- 2.0 Methodology 5
- 2.1 Timeline characteristics and context 5
- 3.0 Timeline of Climate-related Policy 6

1.0 Introduction

1.1 Purpose

The aim of this research paper is to better understand the different eras associated with climate change and how this history has impacted on Aotearoa New Zealand's climate-related policy since 1980. In this regard, the Institute has developed a timeline that maps the history of climate-related policy in Aotearoa New Zealand.

This paper is a situational report, simply recording what has occurred prior. This paper will contribute to an evidence base that the Institute will use to develop core assumptions that will influence and develop the narrative underpinning future *ClimateChangeNZ* research – namely *Report 18: Climate Change Strategy for Aotearoa New Zealand*. We aim to identify where Aotearoa New Zealand has come from to develop inclusive and actionable ways forward.

1.2 Background to Project *ClimateChangeNZ*

This working paper forms part of Project *ClimateChangeNZ*, which is one of the Institute's seven research projects and has the overall aim of exploring what an actionable and inclusive climate strategy would look like for Aotearoa. This working paper follows on from previous *ClimateChangeNZ* publications:

- *Working Paper 2019/05 – Reviewing Voluntary Reporting Frameworks Mentioned in 2017 and 2018 Annual Reports*
- *Working Paper 2019/06 – Analysis of Climate Change Reporting in the Public and Private Sectors*
- *Working Paper 2020/04 – Analysis of Climate Reporting in the Public and Private Sectors*
- *Working Paper 2020/05 – Reviewing Voluntary Reporting Frameworks mentioned in 2019 Annual Reports*
- *Working Paper 2020/09 – A Forestry-Centric Investigation of the New Zealand Emissions Trading Scheme*

In 2021, we hope to publish a number of research reports, and a more comprehensive *Project 2058* report on climate change in 2022. Essentially, this series of papers (listed below) will act as our evidence base, which will develop our thinking and recommendations in response to all of the climate-related work that is unfolding this year. The results will be brought together and published in the *Project 2058* report. The papers in this series are:

1. *Working Paper 2021/01 – Timeline of Climate Change Institutions and Instruments since 1980.*
2. *Working Paper 2021/03 – Analysis of Climate Change in Government Department Strategies as at 31 December 2020*
3. *Working Paper 2021/04 – Reviewing Voluntary Reporting Frameworks Mentioned in 2018–2020 Annual Reports*
4. *Working Paper 2021/06 – Reviewing TCFD information in 2017–2020 Annual Reports of NZSX-listed companies*
5. *Working Paper 2021/07 – Scoping the use of the term 'climate scenarios' and other climate-related terms in Aotearoa New Zealand and international literature*
6. *Working Paper 2021/09 – Analysis of Climate Change Reporting in the Public and Private Sectors*
7. *Discussion Paper 2021/04 – An Accounting Dilemma: Does a commitment to purchase offshore carbon credits create a requirement to disclose that obligation in the financial statements of the New Zealand Government?*
8. *Discussion Paper 2022/02 – Accounting for natural GHG emissions, such as wildfires and volcanic eruptions (working title)*

2.0 Methodology

The following methodology explains the research process and structure of this paper.

2.1 Timeline characteristics and context

In the context of this paper, ‘climate-related policy’ refers to the following components of public policy:

- a. Institutions (including NGOs and companies)
- b. Legislation
- c. International commitments
- d. Instruments
- e. The Conference of the Parties (COP)

The Institute aimed to identify how climate-related policy had developed through each era of societal awareness and discourse around climate change. The titles that have been used in the timeline aim to reflect such societal shifts of awareness.

The following timeframes were developed to identify (at a high level) the different eras of climate-related policy in Aotearoa New Zealand. These are:

1. International markets (1980–1997) [dark green]
2. International markets + domestic trees (interventions) (1997–2010) [light green]
3. Transition – became just transition (2010–2020) [orange]
4. Transformation needed (2020–onwards) [red]
