Kia ora [REDACTED],

Thanks for following up.

As you will see I have corrected our table (sorry about that). Can you provide the date that XBB.1.5 was detected in wastewater – then we can complete the table.

If you are aware of any later variants (e.g. new rows to add), please let us know. We would like the book as up to date as possible, including any 2024 detected variants.

Super thanks, Wendy

Kia ora Wendy,

I have been advised by our topic experts of the following:

Apologies for the delay in responding. We have now had a chance to look at this and wanted to clarify the precise question.

In the provided table on the method of first-detection for XBB.1.5 is blank while a date is provided. We can confirm the correct date and method-of-detection for XBB.1.5 in keeping with other entries in the table?

However, your email message requests the date wastewater testing first detected XBB.1.5.

Can you confirm which of these results you would like, and we will have an answer for you shortly.

Thank you and regards,

[REDACTED]

Hi there,

I had one follow up question on your OIA response; can you advise the date ESR wastewater testing identified XBB.1.5 (see question marks below in red font).

We have decided to keep both dates (as shown in the table below), as they are both important.

If you see any areas or suggestions for improvements, please do not hesitate to contact me.

Many thanks,

Wendy

COVID-19 Nation Dates

Table 1.1: Arrival of SARS-CoV-2 variants in New Zealand

	Variants	First detected (announcement date) ¹	First detected by ESR (collection date) ²	Sampling method ³
No framework	SARS-CoV-2 (the original) ⁴		23 Feb 2020	Clinical
	Alpha (B.1.1.7)	3 Jan 2021	Never detected ⁵	Clinical
Alert level framework	Beta (B.1.351)	24 Jan 2021	24 Jan 2021	Clinical
	B.1.1.317	7 Mar 2021		
	Delta	25 Jun 2021	17 Aug 2021	Clinical
	Omicron (BA.1)	16 Dec 2021	28 Dec 2021	Clinical
	- BA.2		14 Jan 2022	Clinical
	- BA.3			
	- BA.4	3 Jun 2022	8 May 2022	Clinical
