to the manner in which the records are to be completed or retained; and
- (b) The licensee shall thereafter ensure that records completed or retained comply with that direction.

Failure to comply with such direction may be treated as a wilful breach of conditions of the licence.

4. Inspection of Records

Any person who is required to keep or who has control of any records required to be kept shall, on request at any reasonable time by the Chief Executive, forthwith (and without charge) produce the records requested and make them available for inspection.

5. Additional Requirements

Where the Chief Executive considers it necessary, and after consultation with the licensee, the Chief Executive may require the licensee to keep such additional records as are appropriate.

A handwritten signature in black ink, appearing to be 'RSH' followed by a stylized flourish.

SCHEDULE B

MARINE FARMING LICENCE - RECORDKEEPING and REPORTING REQUIREMENTS

1. Manner and form in which records kept :

- (a) All transactions which involve a third party a minimum of two documents (ie in duplicate) shall be generated, and each party to the transaction shall obtain and keep one copy.
- (b) Be kept in such manner and format that they can be readily retrieved and made available for examination
- (c) Be held at either
 - (i) The place of business of the licensee, or
 - (ii) Any other premises that are appropriate having regard to where the records are initially prepared
- (d) Be retained for a period of not less than 7 years after completion of the transactions or period to which they relate.

2. Inter-related farming activities

In those instances where the licensee operates several inter-related activities, ie hatchery, nursery, farming (to economic sale size) an adequate audit trail relating to each of the operations should be maintained.

3. Acquisition, disposal and transfer of stock

A record by way of source documentation shall be kept of all stock acquired, disposed of or transferred to another premise not part of the licensee's current farming operation (whether for consideration or otherwise), which shall include the following information:

- (i) Ministry of Fisheries client number (of both purchaser and seller where applicable)
- (ii) Date acquired, disposed of (or transferred)
- (iii) Name and address of both purchaser and seller
- (iv) Quantity (by specific unit)

- (iv) Description of stock
 - Scientific name and common name
 - Age/growth class
 - Any other details relevant to identifying the stock
- (v) \$price (if applicable)

4. Losses

A record of all losses (eg mortality, unexplained loss, destruction, etc), which record shall be in sufficient detail to allow the time period and circumstances of loss to be identified.

5. Retention of Records

All records produced and/or available to the licensee (whether specifically identified or not) that contribute to the audit trail of species farmed shall be retained.

6. Failure to keep Records

Where the Chief Executive considers that the licensee is or has not been completing or keeping the records in an appropriate manner -

- (a) The Chief Executive may, by notice in writing, direct the licensee as to the manner in which the records are to be completed or kept; and
- (b) The licensee shall thereafter ensure that records completed or kept comply with that direction

Failure to comply with such direction may be treated as a wilful breach of conditions of licence.

7. Annual Inventory Return to be furnished

- (a) The licensee shall, at least once during each fishing year (being a year commencing on the 1st day of October), furnish to the Chief Executive an annual inventory return of stock owned and/or held, such annual inventory return to include the following information:

- (i) Date on which inventory return relates
- (ii) Species
- (iii) State and/or age/growth class
- (iv) Weight and/or number

- (v) Any other details required to adequately identify the type and quantity of stock held
- (b) A nil return shall be furnished in the case of a nil inventory.
- (c) Every annual inventory return shall -
 - (i) Certify that the return does not contain false or misleading information, and is a true representation of all stock owned and/or held by the licensee as at inventory date; and
 - (ii) Be signed by the licensee or by a person authorised to act on behalf of the licensee.

8. Variation from strict requirements in certain cases-

- (1) Where the Chief Executive is satisfied that in respect of any licensee or class of licensee
 - (a) compliance with any recordkeeping requirement would cause undue hardship or would be impracticable; or
 - (b) the purpose behind any recordkeeping requirement could be equally well achieved by any other mode or system of records,-

the Chief Executive may exempt the licensee from the need to comply with that requirement

- (2) Any such exemption, -
 - (a) May be subject to such conditions, or be for such limited period, as the Chief Executive may specify.
 - (b) May be withdrawn by the Chief Executive at any time.

9. Inspection of records

Any person who is required to keep or who has control of any records required to be kept shall, on request at any reasonable time by the Chief Executive, forthwith (and without charge) produce the records requested and make them available for inspection.

If you have received this message in error, please notify us immediately by facsimile or telephone and return the original message to us by mail. Thank you.

Good Afternoon Alex,

Thank you for your letter dated 27 May 1997 regarding the recent round of marine farm inspections which included MEL239 at Forsyth bay. Your letter indicated that the farm had two defective lights fitted. This was indeed the case and I would like you to please accept this fax as being written advice to Council that those lights have been repaired as at 13/06/97. Hopefully, this is satisfactory to you. I am contactable on 025 359501 should you have any further queries.

Regards

Paul Sowman

Further to your letter of 30 August 1996 please find attached a table listing the proposed status of surface structures at our Marine Farm Licences following the merger of Southern Ocean Seafoods Ltd and Regal Salmon Ltd. The dates given are those by which we will have established the farms to their final configuration.

I would appreciate the Council's tolerance and understanding as we continue to rationalise our industry in the Marlborough Sounds.

Sincerely,

Graeme Coates
General Manager Aquaculture

COMMENTS:	96090532

Dear Jenny,

Re : MFL 239 - Forsyth Bay

In response to your letter 30 August 1996 I can provide you with the following information that you require.

- (1) 4 "Mega" cages
- (2) All cages are 42m sq.
- (3) All structures are as near as possible to mid-point on the licence
- (4) At present there are two smaller cages present on the farm which are used for Harvesting purposes and because they are transient (i.e. travel between both Pelorus and Queen Charlotte Sound sites) they should not be considered as permanent structures.

You should note that at present the Pelorus farm sites are going through a rationalisation process over the next two months and during this period cages may appear on different locations to those previously experienced by your inspection staff. The Port Ligar site should be fully vacated by Friday 13 August 1996 with those cages relocating to Forsyth Bay. The Bulwer farm site will have its cages "mothballed" by Xmas 1996 but remaining on the site awaiting future development. Once this rationalisation is over I will forward your office a copy of final site layouts for your records.

If you have any issues regarding the licenced structures on any of the Pelorus sites then you should direct your enquiries to Graeme Coates at the Picton office.

Any inspection issues regarding the Pelorus sites should be directed to the undersigned.

Your faithfully,

A handwritten signature in black ink, appearing to read 'PS' followed by a stylized flourish.

MEMORANDUM OF VARIATION OF LICENCE
(ISSUED UNDER THE MARINE FARMING ACT 1971)

PARTIES to this Agreement

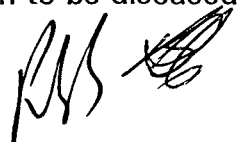

1. HER MAJESTY THE QUEEN in right of the Government of New Zealand acting by and through the Minister of Fisheries (in this instrument called "the Licensor").
2. SOUTHERN OCEAN SEAFOODS LIMITED (in this instrument together with executors, administrators, successors and permitted assigns called "the Licensee").

WHEREAS

3. The Licensor is the Controlling Authority in terms of the Marine Farming Act 1971 (in this instrument called "the Act") of the area described in the Schedule attached to Licence Number 239 to which this Memorandum of Variation is attached (in this instrument called "the licensed area").
4. The Licensee has applied for a variation to Licence Number 239 by way of extension to the term of the licence.
5. The Licensor is empowered under Section 13 of the Act to extend the term of the licence provided that the concurrence of the Minister of Conservation and the Minister of Transport has been obtained.
6. The concurrence of the Minister of Conservation and the Minister of Transport has been obtained for the extension of the term of Licence Number 239 to be extended for a period of 14 years from the expiry of the original term.

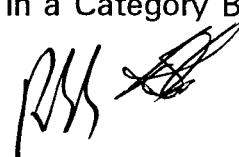

A handwritten signature in black ink, appearing to be 'RSS' followed by a stylized flourish.

7. The Licenser and the Licensee have, pursuant to Section 13 of the Act, agreed to vary the conditions, covenants and agreements in the said licence in the following manner:
- A. In accordance with Section 49 of the Marine Farming Act 1971 the licensee may take spat and juveniles of a species specified in this licence which are caught within the bounds of the licensed area.
 - B. All stock and crop not obtained in accordance with Condition 7A and which is to be held on the farm must come from a source authorised under the Fisheries Act 1983 or from other marine farms licensed to take stock under the Marine Farming Act 1971 provided it is in accordance with the Ministry's policies on transfer of stock between farms.
 - C. The Licensee shall not transfer any live farm stock or crop from the area to any other waters (not being a marine farm) without prior approval in writing from the Ministry of Fisheries, Private Bag 14, Nelson.
 - D. The Licensee shall not transfer any diseased farm stock or crop to another farm or release into any waters any diseased farm stock or crop kept at any licensed area.
 - E. If the Licensee knows or suspects that any fish kept pursuant to this Licence is or may be affected by any Category A disease specified as such from time to time by the Chief Executive by notice published pursuant to the Freshwater Fish Farming Regulations 1983 in the Gazette, or knows or suspects that any fish kept pursuant to this Licence is or may be affected by any disease or condition the licensee cannot identify, the licensee shall, within 24 hours after the time when the licensee discovers or first suspects the fish to be diseased,

advise the Chief Executive or officer in charge of salmon diseases at the Ministry of Fisheries, and shall keep the fish diseased or suspected to be diseased from coming in contact with other fish.

- F. If the Licensee knows or suspects that any fish kept pursuant to this Licence is or may be affected by any Category B disease specified as such from time to time by the Chief Executive by notice published pursuant to the Freshwater Fish Farming Regulations 1983 in the Gazette, and the fish do not respond to treatment within 14 days, advise the Chief Executive or the officer in charge of salmon diseases at the Ministry of Fisheries, and shall keep the fish diseased or suspected to be diseased from coming in contact with other fish.
- G. Any authorised officer may from time to time, by notice in writing to the licensee:
- (a) Require the licensee to carry out such action for the prevention of disease among the stock or crop on the farm as is specified in the notice.
 - (b) Where the officer believes on reasonable grounds that any farm stock or crop on the marine farm is diseased, require the licensee to carry out such action for the treatment of the disease and the decontamination of any nets, buoys, buoyed sea cages or other structures as is required in the notice.
- H. Where an authorised officer believes on reasonable grounds that:
- (a) The fish is affected by any disease specified in a Category A notice; or
 - (b) The fish is affected by any disease specified in a Category B

A handwritten signature in black ink, appearing to be 'RHS' followed by a stylized flourish.

notice which cannot be treated effectively on the farm; or

- (c) The fish is affected by any other disease of such a nature as to require the authorised officer's urgent action, -

the authorised officer may destroy any fish stocks affected, and may take steps as the authorised officer considers necessary to decontaminate any nets, buoys, buoyed sea cages or other structures, or may, by notice in writing to the licensee, require the licensee to destroy those fish stocks and take such steps as are specified in the notice to decontaminate those structures.

- I. No compensation shall be payable in respect of any fish destroyed by an authorised officer pursuant to conditions 7G or 7H of this licence or pursuant to a notice given by an authorised officer under conditions 7G or 7H of this licence.
- J. Only dry pelleted feed is to be used for feeding salmon. The use of alternative food must be approved in writing by the Ministry of Fisheries, Private Bag 14, Nelson.
- K. The Licensee shall not use tributyl tin as an antifoulant agent on any equipment used or brought onto the licence site.
- L. The Licensee shall not use polystyrene or other similar material for floatation purposes unless it is encased so as to prevent the material breaking up.
- M. The Licensee shall not deposit dead salmon, salmon offal or blood water within the farm area or in the sea but shall dispose of said dead salmon, salmon offal or blood water in a manner and location approved in writing by the local Council.

A handwritten signature in black ink, consisting of stylized, overlapping letters, likely 'MS' followed by a flourish.

- N. The Licensee may be required by notice in writing from the Ministry of Fisheries, Private Bag 14, Nelson, to inspect or have inspected the sea bed of the farm area and/or the area in the vicinity in accordance with the inspection procedures and sampling programme described in the notice.
- O. The Licensee may be required by notice in writing from the Ministry of Fisheries, Private Bag 14, Nelson, to remove waste deposits from the licence area at the licensee's own expense.
- P. The Licensee or farm operator shall keep a record of all disinfectants, antibiotics, antifoulants or any other chemicals used in the licence area which must show the following information for each application:
- (a) Chemical name
 - (b) Quantity
 - (c) Date
 - (d) Reason for use
- Q. (i) For the farming of MUSSEL (*Perna canaliculus*) and SALMON (*Oncorhynchus tshawytscha*) the licensee shall comply with conditions contained in Schedule A.
- (ii) For the farming of PAUA (*Haliotis iris*, *Haliotis australis*, *Haliotis virginea*) the licensee shall comply with conditions contained in Schedule B.

THEREFORE, from the date of this agreement, the Marine Farm Licence Number 239 shall be varied to the extent outlined in Clauses 7(A) to 7(Q) above and apart from the agreed variation, the present conditions, covenants and agreements shall continue to apply.

NOW THEREFORE this Instrument witnesses that in pursuance of the Act and by Agreement between the parties the Licensor hereby extends the term of Licence Number 239 for a period of 14 years beginning on the 1ST day of OCTOBER 1996 and expiry on the 30TH day of SEPTEMBER 2010. The Licensee hereby agrees to this extension of term and all terms and conditions contained herein and contained in Licence Number 239.

SCHEDULE A

MARINE FARMING LICENCE - RECORDKEEPING REQUIREMENTS

1. Manner and form in which records kept:

- (a) Be kept in such manner and format that they can be readily retrieved and made available for examination
- (b) Be held at either
 - (i) The place of business of the licensee, or
 - (ii) Any other premises that are appropriate having regard to where the records are initially prepared
- (c) Be retained for a period of not less than 7 years after completion of the transactions or period to which they relate.

2. Retention of Records:

All records produced and/or available to the licensee that contribute to the audit trail of species farmed shall be retained.

3. Failure to keep Records:

Where the Chief Executive considers that the licensee is or has not been completing or retaining the records in an appropriate manner -

- (a) The Chief Executive may, by notice in writing, direct the licensee as to the manner in which the records are to be completed or retained; and
- (b) The licensee shall thereafter ensure that records completed or retained comply with that direction.

Failure to comply with such direction may be treated as a wilful breach of conditions of the licence.

A handwritten signature in black ink, consisting of stylized, overlapping loops and strokes, located in the bottom right corner of the page.

4. Inspection of Records

Any person who is required to keep or who has control of any records required to be kept shall, on request at any reasonable time by the Chief Executive, forthwith (and without charge) produce the records requested and make them available for inspection.

5. Additional Requirements

Where the Chief Executive considers it necessary, and after consultation with the licensee, the Chief Executive may require the licensee to keep such additional records as are appropriate.

A handwritten signature in black ink, consisting of stylized, cursive letters, located in the bottom right corner of the page.

SCHEDULE B

MARINE FARMING LICENCE - RECORDKEEPING and REPORTING REQUIREMENTS

1. Manner and form in which records kept :

- (a) All transactions which involve a third party a minimum of two documents (ie in duplicate) shall be generated, and each party to the transaction shall obtain and keep one copy.
- (b) Be kept in such manner and format that they can be readily retrieved and made available for examination
- (c) Be held at either
 - (i) The place of business of the licensee, or
 - (ii) Any other premises that are appropriate having regard to where the records are initially prepared
- (d) Be retained for a period of not less than 7 years after completion of the transactions or period to which they relate.

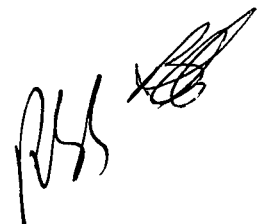

2. Inter-related farming activities

In those instances where the licensee operates several inter-related activities, ie hatchery, nursery, farming (to economic sale size) an adequate audit trail relating to each of the operations should be maintained.

3. Acquisition, disposal and transfer of stock

A record by way of source documentation shall be kept of all stock acquired, disposed of or transferred to another premise not part of the licensee's current farming operation (whether for consideration or otherwise), which shall include the following information:

- (i) Ministry of Fisheries client number (of both purchaser and seller where applicable)
- (ii) Date acquired, disposed of (or transferred)
- (iii) Name and address of both purchaser and seller
- (iv) Quantity (by specific unit)

Handwritten signature and initials, possibly 'RHS' and 'XCB', in black ink.

- (iv) Description of stock
 - Scientific name and common name
 - Age/growth class
 - Any other details relevant to identifying the stock
- (v) \$price (if applicable)

4. Losses

A record of all losses (eg mortality, unexplained loss, destruction, etc), which record shall be in sufficient detail to allow the time period and circumstances of loss to be identified.

5. Retention of Records

All records produced and/or available to the licensee (whether specifically identified or not) that contribute to the audit trail of species farmed shall be retained.

6. Failure to keep Records

Where the Chief Executive considers that the licensee is or has not been completing or keeping the records in an appropriate manner -

- (a) The Chief Executive may, by notice in writing, direct the licensee as to the manner in which the records are to be completed or kept; and
- (b) The licensee shall thereafter ensure that records completed or kept comply with that direction

Failure to comply with such direction may be treated as a wilful breach of conditions of licence.

7. Annual Inventory Return to be furnished

- (a) The licensee shall, at least once during each fishing year (being a year commencing on the 1st day of October), furnish to the Chief Executive an annual inventory return of stock owned and/or held, such annual inventory return to include the following information:
 - (i) Date on which inventory return relates
 - (ii) Species
 - (iii) State and/or age/growth class
 - (iv) Weight and/or number

- (v) Any other details required to adequately identify the type and quantity of stock held
 - (b) A nil return shall be furnished in the case of a nil inventory.
 - (c) Every annual inventory return shall -
 - (i) Certify that the return does not contain false or misleading information, and is a true representation of all stock owned and/or held by the licensee as at inventory date; and
 - (ii) Be signed by the licensee or by a person authorised to act on behalf of the licensee.
8. Variation from strict requirements in certain cases-
- (1) Where the Chief Executive is satisfied that in respect of any licensee or class of licensee
 - (a) compliance with any recordkeeping requirement would cause undue hardship or would be impracticable; or
 - (b) the purpose behind any recordkeeping requirement could be equally well achieved by any other mode or system of records,-the Chief Executive may exempt the licensee from the need to comply with that requirement
 - (2) Any such exemption, -
 - (a) May be subject to such conditions, or be for such limited period, as the Chief Executive may specify.
 - (b) May be withdrawn by the Chief Executive at any time.
9. Inspection of records

Any person who is required to keep or who has control of any records required to be kept shall, on request at any reasonable time by the Chief Executive, forthwith (and without charge) produce the records requested and make them available for inspection.

Dear Sir,

Marine Farm Inspection Report - Licence No. 239 Coastal
Permit U940238 and U950523

An inspection of your marine farm located at Forsyth Bay
was made on 1 November 1995.

Structures in the area : 3 long lines and 3 supercages

Approved plans MDC 566 for 3 Supercages : 2 Utility Cages :
and 1 barge

Overall condition of farm - requires attention to lights

The following deficiencies were noted :

1. Only one light fitted and operating on mussel line -
SECOND LIGHT REQUIRED.
2. Salmon farm has three operating lights - a fourth light is
required.
3. Orange buoy required at centre of outer line, and end of
one line.

You are required to complete the above upgrading immediately
and confirm such action in writing to the Harbourmaster, at
the Marlborough District Council, PO Box 443, Blenheim by 4
December 1995.

Yours faithfully,

Roach Contracting

NOTIFICATION OF EXTENSION OF TERM OF MARINE FARMING LICENCE NUMBER 239 : SOUTHERN OCEAN SEAFOODS LIMITED

Marine Farming Licence Number 239, situated in Forsyth Bay, and currently held by Southern Ocean Seafoods Limited is due to expire on 30 September 1996.

The licensee has applied for an extension of term to this licence for an additional 14 years.

Section 13(5) of the Marine Farming Act 1971 requires that you be given two months notice of the intention to offer any lessee or licensee an extension of their lease or licence. You are hereby notified that it is intended to offer Southern Ocean Seafoods Limited an extension of Licence Number 239 for a term of 14 years.

Attached is a copy of the existing Licence document applied to Licence Number 239.

Would you please advise me within two months of receipt of this letter of any comments you have on the conditions contained within this licence with a view to their possible amendment.

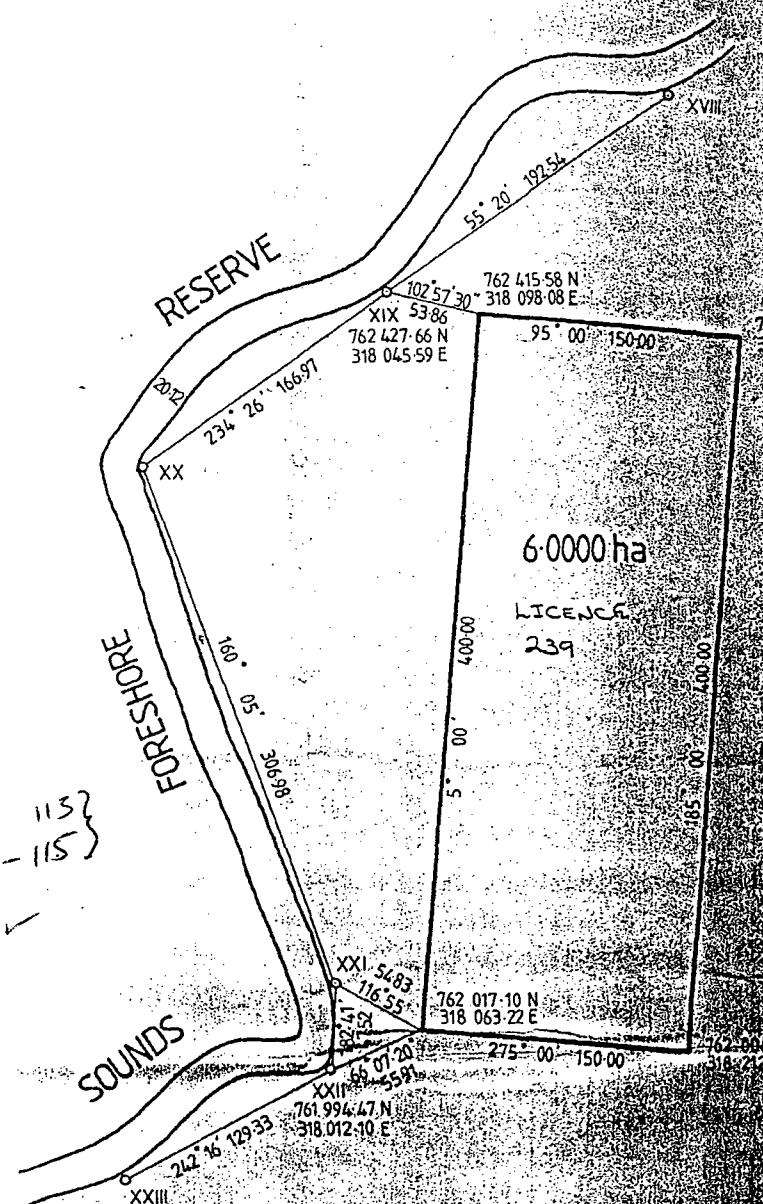

If you have any queries please do not hesitate to write or call.

LICENCE UNDER THE MARINE FARMING ACT 1971

Licensor

The Minister of Agriculture and Fisheries (hereinafter referred to as "the Licensor") is the controlling authority under the Marine Farming Act 1971 (hereinafter referred to as "the Act") of the area described in the schedule hereto (hereinafter referred to as "the area").

Licensee

SUZETTE FISHER (together with executors, administrators, successors and permitted assigns hereinafter called "the Licensee").

Licence

The Licensor upon the execution of this instrument subject to the terms and conditions set out below has agreed to grant to the Licensee a Licence of the area for a term of fourteen years beginning on the FIRST day of *October* 1982 at an annual licence fee of SIXTY dollars (\$60.00) payable in advance on the FIRST day of *October* each calendar year, for the use of the area as a marine farm pursuant to the provisions of the Marine Farming Act 1971.

Conditions

1. THE LICENSEE HEREBY COVENANTS with the Licensor as follows:

- (a) The Licensee will at all times comply with the provisions of the Act and Regulations thereunder.
- (b) The Licensee shall pay the annual licence fee as and when described above to the Director-General of Agriculture

DF.

and Fisheries (in this instrument called the "Director-General") at the Head Office of the Ministry of Agriculture and Fisheries in Wellington.

(c) If the Licensee is at any time in arrears with payment of the annual licence fee he shall not remove from the area any fish, shellfish or marine vegetation farmed in that area except with the written consent of the Director-General.

(d) The licensee shall utilize and cultivate in a proper manner the area for the purpose of farming MUSSELS and shall comply at all times with the Act and any regulations, notices and requirements made or issued pursuant to the Act.

(e) The Licensee shall not erect, place, moor or keep in the area any structure, raft, buoy or buoyed longline which is not first approved by the Ministry of Transport at Wellington and provided with such functioning beacons, lights, buoys, fog signals and other equipment as the Ministry of Transport may lawfully require.

(f) The Licensee shall on the expiration, determination, forfeiture or surrender of the licence, remove all structures, rafts, buoys, buoyed longlines and other plant from the area, and restore the area as far as is practicable to its original condition to the reasonable satisfaction of the Licensor.

(g) If the Licensee fails to comply with clause (f) of this licence the Licensor may at the expense of the Licensee, take such steps as are necessary to fulfil the Licensee's obligations under that clause.

(h) The Licensee shall take steps to ensure that the fish, shellfish or marine vegetation farmed in the area are not

O.F.

rendered unfit for human consumption by disease, infection by marine pests, or contamination by sewage.

(i) The Licensee will maintain in good order and repair all structures, rafts, buoys, buoyed longlines, beacons, noticeboards and other plant in the area and will not permit such to deteriorate through want of repair so as to be, become, or cause, in the opinion of the Licensor a hazard or potential hazard to navigation.

(j) The Licensee will permit and facilitate free access to, over and from any raft, structure, buoy or buoyed longline to any fisheries officer or any officer in the employment of the Crown authorised by the Director-General who may from time to time wish to enter and inspect the area to ensure that the provisions of the Act or of this licence are being complied with or not contravened.

(k) The Licensee shall not assign, sublet or part with the possession of the whole or any part of the area without the prior consent in writing of the Licensor.

2. THE LICENSOR HEREBY COVENANTS WITH the Licensee as follows:

The Licensor or any fisheries officer or officer of the Crown who under the terms of this licence or the Act enters and inspects the area shall cause little interference as is reasonably possible with the use of the area or with any raft, structure, buoy, buoyed longline, mooring arrangements, mooring or navigational marks, or fish or marine vegetation of the species authorised to be farmed in terms of this licence.

Provisos

3. PROVIDED ALWAYS and it is hereby agreed and declared by and between the Licensor and Licensee that:

D.F.

(a) The licence shall be liable to forfeiture without payment of compensation if the Licensee:

- (i) Cannot be found, or has abandoned the area, or has died and no personal representative has claimed the area within 12 months after his death; or
- (ii) Has not within a period of two years from the commencement of the licence, or within such further period as the Licensor may specify by notice in writing to the Licensee, begun to develop to the satisfaction of the licensor the area as a marine farm for the farming of the species specified in this licence; or
- (iii) Defaults in or is in breach of any term or condition of this licence;

(b) If after a period of seven years from the commencement of this licence the Licensee has not developed the whole of the area as a marine farm, such part of the area as shall then remain undeveloped shall be liable to forfeiture.

(c) If the licence, or part of the area, is liable to forfeiture and the Licensee has failed after notice has been given to him to remedy the default or breach, the Licensor may forfeit the licence without action and may thereupon re-enter and recover possession.

SCHEDULE

All that area containing 6.0000 hectares, more or less, in front of Sounds Foreshore Reserve and Section 3, Block XVI, Oriieri Survey District, bounded by a line commencing at a point in Forsyth Bay being 53.86 metres distant along a bearing of

D.F.

102°57'30" from peg XIX on S.O. Plan 241 in Block XVI, Orieri Survey District; thence along a bearing of 95°00' for a distance of 150 metres to the northeastern corner; thence along a bearing of 185°00' for a distance of 400 metres to the south eastern corner; thence along a bearing of 275°00' for a distance of 150 metres to the south western corner; thence along a bearing of 5°00' for a distance of 400 metres to the north western corner, the point of commencement.

The above area is more particularly shown on S.O. Plan 6001.

Issued under the Marine Farming Act 1971

19

1. The Minister of Fisheries (hereinafter referred to as "the Licensor").
2. SOUTHERN OCEAN SEAFOODS LIMITED (together with executors, administrators, successors and permitted assigns, hereinafter referred to as "the Licensee").

C. In accordance with Section 49 of the Marine Farming Act 1971 the licensee may take spat and juveniles of a species specified in this licence which are caught within the bounds of the licensed area.

Ju

- D. All stock and crop not obtained in accordance with Condition 4C and which is to be held on the farm must come from a source authorised under the Fisheries Act 1983 or from other marine farms licensed to take stock under the Marine Farming Act 1971 provided it is in accordance with the Ministry's policies on transfer of stock between farms.
- E. The Licensee shall not transfer any live farm stock or crop from the area to any other waters (not being a marine farm) without prior approval in writing of the Regional Manager, MAF Fisheries Central, Private Bag 14, Nelson.
- F. The Licensee shall not transfer any diseased farm stock or crop to another farm or release into any waters any diseased farm stock or crop kept at any licensed area.
- G. Any authorised officer may from time to time, by notice in writing to the Licensee:
- (i) require the Licensee to carry out such action for the prevention of disease among the stock or crop on the farm as is specified in the notice;
 - (ii) where the officer believes on reasonable grounds that any farmed stock or crop on the marine farm is diseased, require the Licensee to carry out such action for the treatment of the disease and the decontamination of any nets, buoys or other structures as is required in the notice.
- H. No compensation shall be payable in respect of any stock or crop required to be destroyed by an authorised officer pursuant to Condition 4(G) of this licence.

I. Recordkeeping requirements -

- (i) For the farming of MUSSEL (*Perna canaliculus*) the Licensee shall comply with the conditions contained in Schedule A.
- (ii) For the farming of PAUA (*Haliotis iris*, *Haliotis australis*, *Haliotis virginea*) the Licensee shall comply with the conditions contained in Schedule B.

THEREFORE, from the date of this agreement, the Marine Farm Licence Number 239 shall be varied to the extent outlined in Clauses 4(A) to 4(I) above and apart from the agreed variation, the present conditions, covenants and agreements shall continue to apply.

SCHEDULE A

MARINE FARMING LICENCE - RECORDKEEPING REQUIREMENTS

1. Manner and form in which records kept :
 - (a) Be kept in such manner and format that they can be readily retrieved and made available for examination
 - (b) Be held at either
 - (i) The place of business of the licensee, or
 - (ii) Any other premises that are appropriate having regard to where the records are initially prepared
 - (c) Be retained for a period of not less than 7 years after completion of the transactions or period to which they relate.

2. Retention of Records:

All records produced and/or available to the licensee that contribute to the audit trail of species farmed shall be retained.

3. Failure to keep Records:

Where the Director General considers that the licensee is or has not been completing or retaining the records in an appropriate manner -

- (a) The Director General may, by notice in writing, direct the licensee as to the manner in which the records are to be completed or retained; and
- (b) The licensee shall thereafter ensure that records completed or retained comply with that direction.

Failure to comply with such direction may be treated as a wilful breach of conditions of the licence.

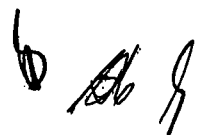

4. Inspection of Records

Any person who is required to keep or who has control of any records required to be kept shall, on request at any reasonable time by the Director-General, forthwith (and without charge) produce the records requested and make them available for inspection.

5. Additional Requirements

Where the Director-General considers it necessary, and after consultation with the licensee, the Director-General may require the licensee to keep such additional records as are appropriate.

SCHEDULE B

MARINE FARMING LICENCE - RECORDKEEPING and REPORTING REQUIREMENTS

1. Manner and form in which records kept :
 - (a) All transactions which involve a third party a minimum of two documents (ie in duplicate) shall be generated, and each party to the transaction shall obtain and keep one copy.
 - (b) Be kept in such manner and format that they can be readily retrieved and made available for examination
 - (c) Be held at either
 - (i) The place of business of the licensee, or
 - (ii) Any other premises that are appropriate having regard to where the records are initially prepared
 - (d) Be retained for a period of not less than 7 years after completion of the transactions or period to which they relate.

2. Inter-related farming activities

In those instances where the licensee operates several inter-related activities, ie hatchery, nursery, farming (to economic sale size) an adequate audit trail relating to each of the operations should be maintained.

3. Acquisition, disposal and transfer of stock

A record by way of source documentation shall be kept of all stock acquired, disposed of or transferred to another premise not part of the licensee's current farming operation (whether for consideration or otherwise), which shall include the following information:

- (i) MAF client number (of both purchaser and seller where applicable)
- (ii) Date acquired, disposed of (or transferred)
- (iii) Name and address of both purchaser and seller
- (iv) Quantity (by specific unit)

- (iv) Description of stock
 - Scientific name and common name
 - Age/growth class
 - Any other details relevant to identifying the stock
- (v) \$price (if applicable)

4. Losses

A record of all losses (eg mortality, unexplained loss, destruction, etc), which record shall be in sufficient detail to allow the time period and circumstances of loss to be identified.

5. Retention of Records

All records produced and/or available to the licensee (whether specifically identified or not) that contribute to the audit trail of species farmed shall be retained.

6. Failure to keep Records

Where the Director General considers that the licensee is or has not been completing or keeping the records in an appropriate manner -

- (a) The Director General may, by notice in writing, direct the licensee as to the manner in which the records are to be completed or kept; and
- (b) The licensee shall thereafter ensure that records completed or kept comply with that direction

Failure to comply with such direction may be treated as a wilful breach of conditions of licence.

7. Annual Inventory Return to be furnished

- (a) The licensee shall, at least once during each fishing year (being a year commencing on the 1st day of October), furnish to the Director-General an annual inventory return of stock owned and/or held, such annual inventory return to include the following information:
 - (i) Date on which inventory return relates
 - (ii) Species
 - (iii) State and/or age/growth class
 - (iv) Weight and/or number

- (v) Any other details required to adequately identify the type and quantity of stock held
- (b) A nil return shall be furnished in the case of a nil inventory.
- (c) Every annual inventory return shall -
 - (i) Certify that the return does not contain false or misleading information, and is a true representation of all stock owned and/or held by the licensee as at inventory date; and
 - (ii) Be signed by the licensee or by a person authorised to act on behalf of the licensee.

8. Variation from strict requirements in certain cases-

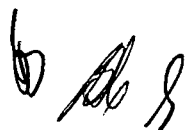

- (1) Where the Director General is satisfied that in respect of any licensee or class of licensee
 - (a) compliance with any recordkeeping requirement would cause undue hardship or would be impracticable; or
 - (b) the purpose behind any recordkeeping requirement could be equally well achieved by any other mode or system of records, -

the Director General may exempt the licensee from the need to comply with that requirement

- (2) Any such exemption, -
 - (a) May be subject to such conditions, or be for such limited period, as the Director General may specify.
 - (b) May be withdrawn by the Director General at any time.

9. Inspection of records

Any person who is required to keep or who has control of any records required to be kept shall, on request at any reasonable time by the Director-General, forthwith (and without charge) produce the records requested and make them available for inspection.

variation.

[Handwritten initials]

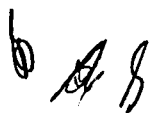

**MEMORANDUM OF VARIATION OF LICENCE
PURSUANT TO THE MARINE FARMING ACT 1971**

BETWEEN The Minister of Fisheries (hereinafter referred to as "the Licensor")

AND SOUTHERN OCEAN SEAFOODS LIMITED (hereinafter referred to as "the Licensee")

WHEREAS

1. The Licensor, as the Controlling Authority under the Marine Farming Act 1971 (hereinafter referred to as "the Act") has issued Marine Farm Licence No. 239.
2. The Licensor and the Licensee agree to vary the said licence to permit the Licensee to farm CHINOOK SALMON (*Oncorhynchus tshawytscha*).
3. **THE PARTIES THEREFORE AGREE** to vary the conditions, covenants and agreements in the said licence, pursuant to Section 13 of the Act, in the following manner:
 - A. All stock which is to be held on the farm must come from a source authorised under the Fisheries Act 1983 or the Marine Farming Act 1971.

- B. The Licensee shall not transfer any live farm stock from the licensed area to any other waters without prior approval in writing of the Licensor, if previously notified of such a requirement.
- C. The Licensee shall not transfer any diseased farm stock to any farm or release into any waters any diseased farm stock kept at the licensed area.
- D. If the Licensee knows or suspects that any fish kept pursuant to this licence is or may be affected by any Category A disease specified as such from time to time by the Director-General by notice published pursuant to the Freshwater Fish Farming Regulations 1983 in the Gazette, or knows or suspects that any fish kept pursuant to this licence is or may be affected by any disease or condition the Licensee cannot identify, the Licensee shall, within 24 hours after the time when the Licensee discovers or first suspects the fish to be diseased, advise the Director-General or veterinarian or fish pathologist at the Ministry of Agriculture and Fisheries, and shall keep the fish diseased or suspected to be diseased from coming in contact with other fish.
- E. If the Licensee knows or suspects that any fish kept pursuant to this licence is or may be affected by any Category B disease specified as such from time to time by the Director-General by notice published pursuant to the Freshwater Fish Farming Regulations 1983 in the Gazette, and the fish do not respond to treatment within 14 days, advise the Director-General or veterinarian or fish bacteriologist at the

Ministry of Agriculture and Fisheries, and shall keep the fish diseased or suspected to be diseased from coming in contact with other fish.

F. Any Licensor may from time to time, by notice in writing to the Licensee:

- (i) require the Licensee to carry out such action for the prevention of disease among the stock on the farm as is specified in the notice;
- (ii) where the Licensor believes on reasonable grounds that any farmed stock on the marine farm is diseased, require the Licensee to carry out such action for the treatment of the disease and the decontamination of any nets, buoys or other structures as is required in the notice.

G. Where the Licensor believes on reasonable grounds that:

- (i) the fish is affected by any disease specified in a Category A notice; or
- (ii) the fish is affected by any disease specified in a Category B notice which cannot be treated effectively on the farm; or

- (iii) the fish is affected by any other disease of such a nature as to require his urgent action -

destroy any fish stocks affected, and may take steps as he considers necessary to decontaminate any nets, buoys, buoyed sea cages or other structures, or may, by notice in writing to the Licensee, require him to destroy those fish stocks and take such steps as are specified in the notice to decontaminate those structures.

- H. No compensation shall be payable in respect of any fish required to be destroyed by the Licensor pursuant to conditions (F) or (G) of this licence or pursuant to a notice given by the Licensor under conditions (F) or (G) of this licence.
- I. The Licensee shall not use any feed other than that occurring naturally in the area without prior approval in writing of the Licensor.
- J. The Licensee shall not use tributyl tin as an antifoulant agent on any equipment used or brought onto the licence site.
- K. Recordkeeping requirements.

For the farming of CHINOOK SALMON (*Oncorhynchus tshawytscha*)
the licensee shall comply with conditions contained in Schedule A.

THEREFORE, from the date of this agreement, the Marine Farm Licence Number 239 shall be varied to the extent outlined in Clauses 3(A) to 3(K) above and apart from the agreed variation, the present conditions, covenants and agreements shall continue to apply.

SCHEDULE A

MARINE FARMING LICENCE - RECORDKEEPING REQUIREMENTS

1. Manner and form in which records kept :
 - (a) Be kept in such manner and format that they can be readily retrieved and made available for examination
 - (b) Be held at either
 - (i) The place of business of the licensee, or
 - (ii) Any other premises that are appropriate having regard to where the records are initially prepared
 - (c) Be retained for a period of not less than 7 years after completion of the transactions or period to which they relate.

2. Retention of Records:

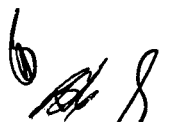

All records produced and/or available to the licensee that contribute to the audit trail of species farmed shall be retained.

3. Failure to keep Records:

Where the Director General considers that the licensee is or has not been completing or retaining the records in an appropriate manner -

- (a) The Director General may, by notice in writing, direct the licensee as to the manner in which the records are to be completed or retained; and
- (b) The licensee shall thereafter ensure that records completed or retained comply with that direction.

Failure to comply with such direction may be treated as a wilful breach of conditions of the licence.

4. Inspection of Records

Any person who is required to keep or who has control of any records required to be kept shall, on request at any reasonable time by the Director-General, forthwith (and without charge) produce the records requested and make them available for inspection.

5. Additional Requirements

Where the Director-General considers it necessary, and after consultation with the licensee, the Director-General may require the licensee to keep such additional records as are appropriate.

Dear Katrina

Extension of Term on Various Marine Farm Licences

I write in reply to your advice that several marine farm licences have been offered an extension of term. Please note the following:

Marine Farm Licence 212

This licence is within an area allocated for marine farming by the Proposed Marlborough Sounds Maritime Planning Scheme. The last inspection of this site was undertaken on 4 July 1995 and it was noted that the overall condition of the farm was good, and that there were no deficiencies with three lights fitted and operating.

Marine Farm Licence 255

This licence is within an area allocated for marine farming by the Proposed Marlborough Sounds Maritime Planning Scheme. The last inspection of this site was made on 29 June 1995. It was noted that of the three lights fitted, none were operating, and that these lights required attention. The licensee was asked to complete this upgrading immediately to confirm such action in writing to Council by 10 August 1995.

Marine Farm Licence 239

This site is in an area allocated for marine farming in the Proposed Marlborough Sounds Maritime Planning Scheme. This farm was inspected on 29 June 1995. It was noted that the condition of the farm needed attention. There was only one light fitted and operating on a mussel line, there was a second light required. The salmon farm has three operating lights, a fourth light is required. There was a coil of rope under the surface near the longlines which needs to be removed immediately as it is a potential danger. The required upgrading is required to be completed immediately and confirmation of the action is to be in writing to the Harbourmaster at the Marlborough District Council by 10 August 1995.

Marine Farm Licence 217

This licence is within an area allocated for marine farming by the Proposed Marlborough Sounds Maritime Planning Scheme. The last inspection on this site was taken on 6 July 1995. It was noted that

the farm was in very good order with two lights fitted and operating. It was noted that a further two lines have been established since the last report.

Marine Farm Licence 223

This licence is within an area allocated for marine farming by the Proposed Marlborough Sounds Maritime Planning Scheme. The last inspection of this site was taken on 25 June 1995 and no deficiencies were noted.

Marine Farm Licence 259

This licence is within an area allocated for marine farming by the Proposed Marlborough Sounds Maritime Planning Scheme. This site was last inspected on 27 June 1995 and no deficiencies were recorded.

I am not aware of the forestry situation adjacent to each of these licences, however I have enclosed a list of the names and addresses of the landowners who own the land immediately adjacent to each of the abovementioned licences.

Yours faithfully

Dear Sir,

Marine Farm Inspection Report - Licence No. 239

An inspection of your marine farm located at Forsyth Bay
was made on 29 June 1995.

Structures in the area : 3 long lines and 3 supercages, 1
barge

Approved plans MDC 566 for 3 Supercages : 2 Utility Cages :
and 1 barge

Overall condition of farm - requires attention as below

The following deficiencies were noted :

1. Only one light fitted and operating on mussel line -
SECOND LIGHT REQUIRED.
2. Salmon farm has three operating lights - a fourth light is
required.
3. SUBSURFACE COIL OF ROPE NEAR LONG LINES MUST BE REMOVED
IMMEDIATELY. IT IS A POTENTIAL DANGER.

You are required to complete the above upgrading immediately
and confirm such action in writing to the Harbourmaster, at
the Marlborough District Council, PO Box 443, Blenheim by 10
August 1995.

Yours faithfully,

Dear Sir

MARINE FARM LICENCE 239

You will be aware that Council's Contractor has recently completed a round of inspections.

On your farm there were several defects noted, the most serious of which is the coil of rope near the long lines. I consider this to be a navigational hazard and require that it is removed at once. Further please ensure that you also address the lighting deficiencies.

Please advise Council as indicated in the report.

Alex,

Please take a look at the attached inspection report and field sheet and fax from Meru Whipp.

Meru wants to know, (bearing in mind that 239 previously had a 2 light dispensation - when it was solely a Mussel farm) where they are being asked to place an extra light on the Mussel line (see highlighted section of report).

Pls advise whether another light is required, and if so pls indicate where.

BLENHEIM

Attention: Gavin Cooper

Dear Sir

**APPLICATION FOR COASTAL PERMIT: DISCHARGE FOR USE OF AQUI-S:
SOUTHERN OCEAN SEAFOODS (WAIHINAU BAY, PORT LIGAR AND FORSYTH
BAY)**

Pursuant to Section 94 of the Resource Management Act 1991, I, Hugh Logan, Regional Conservator of the Nelson/Marlborough Conservancy, acting under delegated authority from Denis Marshall, Minister of Conservation, agree that the application of Southern Ocean Seafoods to discharge the substance AQUI-S (Isoeugenol in a dispersing agent, Polysorbate 80) to water for the purposes of anaesthetising salmon prior to harvesting at the rate of 17 millilitres of AQUI-S per 1,000 litres of water need not be notified in accordance with Section 93 of the Act.

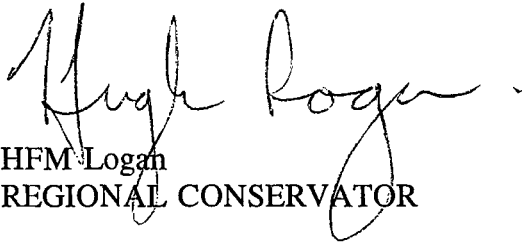

I note that the coastal permits will carry conditions which will refer to the results of the United States Food and Drug Association tests being an integral part of the continuation of use of AQUI-S; that a water monitoring programme will be initiated for a period of three months at each site; and that this monitoring programme will also assess the health of mussels attached to the salmon cage structures.

Nelson/Marlborough Conservancy

Private Bag 5, 186 Bridge Street, Nelson, New Zealand
Telephone 03-546 9335. Fax 03-548 2805

I have attached information on tests conducted by Crop & Food Research of dosage and recovery data for various species on exposure to Aqui-S. It should be noted that this information is confidential to Crop & Food Research, Marlborough District Council and the Department and should not be disclosed to any other party.

Yours faithfully

Dear Ms McAllen

RE : AQUI - S TECHNICAL INFORMATION / RESOURCE CONSENT

With regards to Southern Ocean's application for Resource Consent, we would be pleased to undertake the following :-

1. Provide you with details of our forthcoming application to the USFDA for the approval of the use of AQUI - S in the harvesting of Salmon and other species.
2. To carry out a water monitoring programme at Southern Ocean's farm sites for a period of three months, in accordance with the enclosed protocol.

We also enclose for your information, detailed data of the dosage and recovery trials we have conducted on Salmon and other species. Please treat this data as confidential.

If you require any more information, please do not hesitate to contact us.

Yours sincerely

Dosage and Recovery data for various species on exposure to Aqui-S.

In all the following trials at least five animals were used at each trial. Animals had all been left for a minimum of 24 hours to acclimate to a new environment and in some cases a different temperature. Aqui-S was added to the container holding these animals and continuous observations were carried out on the animals. The following is a summary of these observations and the particular conditions for each trial. In all cases recovery was carried out by placing the animals in fresh running water. In the cases where the tests had been carried out in the laboratory the water was filtered to 2 microns and had saturated dissolved oxygen levels.

Rainbow trout (*Salmo gairdneri*)

Methodology:

Six feral fish of varying stages of maturity had been placed in a 700L bin overnight. Running water was supplied at a temperature of 12.5° C and the dissolved oxygen was 9 ppm. Fish had been left overnight to enable them to partially recover from the effects of netting. Fish were reasonably quiet but easily disturbed when anyone approached the bin. Aqui-S was added to the bin at a nominal concentration of 17 ppm.

Generally the reaction to Aqui-S was similar to the reaction displayed by chinook salmon. Fish did not appear to have any adverse reaction to the introduction of Aqui-S to the water and swimming motions to sedation and anaesthetization were calm.

Dosage	17ppm Aqui-S
Temperature	12.5°C
Time for sedation	12 to 15 minutes
Time for anaesthesia	30 to 40 minutes. (The more mature the fish the longer the response time)
Recovery	Regular swimming motions regained within 2 minutes.

Rock Lobster (*Jasus edwardsii*)

Methodology: Feral (adult) and cultured (juvenile) rock lobster trials were carried out at Mahunga Bay Aquaculture centre, MAF, Wellington.

Ten adult and ten juvenile lobster were used in this trial. The animals had been acclimated to 9°C over the previous 24 hours in covered black plastic bins. The pH of the water was 8.2, dissolved oxygen was 10 mg/L and the salinity was 32.84 Parts per Thousand.

Aqui-S was added at a nominal concentration of 17 ppm. The animals did not appear to notice the addition of Aqui-S and continued with normal walking motions around the bin.

Dosage	17ppm Aqui-S	
Temperature	5.6°C	
Reaction to Aqui-S	No apparent awareness.	
Time to Sedation	Juvenile	8 to 10 minutes
	Adult	10 to 12 minutes

Time to anaesthesia	Juvenile	12 to 15 minutes
	Adult	15 to 20 minutes
Recovery	Equilibrium regained and walking/swimming motions regained within 5 minutes of introduction to fresh water. Noticeable tail curl reflex 15 minutes from removal from the anaesthetic. Lobster remained calm with no avoidance of handling for a further 25 minutes. 1 hour after removal from the anaesthetic normal aggressive behaviour returned. Adults and juveniles responded in a similar fashion.	

Sedation : The point at which equilibrium is lost, no aggression to being handled although the animal is still aware of being handled.

Anaesthesia: The point at which handling can be achieved with no reaction from the animal. In this state the tail fans are spread out and there is no reflexive curling in of the tail. When the animal is placed on it's back the tail is fully extended.

Ten animals were also exposed to 50ppm Aqui-S. The animals reached the anaesthetized state within 10 minutes and were left in this concentration for 1 hour. Due to the animals structure of the nervous system the walking motion continued for some time. Eventually this reflexive motion ceased. When the animals were removed from the anaesthetic they immediately regained their ability to walk and within 10 minutes they had regained the tail curl. The instinctive reaction to find a sheltered spot at moments of perceived vulnerability was almost immediately present. This is especially important in the case of cultured animals because they often loose this reaction as they are not exposed to the usual wild predators.

Paua (*Haliotis iris*)

Methodology: Feral and cultured paua trials were carried out at Mahunga Bay Aquaculture centre, MAF, Wellington.

Animals were at an acclimated temperature of 15.5 °C. Dissolved oxygen was measured at 10 mg/L and the pH of the water was measured at 7.32. Aqui-S was added at a nominal concentration of 17 ppm. On addition of Aqui-S to the water there was no noticeable adverse reaction by the paua although the extension of the tentacles from the respiratory holes in the shell would indicate some awareness. (This compares with serotonin, which is also used as a marine anaesthetic, where the animals try to climb out of the tank when it is introduced to the water.) Animals that had been anaesthetised were eating 5 hours after exposure to Aqui-S.

Dosage	17ppm Aqui-S	
Temperature	9°C	
Reaction to Aqui-S	Awareness of substance but no apparent adverse reaction. i.e. Avoidance.	
Time to sedation	Juveniles	8 to 10 minutes
	Adults	13 to 20 minutes.
Time to anaesthesia	Juveniles	12 minutes
	Adults	30 minutes
Recovery	Appeared to be fully recovered by 5 to 10 minutes after removal from the anaesthetic.	

Sedation: The point at which the animal takes longer than 30 seconds to right itself after being placed on it's back.

Anaesthesia: The point at which the animal has released its hold on the substrate. At this stage the animal usually fails completely to right itself after being placed on it's back.

Paua (*Haliotis australis*)

Animals were tested under exactly the same conditions as *Haliotis iris*. Time to sedation, anaesthesia and recovery was much the same as for *Haliotis iris*. Once again the animals showed awareness of the addition of Aqui-S but did not appear to show an adverse reaction. *Haliotis australis* are noted for being particularly sensitive to adverse conditions escaping from the water at the first sign of unfavourable conditions.

Long Finned Eels (*Anguilla dieffenbachii*)

Methodology.

Five feral animals were placed into a bin containing water at 13°C. Aqui-S was added at a nominal concentration of 17 ppm and the water was gradually cooled to a final temperature of 4°C. The total exposure time was 7 hours. Eels showed no reaction to the addition of Aqui-S. In this trial the time to anaesthesia only was noted as it was difficult to determine a point which could be defined as anaesthesia.

Dosage	17ppm Aqui-S
Temperature	Initial temperature 13°C.

Green Shell Muscle (*Perna canaliculus*)

Methodology: Feral mussels were tested at the Seafood Research Laboratory, Nelson. Adult mussels were collected from a depth of 2 meters at low tide. They were then placed in a 70 litre bin and supplied with running sand filtered seawater. The animals were left for one week to acclimate.

Three parameters were used to determine the effect of Aqui-S on *Perna canaliculus*.

1. If the mussel clamped the shell shut on introduction of Aqui-S to the water this was taken as a sign of awareness of Aqui-S.
2. Relaxation to the extent that firm pressure on the shell could move it sideways was taken as a sign of sedation.
3. Relaxation of the adductor muscle to the extent that the shell could be prised open with the fingers was taken as a sign of anaesthetization.

Ten mussels were moved into a separate 70 litre bin and supplied with running filtered seawater. They were left undisturbed until the shell had opened. Aqui-S was then added at a nominal concentration of 17ppm (parts per million).

Dosage	17 ppm Aqui-S

Temperature	16°C

Sedation/Anaesthesia. Mussels did not appear to have any reaction to the introduction of Aqui-S. i.e. Did not clamp shells shut. After 21/2 hours a firm pressure on the shell of the mussel caused it to move sideways

approximately 2 mm. Mussel shells still needed to be opened with a knife. After 4 hours exposure to Aqui-S this reaction had not changed.

Recovery

Mussels were then placed in fresh running water and within 5 minutes the shell was unable to be moved by a firm sideways pressure.

General observations.

During the testing of the mussels observations were also carried out on the various other animals growing on the mussel shells. These included sponges, Anemones and Pacific oysters.

Anemones

Animals did not retract their tentacles when Aqui-S was introduced into the water. If a hand was placed near them in the water and they perceived danger the tentacles were retracted. This type of reaction did not appear to change at all over the course of the 4 hours exposure to Aqui-S. At no stage did it appear that voluntary control had been lost.

Sponges.

Very difficult to observe any effect on these animals. Only comment that can be made is that the sponges did not die. (Mussels were kept for a further 3 weeks before being returned to the environment.)

Pacific Oysters.

Pacific oysters after 4 hours exposure to Aqui-S were able to be opened by hand but once placed in fresh water full clamping ability of the abductor mussels appeared to be regained within 5 minutes.

Aqui-S Residue Water Monitoring Protocol

The following is the protocol for sampling water to monitor the residence time of Aqui-S in the water around the salmon farm. This protocol has been determined from the results of preliminary tests. The sample from inside the bag should be somewhere in the vicinity of 17 ppm and this will act as the control sample while the other two samples should give an indication to dilution factors and residence time. Samples will be taken from one harvest each week for a period of three months.

- 1) Water samples shall be taken at the end of a harvest.
- 2) Plastic water bottles shall be filled up to the rim and capped leaving as little airspace as possible. Samples should not be left out in the direct sunlight at any stage.
- 3) Three samples shall be taken at each time.
 - a) From inside the bag at the end of the harvest.
 - b) Just outside the bag on release of the water.
 - c) Outside the bag 20 minutes after the release of the water.
- 4) Samples shall be despatched by courier to:

Dr Noel Porter

Christchurch Science and Agriculture Research Centre

Crop and Food Research

1 Gerald Street

Lincoln
- 5) Water samples shall be frozen immediately on arrival until analysis takes place.
- 6) Analysis shall be conducted according to the "Analysis of Water Samples" schedule attached.

ANALYSIS OF WATER SAMPLES FOR iso-EUGENOL RESIDUES

METHOD

Extraction

- 1) Wash all glassware thoroughly, rinse 3 times with distilled water, dry and then rinse with freshly re-distilled di-ethyl ether.
- 2) Prepare duplicate samples and handle separately as follows.
- 3) Accurately measure 500 ml of a water sample into a 1 litre Schott bottle.
- 4) Add 5 μ g of methyl cinnamate solution and shake thoroughly and vigorously for 1 minute to disperse the ether and methyl cinnamate throughout the water sample.
- 5) Add 50 ml of ether to the Schott bottle and shake gently, releasing pressure, until no further pressure builds up.
- 6) Put both Schott bottles on a roller mixer and roll for 2 hours, releasing any pressure after the first 15 minutes.
- 7) Transfer each duplicate to a separating funnel and allow the water and ether phases to separate completely (15 minutes).
- 8) Run the water phase back into the same Schott bottle and add another 50 ml of ether.
- 9) Run the ether phase into a round bottom evaporating flask.
- 10) Repeat steps 6-9.
- 11) Bulk the 2 ether washes and reduce to 10 ml on the rotary evaporator.
- 12) Using a dimple bottom 10 ml evaporation flask, reduce the ether extract to less than 1 ml.
- 13) Make up to 1 ml using an SGE syringe with a dome tipped needle - take up the concentrate in the syringe and transfer it to an ether-rinsed vial, add more ether to rinse dropwise to the flask and take up each drop until you have the total volume - ether concentrate and rinse - in the vial.

Measurement

Measure methyl cinnamate and iso-eugenol peaks in 5 μ l samples of the ether extracts using the following GC operating conditions -

Column -	WCOT 25 m, 0.32 mm id, 25 μ m film, SE30 bonded phase
Carrier gas -	hydrogen, inlet pressure 0.5 kg/cm ² , splitless injection
Temperatures (°C) -	injection port 260, detector 300, column programmed from 80 to 260 at 4/min

Using standard solutions of 1 part per million, inject known amounts of iso-eugenol and methyl cinnamate and obtain separate conversion factors which relates peak area to weight of iso-eugenol and methyl cinnamate.

Calculate % recovery of cinnamate in the samples.

Calculate absolute weights of iso-eugenol recovered from the samples and then adjust by using the recovery rate of the cinnamate.

Final temperature 4°C

Time to anaesthesia 10 to 15 minutes.

Recovery 10 to 12 minutes

Anaesthesia: The point at which the eel lost equilibrium and turned over onto it's back.

No reaction to being handled.

Snapper (*Pagrus auratus*)

Methodology. Aqui-S trials were carried out on animals at the Seafood Research laboratory, Nelson. Animals had been provided by MAF.

600 fish had been raised in a plastic 4433L tank. Aqui-S was added at a nominal concentration of 12ppm. Fish were removed from the tank weighed and graded.

Recovery was rapid and fish were actively feeding within 3 hours.

Dosage 12 ppm Aqui-S

Temperature 18 °C

Time to sedation 20 to 30 minutes

Time to anaesthesia 40 to 50 minutes.

Recovery 10 to 20 minutes.

Sedation: The point at which equilibrium is lost.

Anaesthesia: The point at which there is no reaction from the snapper upon removal

from the water.

(This is for juvenile snapper weighing approximately 12 grams. Work is still in progress.)

Yellow Eyed Mullet (*Aldrichetta forsteri*)

Methodology: Feral mullet were tested at the Seafood Research Laboratory, Nelson.

Mullet had been kept in the laboratory in large pools for three years.

The pool was drained to a level of 500mm and Aqui-S was added at a nominal concentration of 17ppm. Fish displayed no awareness to the introduction of Aqui-S.

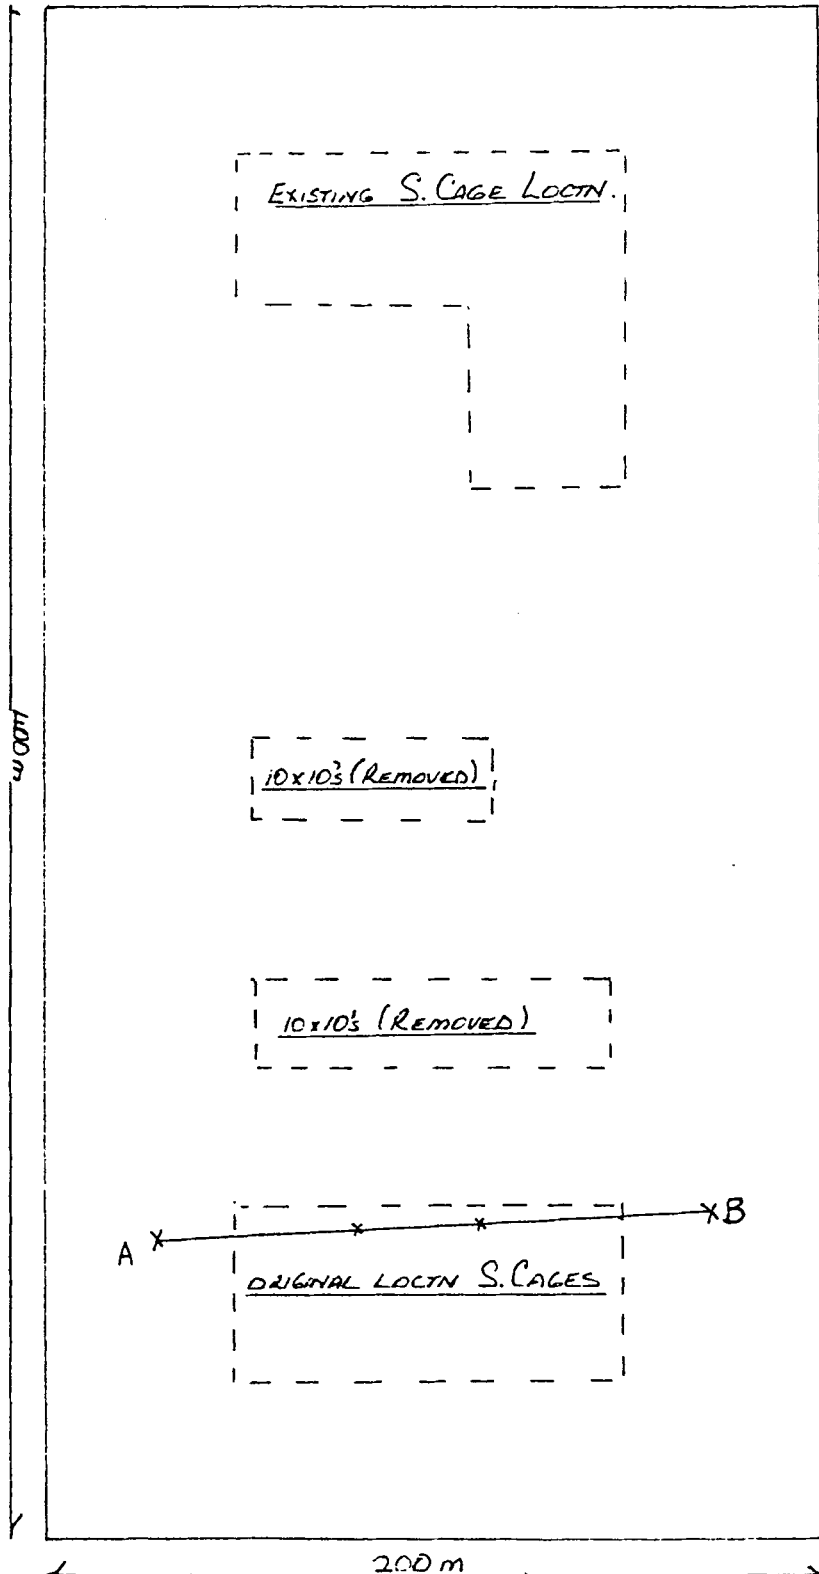

These fish had already been anaesthetized 3 times previously to this. Sedation time, anaesthesia time and time to recovery was the same in all cases. Fish were feeding 4 hours after anaesthesia.

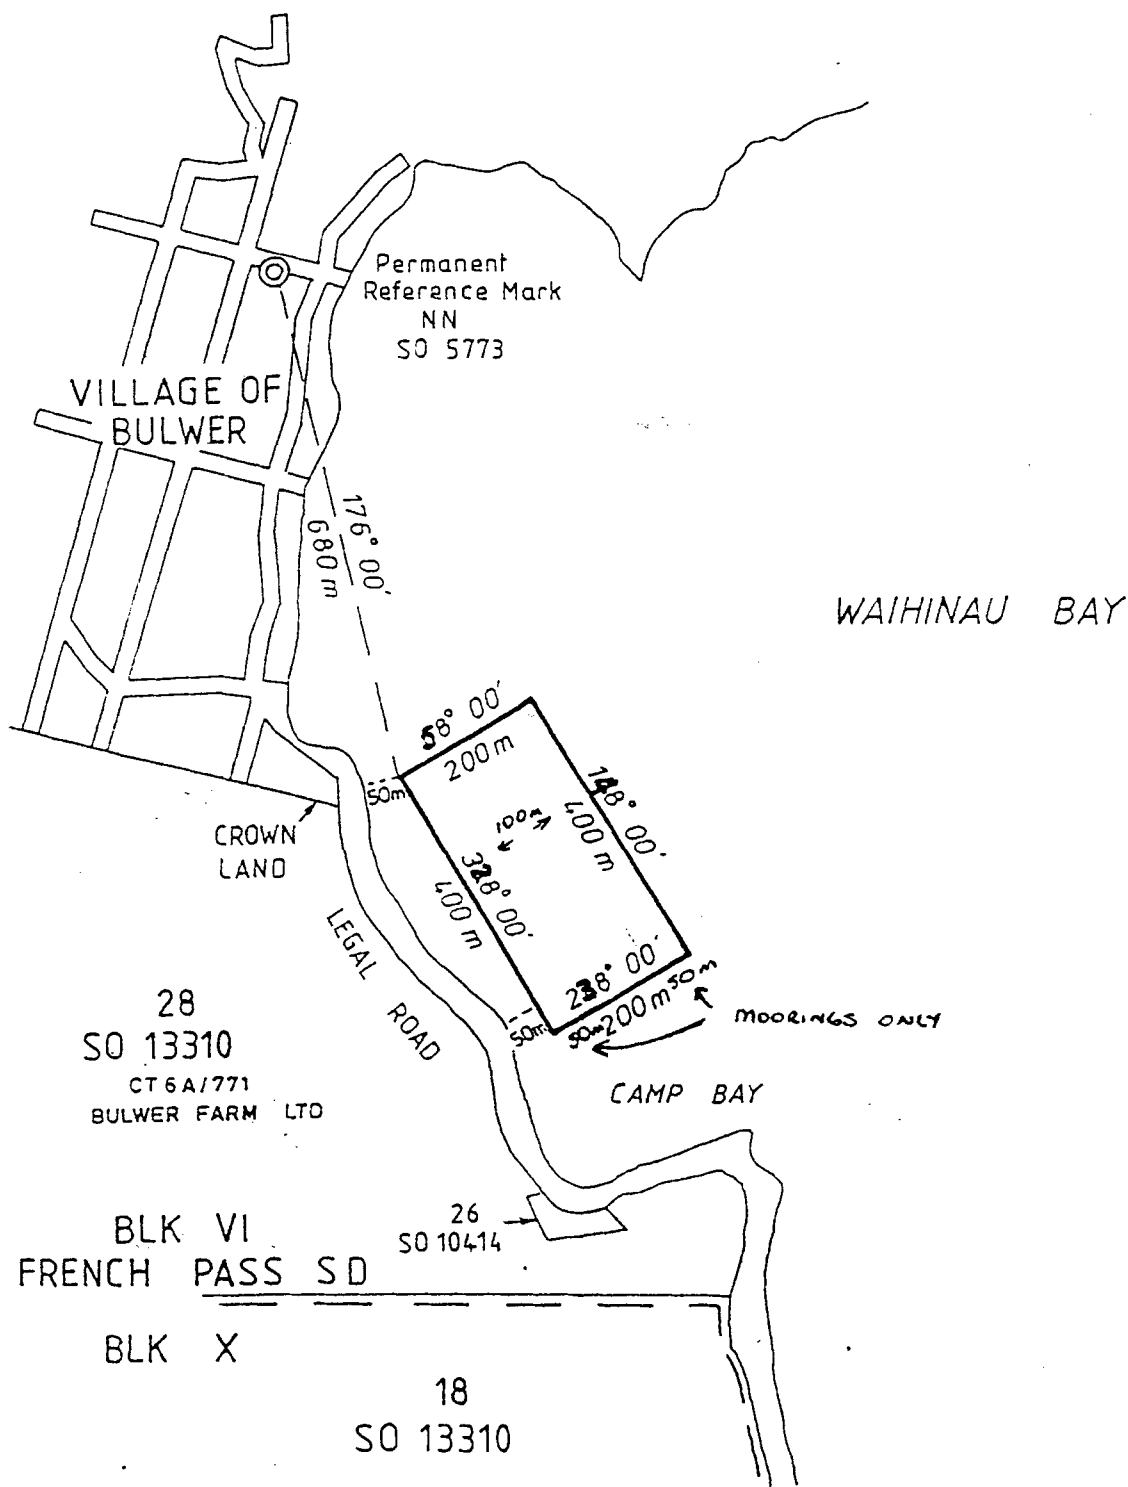

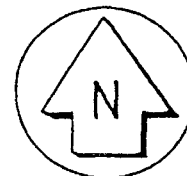

Dosage	17 ppm Aqui-S
Temperature	10° C
Time to sedation	9 to 10 minutes
Time to anaesthesia	14 to 15 minutes
Recovery	5 minutes.

Flounder (*Paralichthys lethostigma*) and spotty's (*Pseudolabrus celidotus*) in the same tank as the mullet appeared to respond in much the same manner within the same time frame. Spotty's that had been exposed for 5 hours recovered within 10 minutes.

**MEMORANDUM OF VARIATION OF LICENCE
PURSUANT TO THE MARINE FARMING ACT 1971**

BETWEEN

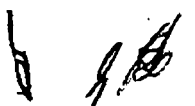

The Minister of Fisheries (hereinafter referred to as "the Licensor")

AND

SOUTHERN OCEAN SEAFOODS LIMITED (hereinafter referred to as "the Licensee")

WHEREAS

1. The Licensor, as the Controlling Authority under the Marine Farming Act 1971 (hereinafter referred to as "the Act") has issued Marine Farm Licence No. 239.
2. The Licensor and the Licensee agree to vary the said licence to permit the Licensee to farm CHINOOK SALMON (*Oncorhynchus tshawytscha*).
3. **THE PARTIES THEREFORE AGREE** to vary the conditions, covenants and agreements in the said licence, pursuant to Section 13 of the Act, in the following manner:
 - A. All stock which is to be held on the farm must come from a source authorised under the Fisheries Act 1983 or the Marine Farming Act 1971.

- B. The Licensee shall not transfer any live farm stock from the licensed area to any other waters without prior approval in writing of the Licensor, if previously notified of such a requirement.
- C. The Licensee shall not transfer any diseased farm stock to any farm or release into any waters any diseased farm stock kept at the licensed area.
- D. If the Licensee knows or suspects that any fish kept pursuant to this licence is or may be affected by any Category A disease specified as such from time to time by the Director-General by notice published pursuant to the Freshwater Fish Farming Regulations 1983 in the Gazette, or knows or suspects that any fish kept pursuant to this licence is or may be affected by any disease or condition the Licensee cannot identify, the Licensee shall, within 24 hours after the time when the Licensee discovers or first suspects the fish to be diseased, advise the Director-General or veterinarian or fish pathologist at the Ministry of Agriculture and Fisheries, and shall keep the fish diseased or suspected to be diseased from coming in contact with other fish.
- E. If the Licensee knows or suspects that any fish kept pursuant to this licence is or may be affected by any Category B disease specified as such from time to time by the Director-General by notice published pursuant to the Freshwater Fish Farming Regulations 1983 in the Gazette, and the fish do not respond to treatment within 14 days, advise the Director-General or veterinarian or fish bacteriologist at the

3

Ministry of Agriculture and Fisheries, and shall keep the fish diseased or suspected to be diseased from coming in contact with other fish.

F. Any Licensor may from time to time, by notice in writing to the Licensee:

- (i) require the Licensee to carry out such action for the prevention of disease among the stock on the farm as is specified in the notice;
- (ii) where the Licensor believes on reasonable grounds that any farmed stock on the marine farm is diseased, require the Licensee to carry out such action for the treatment of the disease and the decontamination of any nets, buoys or other structures as is required in the notice.

G. Where the Licensor believes on reasonable grounds that:

- (i) the fish is affected by any disease specified in a Category A notice; or
- (ii) the fish is affected by any disease specified in a Category B notice which cannot be treated effectively on the farm; or

4

- (iii) the fish is affected by any other disease of such a nature as to require his urgent action -

destroy any fish stocks affected, and may take steps as he considers necessary to decontaminate any nets, buoys, buoyed sea cages or other structures, or may, by notice in writing to the Licensee, require him to destroy those fish stocks and take such steps as are specified in the notice to decontaminate those structures.

- H. No compensation shall be payable in respect of any fish required to be destroyed by the Licensor pursuant to conditions (F) or (G) of this licence or pursuant to a notice given by the Licensor under conditions (F) or (G) of this licence.
- I. The Licensee shall not use any feed other than that occurring naturally in the area without prior approval in writing of the Licensor.
- J. The Licensee shall not use tributyl tin as an antifoulant agent on any equipment used or brought onto the licence site.
- K. Recordkeeping requirements.

5

For the farming of CHINOOK SALMON (*Oncorhynchus tshawytscha*)
the licensee shall comply with conditions contained in Schedule A.

THEREFORE, from the date of this agreement, the Marine Farm Licence Number 239 shall be varied to the extent outlined in Clauses 3(A) to 3(K) above and apart from the agreed variation, the present conditions, covenants and agreements shall continue to apply.

SCHEDULE A**MARINE FARMING LICENCE - RECORDKEEPING REQUIREMENTS****1. Manner and form in which records kept :**

- (a) Be kept in such manner and format that they can be readily retrieved and made available for examination
- (b) Be held at either
 - (i) The place of business of the licensee, or
 - (ii) Any other premises that are appropriate having regard to where the records are initially prepared
- (c) Be retained for a period of not less than 7 years after completion of the transactions or period to which they relate.

2. Retention of Records:

All records produced and/or available to the licensee that contribute to the audit trail of species farmed shall be retained.

3. Failure to keep Records:

Where the Director General considers that the licensee is or has not been completing or retaining the records in an appropriate manner -

- (a) The Director General may, by notice in writing, direct the licensee as to the manner in which the records are to be completed or retained; and
- (b) The licensee shall thereafter ensure that records completed or retained comply with that direction.

Failure to comply with such direction may be treated as a wilful breach of conditions of the licence.

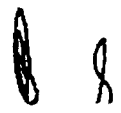

4. Inspection of Records

Any person who is required to keep or who has control of any records required to be kept shall, on request at any reasonable time by the Director-General, forthwith (and without charge) produce the records requested and make them available for inspection.

5. Additional Requirements

Where the Director-General considers it necessary, and after consultation with the licensee, the Director-General may require the licensee to keep such additional records as are appropriate.

COMMENTS: 94111549

Dear Wendy,

Further to our telephone conversations I wish to seek consent from the Council for SMF to occupy the Northern block of licence 239. This portion of the licence is currently un-utilised by Southern Ocean Seafoods who have granted us permission to remain until they require the site.

The lines in place are as per the original plan representing the North block so I would ask you use this as the site plan.

We envisage the arrangement to be for a year or so, but ultimately our presence is per favour of Southern Ocean Seafoods subject to them requiring the space.

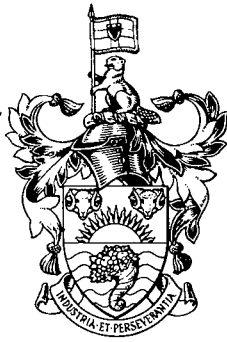

Trust this explains the situation.

Kind regards

Rob Pooley

ATTENTION: Mr Dave Paynter

Dear Sir

Marine Farm Licence 239 : Forsyth Bay

We refer to your fax message of 3 November 1994 regarding the light of the mussel line on the Marine Farm Licence 239 in Forsyth Bay.

You should be aware that the approval for this site is MDC 566 for three super cages, two utility cages and one service barge. There is in fact no approval for longlines on this site.

The site previously had approval MHB 367 for 20 longlines at 80 metres. If you provide an amended copy of that plan showing existing lines in relation to the cages, temporary consent may be provided for lines to remain on site. You should be aware that longlines must only be 80 metres long.

Your confirmation of the above would be appreciated.

Your fax message did not advise whether or not the loose rope has been removed from site. Your attention to this is requested.

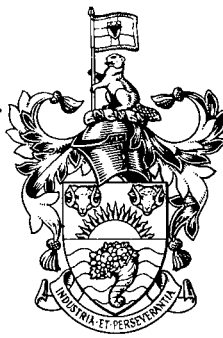

Yours faithfully

ATTENTION: Mr Dave Paynter

Dear Sir

Marine Farm Lights

I acknowledge receipt of your fax of 3 November regarding your checking of lights on the following licence areas:

447 Rai Marine Farms
79 McIntyre and Smith
239 Southern Marine Farms
243 Southern Marine Farms
212 Sanfords and Southern Marine Farms

We note your actions to check the lights as per the recent inspections by the Council contractor.

Occasionally the tester does not trigger when lights are in fact operating, however, very few incorrect light readings are given. For this, we apologise.

We acknowledge your efforts in checking the farms to ensure all lights are operating as per the required standard.

The site inspections were carried out as per the date on the contractors letter. For your information, Council has recently ordered a new tester which we hope will alleviate any problems of this kind in the future. If you have any further queries please do not hesitate contacting the Harbourmaster at the Picton Office, Phone (03) 573 7278.

Yours faithfully

Wendy.

Good-afternoon

I have just come back from rectifying the deficiencies on our farms as mentioned in the inspection reports. Please note.

L ^c 447	MHB No 520 - 2 lights not op.
L ^c 79	MHB No 161
<u>L^c 239</u>	<u>MHB No ?</u>
L ^c 243	MHB No 346
L ^c 212	MHB No 545
~~L^c 287~~	

I completed my farm and light checks, on the 4 October. Not it says that the inspector checked them on the 10th Oct and found deficiencies. I have since been back rectifying these and found them all to be as I left them. All going!!

It seems that the dates inspected maybe slightly out, it's just a shame we just spent 5 hours looking to find this out.

I have put a light on L^c 287 MHB No 393

Thanks for your time

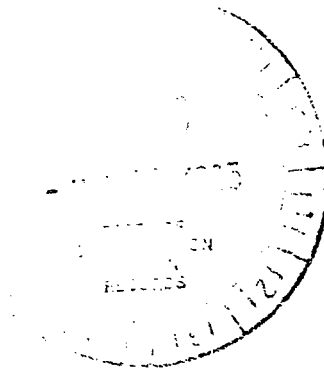

Kind regards

Dave Ryanto

Dear Helen

Re - Aquaculture Resource Consent Applications.

*Not attached: see your
aquaculture permit
applications*

Thank you for the feed back on these applications.

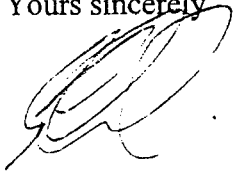

To address your concerns I have included copies of the Environmental Reports prepared by Cawthron for us and used recently in gaining resource consent approval to carry out salmon farming on MFL 239 and MFL 148, these are the same reports you would have seen copies of when we applied for and received from MAF variation of the licences to include salmon. I have also attached a plan of the licence area MFL 456 at Bulwer and have indicated on it the past and present location of the salmon cages.

I personally have dived many times under the original location at Bulwer and can confirm that the bottom (30m+) consisted of a layer of faecal material and bacterial matt with an anaerobic layer beneath as is normal under any salmon farm. Mussel shell debris was also evident. Our divers have also done many dives to the bottom under the existing location and confirm the same bottom condition. A dive on 30 Oct 1994 was carried out by myself and Barrie Forrest of Cawthron along transect marked A to B on the attached plan and bottom samples taken that indicate a moderate enrichment with organic matter still present after approximately 6mths of fallowing. It was obvious to me that this site will recover and be able to be re-farmed in the not too distant future. The depth of this layer was approximately 150mm - 200mm. A control site dived approximately 100m from the boundary of the licence and marked E on the plan showed a featureless bottom with very little macro fauna visible apart from low numbers of scallops.

I have had discussion with Crop and Food Research and have agreed with them to collaboratively organise and implement a water monitoring program once we start using AQUI-S.

With the above information added to that which you are already in receipt of from both ourselves and Crop and Food Research, I trust you are now in a position to be able to confirm acceptance of our resource consent applications with Marlborough District Council.

Yours sincerely

Dear Sir,

Marine Farm Inspection Report - Licence No. 239

An inspection of your marine farm located at Forsyth Bay
was made on 11 October 1994.

Structures in the area : 4 long lines and 1 supercage

Approved plans MDC ... for 5 salmon cages and 1 barge

Overall condition of farm - requires attention as below

The following deficiencies were noted :

1. One light not operating on mussel line.
2. There is a loose rope floating which requires urgent attention. x

You are required to complete the above upgrading or repairs by
17 November 1994, and confirm such action to Mrs Steele at the
Marlborough District Council (phone (03) 578 5249 exten 8463)
accordingly.

Yours faithfully,

Ask For: Jenny McAvinue

18 August 1994

Southern Ocean Seafoods Limited
P O Box 1180
NELSON

ATTENTION: Mark Gillard

Dear Sirs

**Approval of Application for Resource Consent Pursuant to
Section 88 of the Resource Management Act 1991 - Coastal Permit
(Discharge to Seawater)**

APPLICANT: Southern Ocean Seafoods Ltd

SITE OF APPLICATION: Forsyth Bay, Pelorus Sound

DATE OF APPLICATION: 13 June 1994

PROPOSAL: The enable discharge of greywater from an accommodation barge servicing the applicant's salmon farm at Forsyth Bay. Greywater discharge includes shower, dishwashing, food preparation and cooking water. It does not include human sewage.

DECISION:

That pursuant to Section 105 of the Resource Management Act 1991, after considering application U940328 for a Resource Consent, the Marlborough District Council grants consent for this activity, subject to the following conditions :

- (a) That the amount of greywater discharged is not to exceed 300 litres per day at a maximum rate of 10 litres per minute.
- (b) That no sewage will be disposed of into the coastal marine area.
- (c) That a log will be kept of all sewage taken from the barge to be disposed of in the Nelson sewerage system. This log shall be made available to the Marlborough District Council upon request.
- (d) Expiry Date
This consent expires on 31 August 2004.
- (e) That the entrance to all greywater plumbing shall be screened to prevent solids greater than 5 millimetres diameter from entering the pipe.

- (f) That the discharge shall not result in the production of any conspicuous films, scum, foams, floatables or suspended material and; shall not alter the colour or clarity of the receiving waters to a conspicuous extent and shall not cause the emission of any objectionable odour.
- (g) That greywater will be discharged within the boundaries of Marine Farm Licence 239 and within 3.0 metres of the seabed. The discharge shall be via a pipe of 50 millimetre diameter or greater ending with a diffuser.
- (h) That pursuant to Section 128 of the Resource Management Act 1991 the Council may review the conditions of this consent annually to ensure that the activity is not having significant adverse effects on aquatic life in the area; is not producing any conspicuous films, scum, foams, floatables or suspended material; is not altering the colour or clarity of the receiving waters to any conspicuous extent; or is not creating any objectionable odour.

GROUND:

The grounds for the decision were that:

- 1. The proposal is in keeping with the NZ Coastal Policy Statement, the proposed Marlborough Regional Policy Statement and the proposed Marlborough Sounds Maritime Planning Scheme.
- 2. The applicant is undertaking the best practicable options for the disposal of wastes and there will be no discharge of toilet waste.
- 3. The applicant has attempted to avoid remedy and mitigate effects on the environment by :
 - (i) not disposing of toilet wastes and ;
 - (ii) by treating the greywater discharge via screening and cooling by using pipe of appropriate diameter and length.
- 4. The proposal is not envisaged to have an adverse effect on the safe cultivation, gathering and consumption of seafood in the area.

FOOTNOTE

It may be necessary to install a removable trap to allow floating material to be cleaned from the plumbing.

Please note that the foregoing is the full text of the decision.

Your status as an applicant/person making a submission provides you with certain legal rights with regard to the Council's decision.

For your general guidance, Sections 120, 127 and 357 of the Resource Management Act 1991 provides rights with respect to:

- 1. **Appeal. (S120)**
- 2. **Application for change or cancellation of consent conditions. (S127) (applicant(s) only)**
- 3. **Objection to certain decisions and requirements of consent authorities. (S357) (applicant(s) only)**

Section 127 Involves making an **application** direct to the Council.

Section 357 Requires that an **objection** be lodged with the Council within 15 working days of your receipt of the Council's formal decision.

Section 120 Concerning **appeal**, requires that a "Notice of Appeal" be lodged with the Registrar of the Planning Tribunal and with the Council within 15 working days of your receipt (or receipt by the person who filed the application on your behalf) of the Council's formal decision.

The address of the Planning Tribunal is P.O. Box 5027, Lambton Quay, Wellington. An appeal must be lodged on Form 7 prescribed by the Resource Management (Forms) Regulations 1991 and must be accompanied by a filing fee of \$55.00 (GST inclusive) as specified in those Regulations under Part VI, Section 28, Sub-section (3). A copy of the above Regulations may be purchased from the Government Printing Office.

You should note that a resource consent lapses on the expiry of **two years** after the date of commencement of that consent, unless the consent is given effect to, or after the expiry of such shorter/longer period as is expressly provided for in the consent. Section 125 of the Resource Management Act 1991 details matters of consent time extension.

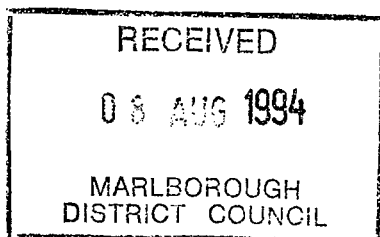

If you are intending to exercise your legal rights regarding the Council's decision and you are in any doubt how to proceed, it is strongly recommended that you consult with your Agent/Lawyer.

Yours faithfully,

A.P. QUIRK,
DISTRICT SECRETARY.

28 June 1994

Southern Ocean Seafoods Limited
P O Box 1180
NELSON

Dear Sir

Application for Structures Approval Under Section 178 of the Harbours Act 1950

APPLICANT: Southern Ocean Seafoods Ltd

SITE OF APPLICATION: Forsyth Bay, Pelorus Sound

DATE OF APPLICATION: 13 June 1994

PROPOSAL: To establish Salmon farming structures on Marine Farm Licence 239 in Forsyth Bay, Pelorus Sound - approval for marine farming structures.

DECISION:

That pursuant to Section 178 of the Harbours Act 1950, the Marlborough District Council approves consent for the proposed structures on Marine Farm Licence 239, as per the attached plan, and conditions.

GROUND:

The grounds for the decision were that the proposal would not unduly interfere with or restrict any public right of navigation.

Please note that the foregoing is the full text of the decision.

Your status as an applicant/person making a submission provides you with certain legal rights with regard to the Council's decision.

For your general guidance, Sections 120, 127 and 357 of the Resource Management Act 1991 provides rights with respect to:

1. **Appeal. (S120)**
2. **Application for change or cancellation of consent conditions. (S127) (applicant(s) only)**

**3. Objection to certain decisions and requirements of consent authorities. (S357)
(applicant(s) only)**

Section 127 Involves making an **application** direct to the Council.

Section 357 Requires that an **objection** be lodged with the Council within 15 working days of your receipt of the Council's formal decision.

Section 120 Concerning **appeal**, requires that a "Notice of Appeal" be lodged with the Registrar of the Planning Tribunal and with the Council within 15 working days of your receipt (or receipt by the person who filed the application on your behalf) of the Council's formal decision.

The address of the Planning Tribunal is P.O. Box 5027, Lambton Quay, Wellington. An appeal must be lodged on Form 7 prescribed by the Resource Management (Forms) Regulations 1991 and must be accompanied by a filing fee of \$55.00 (GST inclusive) as specified in those Regulations under Part VI, Section 28, Sub-section (3). A copy of the above Regulations may be purchased from the Government Printing Office.

You should note that a resource consent lapses on the expiry of **two years** after the date of commencement of that consent, unless the consent is given effect to, or after the expiry of such shorter/longer period as is expressly provided for in the consent. Section 125 of the Resource Management Act 1991 details matters of consent time extension.

If you are intending to exercise your legal rights regarding the Council's decision and you are in any doubt how to proceed, it is strongly recommended that you consult with your Agent/Lawyer.

Yours faithfully,

A.P. QUIRK,
DISTRICT SECRETARY.

Floating Storage Platform
Southern Ocean Seafoods

Dear Sir,

The platform as detailed on your drawings 816-01 and 02, (being of mild steel construction 20 meters x 10.5 meters) has been designed for the following conditions.

- 1 Moored in Marlborough Sounds
- 2 Accommodation area of 70 square meters

Deck is designed for a concentrated load of 2.7 kN and a distributed load of 3kPa.

- 3 Storage area of 140 square meters.

Deck is designed to carry the loads imposed by a 4 ton fork lift with a load of 2 ton. and a distributed load of 13.6 kPa.

I am satisfied the platform is suitable for the intended duty.

Yours Faithfully,

D. R. Langston 3/10/83

Salmon Pens for
Southern Ocean Seafoods

Dear Sir,

I have studied the drawings 811-01 to 811-50 supplied.

I believe the Pen design and detailing is such that the pens are suitable for their intended purpose.

The Walkway/Bridge as detailed by drawings 811-15-10, 26-20, 20-20 meet the requirements of N.Z.S.4203 and 3404 I'm informed these are pens 5,6, and 7.

The Walkway/Bridge as detailed on drawings 811-15-00, 20-10, 26-10 are satisfactory for a distributed load equivalent to 35 people. These are over pens 3 and 4.

Yours Faithfully,

A handwritten signature in cursive script that reads 'D.R. Langston'.

Application for Structures Approval : Non-Notified Delegated Council Commissioner

FILE NO: MFL239 (MDC 566)

APPLICANT: Southern Ocean Seafoods Ltd

SITE OF APPLICATION: Forsyth Bay, Pelorus Sound

DATE OF APPLICATION: 13 June 1994

PROPOSAL: To establish Salmon farming structures on Marine Farm Licence 239 in Forsyth Bay, Pelorus Sound - approval for marine farming structures.

APPLICATION: Structures approval under the Section 178 of the Harbours Act 1950.

1. Explanation

- 1.1 Previously Council has been actioning applications for longline approvals under the Resource Management Act. It would appear that these applications are in effect covered by the Harbours Act Section 178(b). Refer Section 426 of the Resource Management Act 1991.

2. Statutory Framework

- 2.1 This application is for structures approval under the Harbours Act 1950, and the Resource Management Act 1991 does not apply. Section 178 of the Harbours Act requires applicants to obtain approval from the Harbour Board for the placement of structures in the coastal marine area. The Resource Management Act repealed the Harbours Act, however, the Harbours Act functions still apply to marine farms granted under the Marine Farming Act 1971.
- 2.2 The licensee wish to establish 3 super cages, 2 utility cages and 1 service barge on the licence for the purpose of cultivating and harvesting salmon as approved for this licence by the Minister of Agriculture and Fisheries on 30 March 1994, and as indicated by the attached plans.
- 2.3 On the application form, the applicant states "To install on Licence 239 Three 42 x 42 cage units and 1 feed accommodation barge to enable rearing of chinook salmon. Initial location of these structures as indicated per MDC file Ref U940328. Two utility cages each 10 x 10 metres will be moored to the larger structures. The equipment is the same as that currently being used by the same Company on Marine Farm Licence 456 at Bulwer and Marine Farm Licence 148 in Port Ligar. Rotational siting of the cages within the licence area is required for environmentally sound and long term use of the area. Reports by Cawthron Institute and Tonkin and Taylor have been submitted as per File Ref U940328."

3. Submissions

- 3.1 Ministry of Transport, Department of Conservation, and Ministry of Agriculture and Fisheries will be advised of the approval once processed and approved.

4. Evaluation

- 4.1 The licensee previously had approval MHB 367 for 20 longlines for the cultivation of mussels on this site. These structures are being removed with the proposal to use the site for the salmon rearing. A separate application to the Council for resource consent for discharge of water is being processed.
- 4.2 Such structures to be in accordance with the accepted practice throughout the Sounds.

5. RECOMMENDED

That pursuant to Section 178 of the Harbours Act 1950, the Marlborough District Council approves consent for the proposed structures on Marine Farm Licence 239, as per the attached plan, and conditions as set by Page 1 of the approval.

6. Grounds

The grounds for this recommendation is that the proposal will not unduly interfere with or restrict any public right of navigation.

4. DESCRIPTION

A description of the activity to which this application relates is :

To instal on MFL239 3 x 42m x 42m cage units and 1 x Feed/Accommodation Barge to enable rearing of chinook salmon. Initial location of these structures is indicated as per MDC File ref 4940328. 2 Utility cages each 10m x 10m will be moored to the larger structures. The equipment is the same as that currently being used by the same Company on MFL 456 at Bulwer and MFL 148 in Port Ligar. Rotational siting of the cages within the licence area is required for environmentally sound and longterm use of the area. Reports by Cawthron Institute and Tonkin and Taylor have been submitted as per file ref 4940328.

5. EFFECTS ON THE ENVIRONMENT

I attach an assessment of any effects that the proposed activity may have on the environment in accordance with Section 88 of, and the Fourth Schedule to, the Act.

6. OTHER INFORMATION

I attach other information (if any), required to be included in the application by the District or Regional Plan or Regulations.

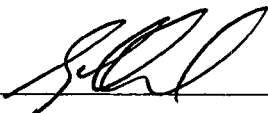

7. SUBDIVISION CONSENT APPLICATION

(Where the application is for a subdivision consent) I attach information in accordance with Section 219 of the Act sufficient to adequately define :

- (a) The position of all new boundaries:
- (b) The areas of all new allotments (not required for cross-leases, company leases, or unit plans):
- (c) The location and areas of new reserves to be created, including any esplanade reserves to be set aside on a survey plan under Section 230 of the Act:
- (d) The location and areas of any esplanade strips to be created under Section 232 of the Act:
- (e) The location and areas of any existing esplanade reserves, esplanade strips, or access strips:
- (f) The location and areas of land below mean high water springs of the sea or of any part of the bed of a river or lake which is to be vested in the Crown or location authority under Section 237A of the Act:
- (g) The location and areas of land to be set aside as new road.

8. COASTAL PERMIT (RECLAMATION) APPLICATION

I attach information in accordance with Section 88(7) of the Act to show the area proposed to be reclaimed, including its size and location, and the portion of that area (if any) to be set apart as an esplanade reserve.

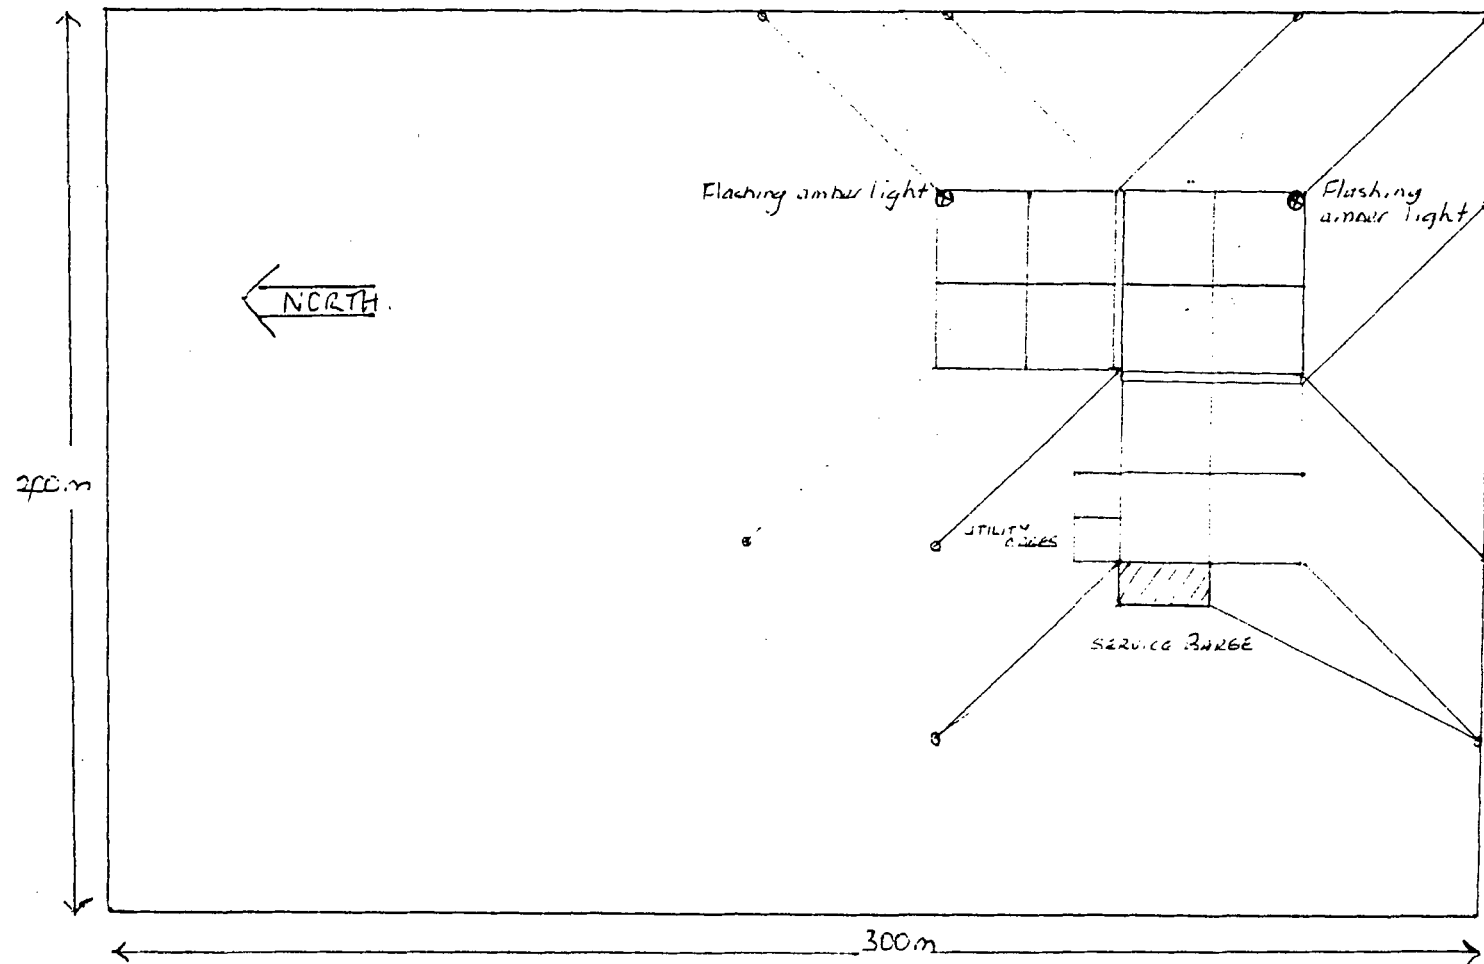

Signature of applicant or person
authorised to sign on behalf of applicant.

Dear Sir,

Marine Farm Inspection Report - Licence No. 239

An inspection of your marine farm located at Forsyth Bay was made on 29 May 1994.

Structures in the area : 10 long lines

Approved plans M.H.B. No 367 for 20 long lines @ 80m

Overall condition of farm - good

The following deficiencies were noted :

1. One light not operating.
2. Orange buoy required at centre of inner south line.

You are required to complete the above upgrading or repairs by 6 July 1994, and confirm such action to Mrs Steele at the Marlborough District Council (phone (03) 578 5249 exten 8463) accordingly.

Yours faithfully,

Bonnington/Roach

7 April 1994

The Manager
Port Marlborough
PO Box 84
PICTON

Dear Sir

Please find attached a copy of a notice in the Marlborough Express and Nelson Evening Mail appearing on the 11 April and 18 April 1994.

Yours sincerely

M Gillard
AQUACULTURE MANAGER

7 April 1994

We, Southern Ocean Seafoods Limited having our address for service C/- 10-18 Bullen Street, Nelson, hereby give notice that as holders of Marine Farming Licence Number 239, situated in Forsyth Bay, Pelorous Sound, we have applied for consent to include Chinook Salmon (*Oncorhynchus tshawytscha*) within the above marine farming area.

The area comprises 6.0 hectares and is presently utilised for the farming of Mussel (*Perna canaliculus*).

The proposed method of farming will be to rear Salmon in seacages through to harvest. Rearing will be in nylon nets suspended from three steel pipe structures each approximately 42 m square. As with the Salmon farm at Bulwer a service barge will be moored alongside.

A plan of the licensed area may be seen at the offices of MAF Fisheries, Vickerman Street, Nelson, from the applicants at the above address or at the offices of Port Marlborough New Zealand Limited, Havelock.

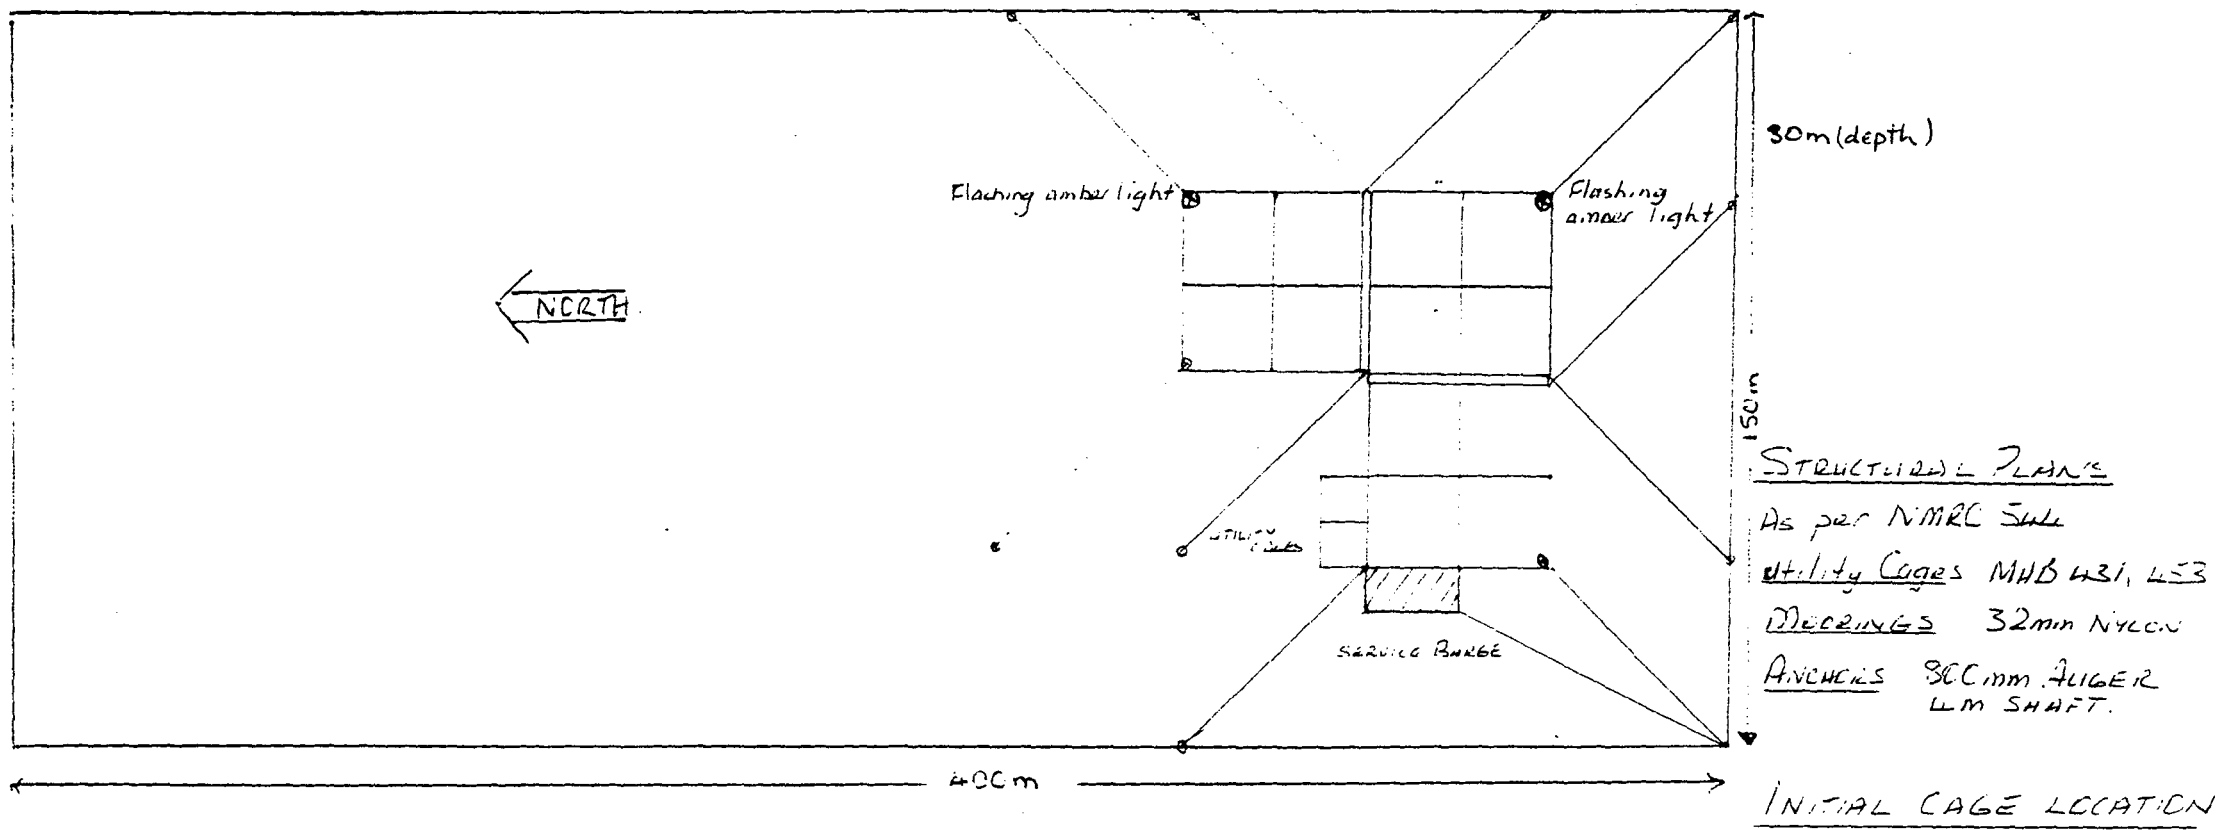

Any person desiring to object to this application should do so within two months after the date of the first publication of this notice to the Director-General, C/- Administration Officer (Aquaculture), MAF Fisheries, Private Bag 14, Nelson, and serve a copy on the said applicants at the above address. The objection must state fully the grounds on which the objection is made.

This is the first publication of this notice dated 11 April 1994

or

This is the second publication of this notice, the first being 18 April 1994.

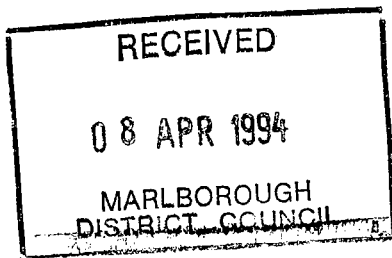

Signed: M J Gillard, Manager

APPLICATION TO INCLUDE FURTHER SPECIES IN
A MARINE FARMING LEASE OR LICENCE

I/We SOUTHERN OCEAN SEAFOODS LTD
(Full names)

11-18 BULLEN ST NELSON
(Residential address)

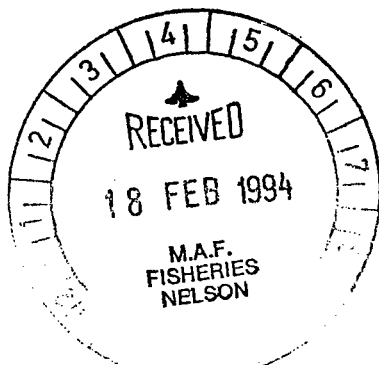

being the holders of Marine Farming LICENCE No 239
(lease/licence)

hereby make application to include CHINOOK SALMON within the AND PAUA (H. AURIS, H. AUSTRALIS, H. VIRGINIA)
above marine farming area.

The existing licence is situated in FORSYTH BAY
(Bay)

A mortgage is/is not registered against the licence.
(delete which is not applicable)

Describe method of seeding or laying young spawn, and cultivation. Indicate the number and size of rafts, enclosures, cages, racks or other structures to be used, and the material to be used for building them.

The method of farming and structures intended to be used as follows:

Chinook salmon will be reared
in nylon net pens suspended within
a floating steel structure. Each structure
is 40m x 40m and contains 4 x 20m
square net pens. 3 of these structures
will be on site. A feed/accommodation
barge will be moored alongside
to service the farm unit.
PAUA WILL BE REARED WITH
CAGE STRUCTURES APPROX 1m x 1m
CONTAINING SUBSTATE PLATES.

Describe briefly the development to be achieved each year, the anticipated annual investment, how it is to be financed, harvesting and marketing arrangements

Development of the farm over the first five years will be in the following stages:

Yr 1. 1994 - one 40m x 40m
unit with feed/accommodation
barge alongside (\$600,000 approx)
Yr 2. 1995 - two further 40m x 40m
units (\$600,000 approx.)

State source of supply of smolt, spat, or fry (as applicable)

Harvesting and marketing "in house"
Finance from within operating
revenues of Salmonid Smolt Biotab.
PAUA REARING IS EXPECTED TO BE
PILOT SCALE FOR THE FIRST 2-3 YEARS
PRODUCING UP TO 50 TONNE AFTER 3 YEARS
SMOLT SUPPLY EX OUR OWN

Describe fully food type/s to be used, together with source of manufacture (if applicable)

HATCHERIES @ TAKAKA AND BLENHEIM.
PAUA WILL BE FROM RAINBOW
ABALONE NEW PLYMOUTH

Food type DRY COMPRESSED

FISHMEAL BASED PELLETS FOR
SALMON. EXTRUDED FEED FOR PAUA.

Attach evidence from bank, accountant or solicitor that specified sum is available

Funds available to be invested in the venture:

Dear Sir.

Marine Farm Inspection Report - Licence No. 239

An inspection of your marine farm located at Forsyth Bay
was made on 1 March 1994.

Structures in the area : 10 long lines

Approved plans M.H.B. No 367 for 20 long lines @ 80m

Overall condition of farm - good

The following deficiencies were noted :

1. One light not operating.
2. Orange buoy required at centre of inner south line.

It was noted that one line has been removed since the last inspection.

You are required to complete the above upgrading or repairs by 11 April 1994. and confirm such action to Mrs Steele at the Marlborough District Council (phone (03) 578 5249 exten 8463) accordingly.

Yours faithfully.

Memo To: Tony Quirk

Copy To: Neil Morris, Dave Olliver

From: Fenwick Snowdon

Subject: Southern Ocean Seafoods - Variation of Species on Existing Marine Farming Licences

Please find attached a copy of a legal opinion dated 8 July 1993 regarding the above subject. As far as I am aware this issue is still very much unresolved. The attached legal opinion suggests that the Minister of Fisheries may not have legal jurisdiction to extend marine farming licences or to vary the species attached to them. I understand this is contrary to the views of MAF (Fisheries), MAF (Policy), and even the Department of Conservation. These organisations have their own legal opinions which are unavailable to us.

Late last year Southern Ocean Seafoods Ltd obtained a variation of species to an existing licence, located in Port Ligar. The variation was to include salmon farming. The applicant required a structure approval from the Marlborough District Council under Section 178 of the Harbours Act and a discharge permit under the Resource Management Act for the discharge of grey water from the accommodation barge. These were duly granted and I understand the salmon farm is already in existence.

If, however, the Minister of Fisheries has no right to grant variations to licences (which is what our legal opinion suggests), then we have a major problem.

Conversely, if the Minister of Fisheries does have jurisdiction there could still be additional resource consents required. I understand that the Southland Regional Council believes that further coastal permits are required for these types of variations such as a coastal permit to deposit feed into the water and a coastal permit to discharge contaminants into the water. There may be other coastal permits (in the form of feed and faeces drop) which are necessary.

If this was the case then the procedure we adopted for the previous variation was wrong as Council has allowed Southern Ocean Seafoods Ltd to establish a marine farm without requiring these consents. There are major problems, however, if resource consents should have been required as any member of the public could take issue with our procedures.

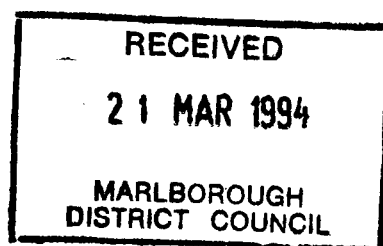

I enclose a second application by Southern Ocean Seafoods Ltd to vary another licence in Forsyth Bay. The proposed site is in a more delicate position and could have major impacts on the nature character of the area, existing recreational patterns, and perhaps other factors. I believe that you should forward this application along with this memo to our solicitors for further comment as this issue must be resolved in the very near future.

I consider this of major importance.

Dear Sir/Madam

Marine Farm Inspection Reports :

Licence 283 - Anakoha Bay

Licence 239 - Forsyth Bay

Licence 251 - Anakoha Bay

Licence 66 - Forsyth Bay

Licence 213 - Forsyth Bay

We refer to our letters of 16 June 1992 to which no reply has been received.

Since our last letter, various organisational changes have been made. The Nelson-Marlborough Regional Council was abolished on 30 June 1992, and all functions are now carried out by the Marlborough District Council.

For your information, I am still carrying out the functions and duties relating to the marine farming industry. I remain in the Parker Street office, and my contact phone number is Blenheim (03) 578 5249.

Please confirm whether or not the deficiencies as advised in our previous letters have been corrected.

Yours faithfully

Dear Mr Pooley

MARINE FARM LIGHTING - LICENCE 239

We wish to advise that previous functions of the Marlborough Harbour Board are now administered by this office.

Thank you for your Fax message of 19 April 1991, requesting reduction in Marine Farm lights.

I advise that approval is hereby granted for the placing of navigation lights at each end of the outer most long line only in Marine Farm Licence No 239, in Forsyth Bay, Pelorus Sound. Accordingly, lights on the inshore long line will not be required.

With the reduced number of lights on the farm it will be necessary for you to exercise greater vigilance to ensure the remaining lights are operating at all times. In the event that lights are found to be not operating when inspections are carried out in the future, this concession may be withdrawn.

Yours faithfully

Dear Wendy,

Thankyou your letter of 16-4-91.
As usual we are experiencing problems with the
lights and some have been removed for servicing.

Thankyou for the prompt and accordingly on
behalf of Southern Mussel Farms may I apply
for a reduction to a total of two on
licence 239 - Tawhiti Bay to be placed as
per your instructions.

Sincerely Rob Pooley

Dear Sir

MARINE FARM LICENCES - SOUTHERN MUSSEL FARM LTD

We wish to advise that previous functions of the Marlborough Harbour Board are now administered by this office.

We refer to Marine Farm Licences 66, 213 and 239, all located in Forsyth Bay and in the name of Southern Mussel Farm Ltd.

Our inspection reports of 13 March advising of deficiencies on all three sites have not been replied.

Licence 66 required the two lights be corrected as neither were operating. Licence 213 stated four lights required, one on outer line, two on inner line not working and one light on outer line not currently fitted. Licence 239 reported three lights fitted, one fitted to inner line but not operating. This licence currently has a light extension to show only three lights. Upon your written application this may be further reduced therefore requiring only two lights to be fitted.

Your early reply regarding the upgrading of such deficiencies would be appreciated.

Yours faithfully

Wendy Could I please apply for lighting dispensation, reducing to two, the following farms.
23, A, B, C, D, E.

Wish to advise have increased LC 239
North Block TO 4
South Block TO 3

As of tomorrow intend to increase both blocks to seven.

Also intend increasing South Block of LC 251 to 5.

Still brooding over 213, and its extra line will probably remove it.

KIND REGARDS
Rob

P.S. Have installed & sunk one spot line in Gannet Bay. Floats brand NZ FARE EAST LC 196 light Bouys on order.

Dear Sir,

Marine Farm Licence No. 239 - Forsyth Bay

For several months the Board has been in contact with Mr Rob Pooley regarding the anchor system for the licence.

To date we have not been advised whether work to relocate the anchor inside the licence area has been completed.

Board is considering referring the matter to the Ministry of Agriculture and Fisheries for cancellation of the licence due to structures being outside the licence area.

Such action at this time would appear unwarranted, accordingly, your early confirmation of progress would be appreciated.

Yours faithfully,

W. Steele (Mrs)

Dear Mr Pooley,

Marine Farm Lighting

Thank you for your note of 22 May 1989, requesting a reduction of marine farm lights.

I advise that approval is hereby granted for placing the navigation lights at each end of the outer most long line and southern end of the inshore long line only in marine farm licence No. 239 in Forsyth Bay, Pelorus Sound. Accordingly, the light at the northern end of the inshore long line will not be necessary.

With the reduced number of lights on the farm it will be necessary for you to exercise greater vigilance to ensure that the remaining lights are operating at all times.

In the event that lights are found to be not operating when inspections are carried out in the future, this concession may be withdrawn.

Yours faithfully,

FILE COMMENT SHEET

Date Jan 2-89 File Reference 1-0739

Initiated By Jim WS

To Be Actioned/Noted By ~~Jim~~ GDM DJ

COMMENTS/INSTRUCTIONS/FILE NOTE:

While visiting Forsythe Bay, recently
to inspect moorings for floats,
I noticed the mooring line
for Lic. 239 to be just below
the water surface.

The anchor was visible at 20-24 m
below the water. The mooring
line to it was obviously dangerous
for a vessel to the surface.

WS
Disms with kept note
& and appropriate letter to Bureau.
DJ 28/2/89

Wendy/ happy later will inspect
checked. This white guy's anchor rope
runs a little and think it is in near
position as the anchor?

Dear Sir,

Marine Farm Licence No. 239 - Forsyth Bay

We refer to our letter of 1 March 1989, regarding a possible navigational hazard in relation to the above licence.

To date we have not received any response from you regarding this serious matter.

Your urgent attention to confirm the relocation of the anchor and mooring line is requested.

If no response is received, the Board may request the Ministry of Agriculture and Fisheries to cancel your marine farming licence under clause (i) of the licence.

Such action would appear extreme, accordingly your urgent reply is requested.

Yours faithfully,

W. Steele (Mrs)

Dear Sir,

Marine Farm Licence No. 239

During a recent inspection of mussel farms in Forsyth Bay it was noted that the inshore northern mooring line for this licence was just below the water surface.

The anchor was clearly visible on the seabed approximately 20-24m offshore at low water.

The mooring line was extremely dangerous being so close to the surface.

This matter was raised with the previous licensee in 1985, when a complaint had been received regarding the placement of this mooring.

Urgent action should be taken to relocate this line to ensuring the mooring is placed within the licence area.

For your information we enclose a copy of our earlier letter.

We look forward to your early reply confirming the relocation of this line.

Yours faithfully,

W. Steele (Mrs)
Licensing Officer

c.c. Mr R Pooley

Dear Sir,

MARINE FARMING - INSPECTION REPORT - LICENCE No 239

An inspection of your marine farm located in Forsyth Bay was made on 17 January 1989.

Structures in the area : 3 long lines

Approved plans M.H.B.No 367 for 10 long lines

Overall condition of farm - good

The following deficiencies were noted :

1. There is no dispensation applied for or approved for this site. Currently there are no navigation lights fitted. With three lights on site - five lights are required. On your written request a dispensation will be considered.

You are hereby required to make good the above deficiencies immediately.

Please advise this Office when the requirements have been met.

Yours faithfully,

W. Steele (Mrs)

Dear Mrs Fisher

MARINE FARM LICENCE NO.239 - FORSYTH BAY

A complaint has been received that the inshore longline on the above licensed area is far too close to the shore and at one end presents a hazard to small craft. I understand that the anchor is laid very close to the low water mark, and at low tide the anchor line constitutes a significant hazard.

Please arrange to check the position of your inshore longline to ensure that it is located within the licence area. If necessary you should arrange to remove the longline from its present location and re-lay it in another position on the farm.

I look forward to receiving your co-operation in this matter.

Dear ~~Sir~~, Mrs Fisher,

Marine Farming Longlines Plan

I am pleased to advise that the plans submitted by you in respect of a longline to be used for Marine Farming in Forsyth Bay have been approved pursuant to section 178 of the Harbours Act 1950.

The approval of the plans is subject to the conditions attached thereto (sheet 1).

The approval of these plans does not obviate the need to obtain a licence or lease of the area from the Ministry of Agriculture & Fisheries.

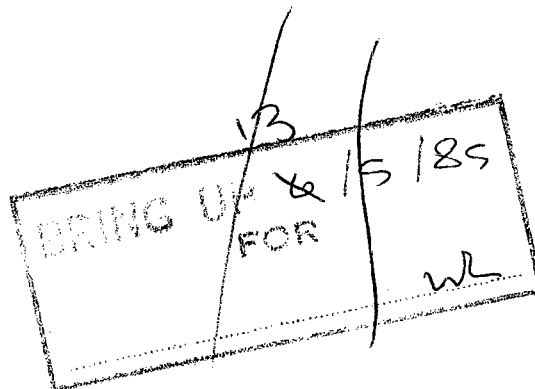

A copy of the approved plans, marked MHB 367 is enclosed.

Yours faithfully,

D.I. JAMISON

acting for the Marlborough Harbour Board in exercise of powers delegated to it under the Marine Farming Act, 1971.

Copy of M.H.B.

SHEET (2) OF 3

Approval of the attached plans is subject to the following conditions :

1. All long lines shall be positioned or repositioned in the licensed area to the satisfaction of the Harbourmaster. If any long line is repositioned in the area, further plans showing the new position shall be submitted. No long line is to be positioned or repositioned in the licensed area without first obtaining the permission of the Harbourmaster to do so.

The buoys situated at each end of the long line shall be orange in colour as shall one buoy at the centre of the long line. At no time shall any such orange buoys be allowed to float with more than 50% of their diameter submerged.

Provided that where there are several long lines positioned alongside one another the Harbourmaster may, in writing and at his discretion, dispense with the requirement for any of the orange buoys specified.

3. All other buoys supporting the long line shall be black or a dark shaded colour.
4. Each end of the long line shall be marked with a buoy carrying a quick flashing amber or white light (as directed by the Harbourmaster). Such light shall be visible all round the horizon at a range of not less than 800 metres and shall be carried at a height of not less than 1 metre above the surface of the water.

Provided that where there are several long lines positioned alongside one another the Harbourmaster may, in writing and at his discretion, dispense with the requirement for any of the lights specified.

The long line shall carry the word 'Marine Farm', the name of the licensee, and the number of the licence displayed in bold clear letters not less than 10cm high with a stroke width of 3cm, in such a manner they can be clearly read from a distance of 10 metres, at each end of the long line.

Provided that where there are several long lines positioned alongside one another it will only be necessary to carry this information at each end of the innermost and outermost long line. The Harbourmaster may, in writing, and at his discretion approve same.

6. Should the moorings or buoys specified in the attached plan prove insufficient for the particular locality, additional moorings or buoys shall be laid to the satisfaction of the Harbourmaster.

The Harbourmaster shall immediately be informed wherever the long line or any part of the long line is removed from its position, or breaks adrift or sinks. The licensee shall also take immediate steps to recover any such long line or part of the long line.

8. The Harbourmaster, or any officer authorised by the Board, may at any time enter the licensed area and inspect the long line or its moorings. If he considers that the long line or its moorings or any navigational markings are in need of repair or maintenance, he may serve notice on the owner specifying the repair or maintenance required and the time within which it is to be effected.

The licensee will observe the By-laws of the Marlborough Harbour Board, and in particular the By-laws relating to Marine Farming. The licensee will pay to the Board any fees specified under such By-laws.

Long lines are to be located not closer than five (5) metres from the boundaries of the licence area.

Long lines to be not greater than 110 metres in length.

Havelock

Dear Miss Archer,

Marine Farm Licence No. 239

We acknowledge receipt of amended plans for Mrs S. Fisher's proposed marine farm in Forsyth Bay.

We confirm that plans have now been approved, in fact for 20 long lines not 10 as quoted on the application form.

Plans have been approved as submitted, marked M.H.B. 367. These plans will be forwarded to Mrs Fisher, as licensee.

Ensure navigation lights are fitted at each end of inshore and seaward most long lines - when total development is reached 8 lights are required. If lines are positioned in staggered formation lights will still be required at each end of both seaward lines and both inshore most long lines.

Yours faithfully,

D.I. Jamison

Dear Miss Archer

MARINE FARM LICENCE NO. 239 : SNAPPER POINT

I acknowledge receipt of your application for plan approval for the above marine farm licenced in the name of S Fisher.

It appears from the information you have supplied, that mooring lines of total length of 80m each will be used. If this is the case, the total length of longlines and moorings far exceeds the total length of the licence area. It is a requirement that all structures are contained within the licence area.

Your plans are returned herewith, please check the details again and resubmit plans showing clearly that all structures are within the boundaries of the licence area.

Yours faithfully

SUZETTE FISHER

- with -

HER MAJESTY THE QUEEN

MARINE FARM LICENCE NO. 239
(Under the Marine Farming Act 1971)

Registered in Marine Farming Register
of Leases/Licences on 1-10-82

W. M. M.

LICENCE UNDER THE MARINE FARMING ACT 1971

Licensor

The Minister of Agriculture and Fisheries (hereinafter referred to as "the Licensor") is the controlling authority under the Marine Farming Act 1971 (hereinafter referred to as "the Act") of the area described in the schedule hereto (hereinafter referred to as "the area").

Licensee

SUZETTE FISHER (together with executors, administrators, successors and permitted assigns hereinafter called "the Licensee").

Licence

The Licensor upon the execution of this instrument subject to the terms and conditions set out below has agreed to grant to the Licensee a Licence of the area for a term of fourteen years beginning on the FIRST day of *October* 1982 at an annual licence fee of SIXTY dollars (\$60.00) payable in advance on the FIRST day of *October* each calendar year, for the use of the area as a marine farm pursuant to the provisions of the Marine Farming Act 1971.

Conditions

1. THE LICENSEE HEREBY COVENANTS with the Licensor as follows:

(a) The Licensee will at all times comply with the provisions of the Act and Regulations thereunder.

(b) The Licensee shall pay the annual licence fee as and when described above to the Director-General of Agriculture

D.F.

and Fisheries (in this instrument called the "Director-General") at the Head Office of the Ministry of Agriculture and Fisheries in Wellington.

(c) If the Licensee is at any time in arrears with payment of the annual licence fee he shall not remove from the area any fish, shellfish or marine vegetation farmed in that area except with the written consent of the Director-General.

(d) The licensee shall utilize and cultivate in a proper manner the area for the purpose of farming MUSSELS and shall comply at all times with the Act and any regulations, notices and requirements made or issued pursuant to the Act.

(e) The Licensee shall not erect, place, moor or keep in the area any structure, raft, buoy or buoyed longline which is not first approved by the Ministry of Transport at Wellington and provided with such functioning beacons, lights, buoys, fog signals and other equipment as the Ministry of Transport may lawfully require.

(f) The Licensee shall on the expiration, determination, forfeiture or surrender of the licence, remove all structures, rafts, buoys, buoyed longlines and other plant from the area, and restore the area as far as is practicable to its original condition to the reasonable satisfaction of the Licensor.

(g) If the Licensee fails to comply with clause (f) of this licence the Licensor may at the expense of the Licensee, take such steps as are necessary to fulfil the Licensee's obligations under that clause.

(h) The Licensee shall take steps to ensure that the fish, shellfish or marine vegetation farmed in the area are not

D.F.

rendered unfit for human consumption by disease, infection by marine pests, or contamination by sewage.

(i) The Licensee will maintain in good order and repair all structures, rafts, buoys, buoyed longlines, beacons, noticeboards and other plant in the area and will not permit such to deteriorate through want of repair so as to be, become, or cause, in the opinion of the Licensor a hazard or potential hazard to navigation.

(j) The Licensee will permit and facilitate free access to, over and from any raft, structure, buoy or buoyed longline to any fisheries officer or any officer in the employment of the Crown authorised by the Director-General who may from time to time wish to enter and inspect the area to ensure that the provisions of the Act or of this licence are being complied with or not contravened.

(k) The Licensee shall not assign, sublet or part with the possession of the whole or any part of the area without the prior consent in writing of the Licensor.

2. THE LICENSOR HEREBY COVENANTS WITH the Licensee as follows:

The Licensor or any fisheries officer or officer of the Crown who under the terms of this licence or the Act enters and inspects the area shall cause little interference as is reasonably possible with the use of the area or with any raft, structure, buoy, buoyed longline, mooring arrangements, mooring or navigational marks, or fish or marine vegetation of the species authorised to be farmed in terms of this licence.

Provisos

3. PROVIDED ALWAYS and it is hereby agreed and declared by and between the Licensor and Licensee that:

D.F.

(a) The licence shall be liable to forfeiture without payment of compensation if the Licensee:

- (i) Cannot be found, or has abandoned the area, or has died and no personal representative has claimed the area within 12 months after his death; or
- (ii) Has not within a period of two years from the commencement of the licence, or within such further period as the Licensor may specify by notice in writing to the Licensee, begun to develop to the satisfaction of the licensor the area as a marine farm for the farming of the species specified in this licence; or
- (iii) Defaults in or is in breach of any term or condition of this licence;

(b) If after a period of seven years from the commencement of this licence the Licensee has not developed the whole of the area as a marine farm, such part of the area as shall then remain undeveloped shall be liable to forfeiture.

(c) If the licence, or part of the area, is liable to forfeiture and the Licensee has failed after notice has been given to him to remedy the default or breach, the Licensor may forfeit the licence without action and may thereupon re-enter and recover possession.

SCHEDULE

All that area containing 6.0000 hectares, more or less, in front of Sounds Foreshore Reserve and Section 3, Block XVI, Orieri Survey District, bounded by a line commencing at a point in Forsyth Bay being 53.86 metres distant along a bearing of

D.F.

102°57'30" from peg XIX on S.O. Plan 241 in Block XVI, Orieri Survey District; thence along a bearing of 95°00' for a distance of 150 metres to the northeastern corner; thence along a bearing of 185°00' for a distance of 400 metres to the south eastern corner; thence along a bearing of 275°00' for a distance of 150 metres to the south western corner; thence along a bearing of 5°00' for a distance of 400 metres to the north western corner, the point of commencement.

The above area is more particularly shown on S.O. Plan 6001.

15 January 1982

Dear Sir

MARINE FARMING APPLICATION - S FISHER : FORSYTH BAY

I refer to your letter of 12 May 1981 objecting to the above application on the grounds that the proposed farm would obstruct access to the shore and extend too far to seaward creating a possible navigational hazard.

In accordance with section 7(2) of the Marine Farming Act 1971, I advise that the Minister of Agriculture and Fisheries has decided not to uphold the objection, being satisfied that it has been overcome by the action of the applicant in that the applicant has reduced the area of the proposed farm from ten hectares to six hectares, giving access to the shore and reducing the seaward boundary to remove conflict with vessels navigating Forsyth Bay.

Consequently, the Minister has offered the applicant a marine farming licence in respect of the area shown on the attached plan.

Yours faithfully

Dear Sir

MARINE FARM APPLICATION : S FISHER - FORSYTH BAY

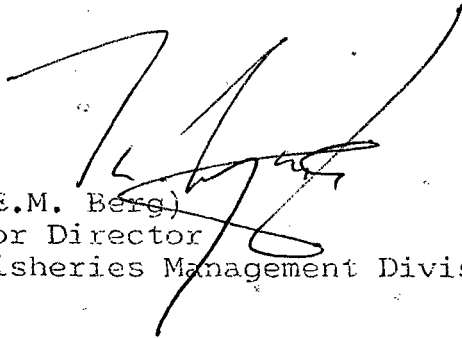

I acknowledge receipt of your objection dated May 12 to the above application.

In accordance with Section 7 of the Marine Farming Act 1971 the Minister of Agriculture and Fisheries will consider the objection in due course.

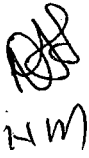

You will be advised of his decision when it is made.

Please ensure that a copy of your objection is served on the applicant, as required under Section 6(5) of the Act.

for Director
Fisheries Management Division

M4/266a

12 May 1981

The Director General
Ministry of Agriculture & Fisheries
Box 2298
WELLINGTON

Dear Sir

OBJECTION - MARINE FARMING APPLICATION NO. 834 -
S. FISHER - FORSYTH BAY

The Marlborough Harbour Board objects to this application for a licence of 10 hectares located in Forsyth Bay.

The Marlborough Harbour Board is a duly constituted body, being responsible for the control of harbour waters in this area and the control of the adjacent foreshores, in terms of the Harbours Act 1950. It is also responsible for the control of small craft and the behaviour of the public generally in terms of the General Harbours (Nautical & Miscellaneous) Regulations 1968 and the Marlborough Harbour Board Bylaws.

Accordingly the Marlborough Harbour Board objects to this application on the grounds that the area applied for extends almost 300 metres to seaward of the adjacent promontory and extends a considerable distance further to seaward from the head of the coastal indentation across which it lies. In addition, the area obtrudes to the southward beyond the aforementioned promontory.

The Board's objection would be met by:-

1. A reduction in length of 100 metres at the southern end of the area
2. A reduction in width of 50 metres on the eastern side of the area.

Yours faithfully

D.I. Jamison
HARBOURMASTER

per:

MRS S. FISHER, 88 VALLEY, WAKEFIELD, NELSON

3. M4/153b J & F Goulding, Hamilton Bay, Admiralty Bay.

4. W.E. Cleall, Garden Bay, Admiralty Bay.

It was resolved that no objection be raised to the above four applications.

5. M4/266a S. Fisher, Forsyth Bay.

It was resolved that the Board object to the above application, the objection being met by:

1. A reduction in length of 100m at the southern end of the area.

2. A reduction in width of 50m on the eastern side of the area.

6. M4/266b S. Fisher, Forsyth Bay,

It was resolved that the Board object to the above application on the following grounds:

1. That the northern end of the area constitutes a navigational hazard.

2. That the southern part of the area when combined with the area applied for under the application number 812 by Messrs Luke and Jamison unduly restricts access to the small bay situated to the south of the area.

7. M4/270a G.P Roach & B.G. Fisher, Catherine Cove, D'Urville Island.

It was resolved that the Board object to the above application on the following grounds:

1. That no planning exercise has been carried out in relation to this area and other areas of D'Urville and that the granting of any Marine Farming licence in this area should take into consideration the overall planning of the area.

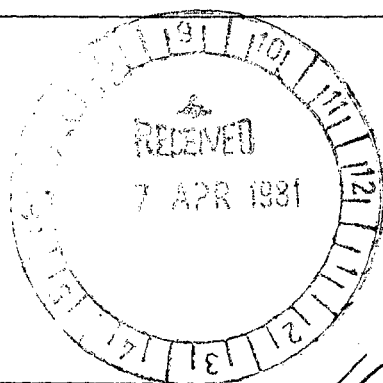

2. That the granting of a licence in the area applied for would unduly interfere with the recreational use of the adjacent beach to the north and also interfere with the anchorage of small vessels in this area. Furthermore, the southern part of the area applied for would unduly interfere with recreational fishing around the D'Urville Peninsula.

8. A104/295 a C.W.S & J.W. Jerram, McLaren Bay, Croisilles Harbour.

It was resolved that the Board object to the application such objection being met by a condition that the length of the area be reduced 100 metres on its eastern end.

Proposed Newspaper advertisement in the Marlborough express

MARINE FARMING ACT 1971

I SUZETTE FISHER of 88 Valley Wakefield hereby give notice that I have applied for a licence under the Marine Farming Act 1971 for the purpose of farming mussels in all that area in Block XVI, (rieri Survey District, containing 10.0 hectares more or less, in front of Sounds Foreshore Reserve and Part Section 2, Block XVI, (rieri Survey District bounded by a line commencing at a point in Forsyth Bay approximately 3010 metres distant along a bearing of $347^{\circ} 30'$ from Trig S and proceeding along a bearing of 275° for a distance of 200 metres to the southwestern corner; thence along a bearing of 5° for a distance of 500 metres to the northwestern boundary; thence along a bearing of 95° for a distance of 200 metres to the northeastern corner; thence along a bearing of 135° for a distance of 500 metres to the southeastern corner, the point of commencement.

The method of culture will be by using long lines up to 110M in length attached to buoys at regular intervals from which the mussels will be suspended. The area described will be adequately marked by buoys bearing the name of the applicant and the words "Marine Farm applied for".

A plan of the area described may be inspected at the offices of the M.A.F. Blenheim and Head Office M.A.F. Wellington. Any person desiring to object to this application should do so stating fully the grounds on which the objection is made within two months after date of the first publication of this notice to the Director-General Ministry of Agriculture & Fisheries P.O. Box 2298 Wellington and serve a copy on the applicant at the above address.

This is the first publication of this notice dated

Signed. S. FISHER

The second advertisement is to state the following-

Amount: \$ 100-00

Receipt No. 666211/4

Date: 1-11-80

Receiver: GR

Accompanying this application are:

✓ ☒ 1 copy of a map or plan showing the location of the area, plus four copies of a Block
plan of the area showing the position of the boundaries.

✓ ☒ 1 copy of the proposed newspaper notice.

✓ ☒ A deposit of \$100

Dated this seventeenth day of MARCH 19 80

Signature of Applicant/s:

S. Fisher

Describe method of seeding or laying young spawn, and cultivation. Indicate the number and size of rafts, enclosures, cages, racks or other structures to be used, and the material to be used for building them.*

Describe briefly the development to be achieved each year, the anticipated annual investment, how it is to be financed, harvesting and marketing arrangements.*

Attach evidence from bank, accountant or solicitor that specified sum is available.

The method of farming and structures intended to be used is as follows:
The use of synthetic ropes secured to synthetic floats thence to heavy chain and approved anchors to form traditional long lines as currently being used in the Marlborough Sounds area. Spat collection, then attaching the seedlings to the longlines for further growing will be carried out in the same manner as suggested by Mr Jim Jenkins and Mr John Meredith-Young. This method is currently being utilized in these areas. We would anticipate the areas concerned when fully developed will contain 34 longlines of 110 metres in length.

Development of the farm over the first 5 years will be in the following stages: We would expect to develop 6 longlines in the first season of spat collection followed by a further 6 the next season. From this period further development would be related to income from harvest. expected harvest would be able to finance a larger scale development programme therefore reaching capacity after 5 years farming. In the first year an expense for development could be calculated at \$36,000 to \$46,000. The harvesting would be done by a local contractor and marketing would probably be done by Nelson Fisheries Ltd.

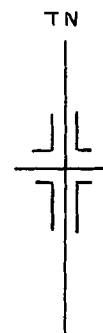

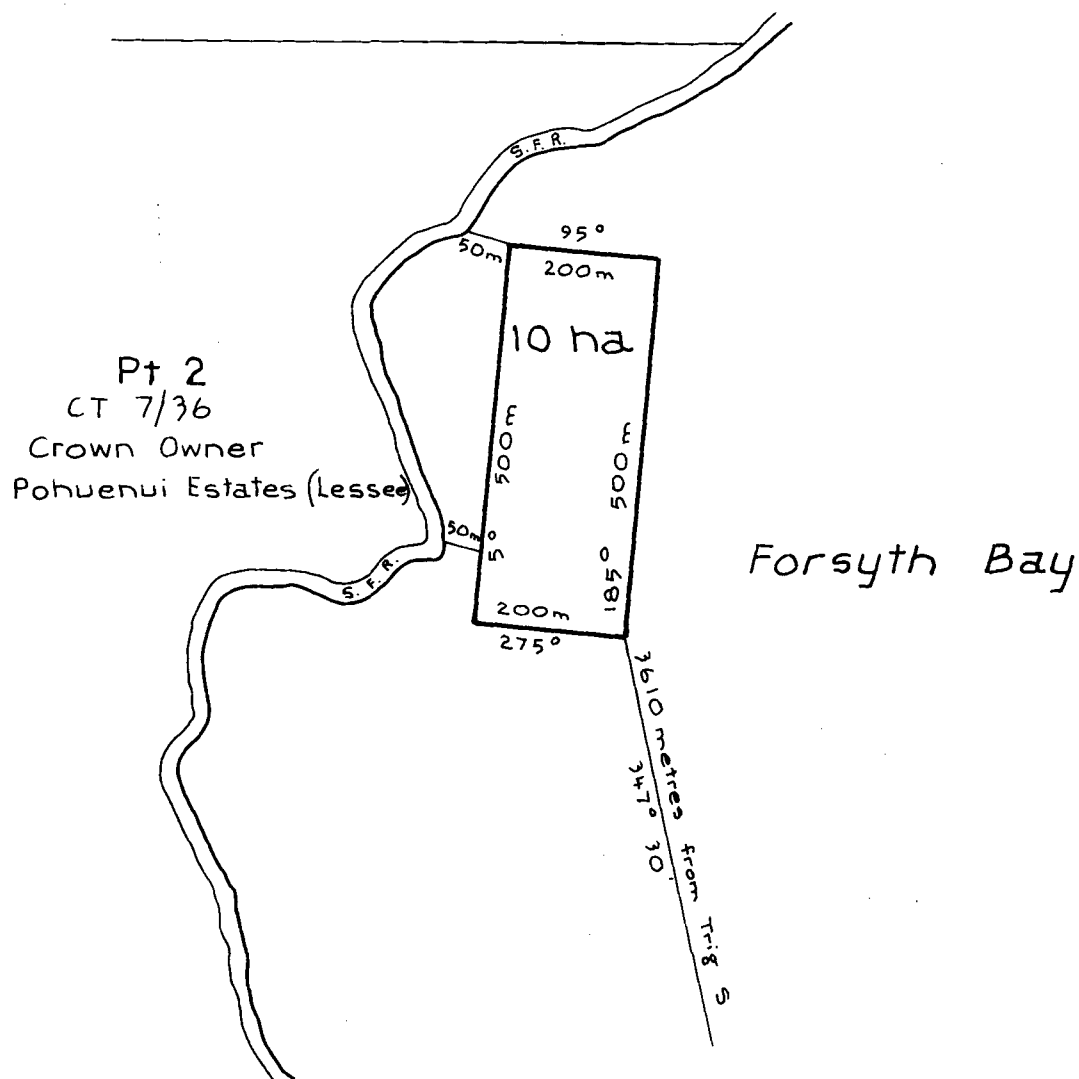

Funds available to be invested in the venture: The finance for this project will be made available by my company at present being formed which will have sufficient capital for the proposed development, calculated at \$6,000 to \$7,500 per long line.

Signature of Applicant/s:

D. Fisher
