# 1.0 Introduction

This paper explains how the 2024 GDS Index was created.

## 1.1 Purpose

Three objectives underpin the Institute’s research.

**The purpose of the GDS Index is to:**

- 1. maintain a public record of strategic documents published by government departments over time,
- 2. provide feedback on strategic documents (ideally to help improve the quality of such documents going forward), and
- 3. showcase a process for improvement – the Institute encourages the establishment of a public register of strategy documents that is actively managed by the public service, making it easy for Ministers, officials and citizens to access and assess these strategies and the long-term policy direction of departments.

The key research question underpinning the GDS Index is: Does this strategy document contain sufficient information for an independent reader to assess the quality of the strategy?

Note: The Handbook does not itself review the quality.

Table 1.1 sets out the key publications that were published as a direct result of this methodology being implemented.

**Table 1.1: The 2024 GDS Index publications**

Publication	Type of publication	Title

Analysis of Climate Change	Working Paper	Working Paper 2025/02 – Analysis of Climate Change in Government Department Strategies as at 31 December 2024

## 1.2 What has changed since the 2023 GDS Index

With the decision to publish the GDS Index in early 2025 (to 31 December 2024), the Institute has focused on streamlining its GDS research process to deliver the Index shortly after the end of the previous year. As a result of this intention, the following changes were made:

### 1. No initial GDS scoping

For the 2024 GDS Index, the Institute did not carry out an initial search for GDSs on government departments’ websites. Previously, the results of this search were used to make up the spreadsheet sent to government departments in our initial OIA request (see Stage 2 of Worksheet 1 in *Working Paper 2024/08 – Methodology for the 2023 Government Department Strategies Index* [p.34] for more information). For the 2024 GDS Index, we instead requested that government departments provide links to new GDSs in their OIA responses (see change 3 below). This enabled the Index to be published in April 2025 (four months after close off).

### 2. Isolating our OIA correspondence

All correspondence relating to the GDS Index is now undertaken through a unique email address: [GDSIndex@mcguinnessinstitute.org](mailto:GDSIndex@mcguinnessinstitute.org).

### 3. Changes to our initial OIA request

Government departments were each sent individual spreadsheets, as opposed to one spreadsheet for all departments, and they were asked to fill in two sheets rather than one.

- Sheet 1 asked whether GDSs listed in the *2023 GDS Index* were still active.
- Sheet 2 asked for the link and title of any new strategies published in 2024 or any active strategies missing from the *2023 GDS Index*.

These changes were intended to significantly reduce the workload for government departments and hence accelerate the speed of OIA responses and be more cost-effective.

### 4. Refining the criteria

#### Changes made in the *2024 GDS Index* research process

Appendix 5 lists all the changes to the criteria since 2015.

Given feedback from officials, it was decided to provide more clarity in regard to criterion 7. In particular, a definition of what comprises a corporate document was added as a note under the criteria and to the glossary.

Reports on strategic intentions or annual reports, as required under ss 38 and 43 of the Public Finance Act 1989 respectively; performance improvement framework reviews (PIFs); and briefings to incoming Minister (BIMs) have been specified as corporate documents, and statements of intent and four-year plans have been removed. These changes seek to provide additional clarity and transparency for government departments and users of the GDS Index, as well as reflecting the following legislative changes relating to corporate documents:

- In 2014, sections 38–42 of the Public Finance Act 1989 (PFA) were updated to require government departments to provide information on ‘strategic intentions’.<sup>1</sup>
- Statements of intent are no longer required under the PFA for government departments.<sup>2</sup>
- In September 2019, Cabinet agreed to stop requirements for four-year plans.<sup>3</sup>

### 5. Streamlining time taken for scoring GDSs

New additions to the *2024 GDS Index* have been scored by one reviewer who was assigned 30 minutes for each GDS.

### 6. Merging of inter-related GDSs

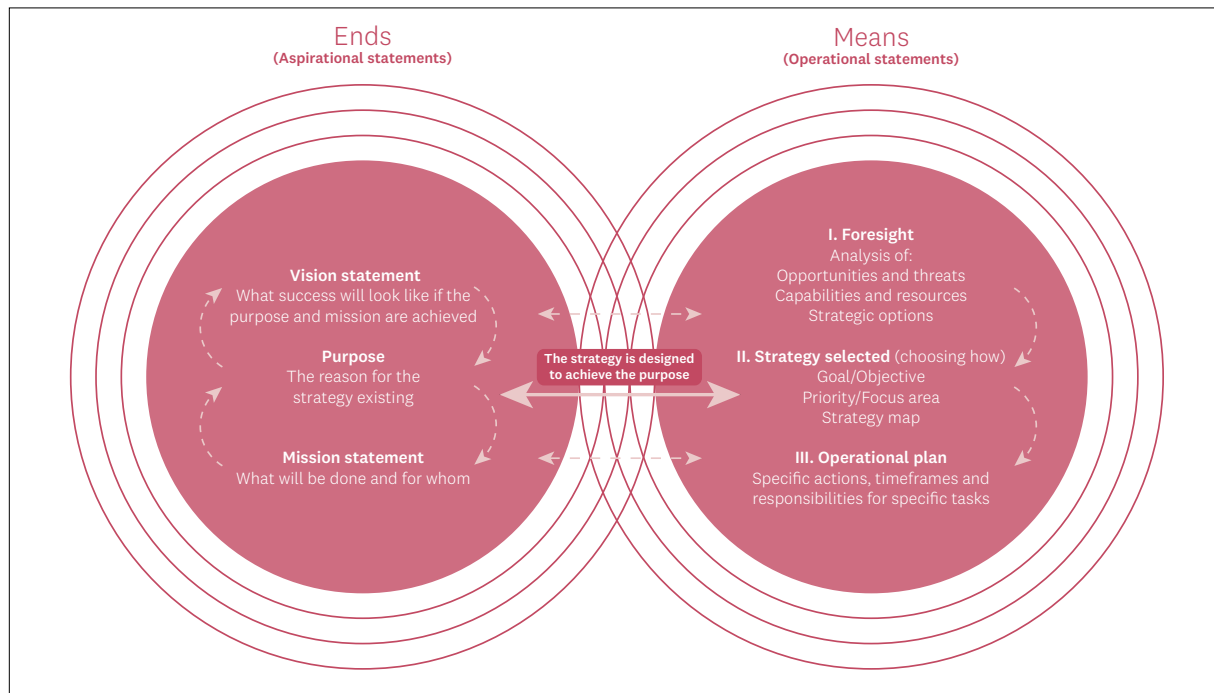

There is a noticeable trend of departments producing amendments or extensions to supplement existing strategies (i.e. without the existing strategy being archived). Therefore, for the *2024 GDS Index*, the Institute has merged amendments and extensions, as well as action and implementation plans, with the overarching strategy document where the department holding both documents is the same and the publication dates are within three years of each other. This time limit between publication dates was introduced to account for the fast-changing world we live in and hence the different contexts in which GDSs are developed and issues they are designed to address. See Appendix 5 for more detail on how decisions to merge documents were made.

## 1.3 The important link between purpose and strategy

Figure 1.1 (opposite) sets out how the Institute sees the link between an aspirational statement and an operational statement. The most important of these is the link between the purpose statement and the strategy statement. The connection between the two should be clear, logical and aligned. Within each GDS, departments should answer the ‘what question’ (what it wants) and the ‘how question’ (how it might be achieved).

A glossary of key terms is provided on pages 20–22.

**Figure 1.1: Link between aspirational statements and operational statements**

### Aspirational statements

These statements are future-focused. Common aspirational statements are vision, values, purpose and mission statements. Although these terms have slightly different meanings, they are often used interchangeably.

### Operational statements

These statements are action-orientated. Common operational statements include strategy, tactics, priority areas, focus areas, themes and plans. Although these terms have slightly different meanings, they are often used interchangeably.

### Purpose statements

These are aspirational future-focused statements that explain in a concise, unique, coherent and specific way what the strategy aims to achieve and provide an impetus for action. A purpose statement is more specific than a vision or mission statement. A vision statement tends to be broad and general (e.g. to reduce poverty) and a mission statement tends to explain aspirations in terms of values and character (e.g. to be trustworthy and respected). In practice, vision, purpose and mission are often used interchangeably, but for the Institute, a purpose statement should be specific and able to be judged (i.e. was success achieved?). Examples might include to alleviate poverty for young mothers or to protect Hector's dolphins. The purpose always sets the scope of a strategy. Although the purpose statement can include metrics, in practice, metrics are more commonly used to describe goals or objectives.

### Strategy statements

Strategy statements are the 'means' to an end. The approach is unique to a department and indicates the method the department has chosen to adopt to bring about change. It describes the choices made.

## 1.4 The strategy pyramid

Figure 1.2 (opposite) sets out how strategy can turn purpose into actionable steps. If each question in the strategy pyramid can be answered logically, it is possible to design a roadmap for achieving desired outcomes. Using the metaphor of a road, the goal should be to find the fastest, safest and most cost-effective route from point A to point B. This is why it is so important for GDSs to be designed well, thoroughly tested and regularly re-evaluated; not just because of how much they cost, but because they have the potential to deliver significant long-term benefits to current and future generations. Put another way, a GDS only costs the public money when it is not effective. Hence, departments that design and stress-test strategies have a real responsibility to put effort not only into the initial strategy design, but the middle (the execution) and the end (the review, reflections and lessons). GDSs are a cheap and effective tool capable of delivering significant value to the public of New Zealand – officials have a responsibility to act in good faith and deliver on the public service principles.

Section 12 of the Public Service Act 2020 sets out five public service principles, of which the fifth principle is stewardship. Furthermore, s 52 sets out the general responsibilities of chief executives of departments and departmental agencies, and states:

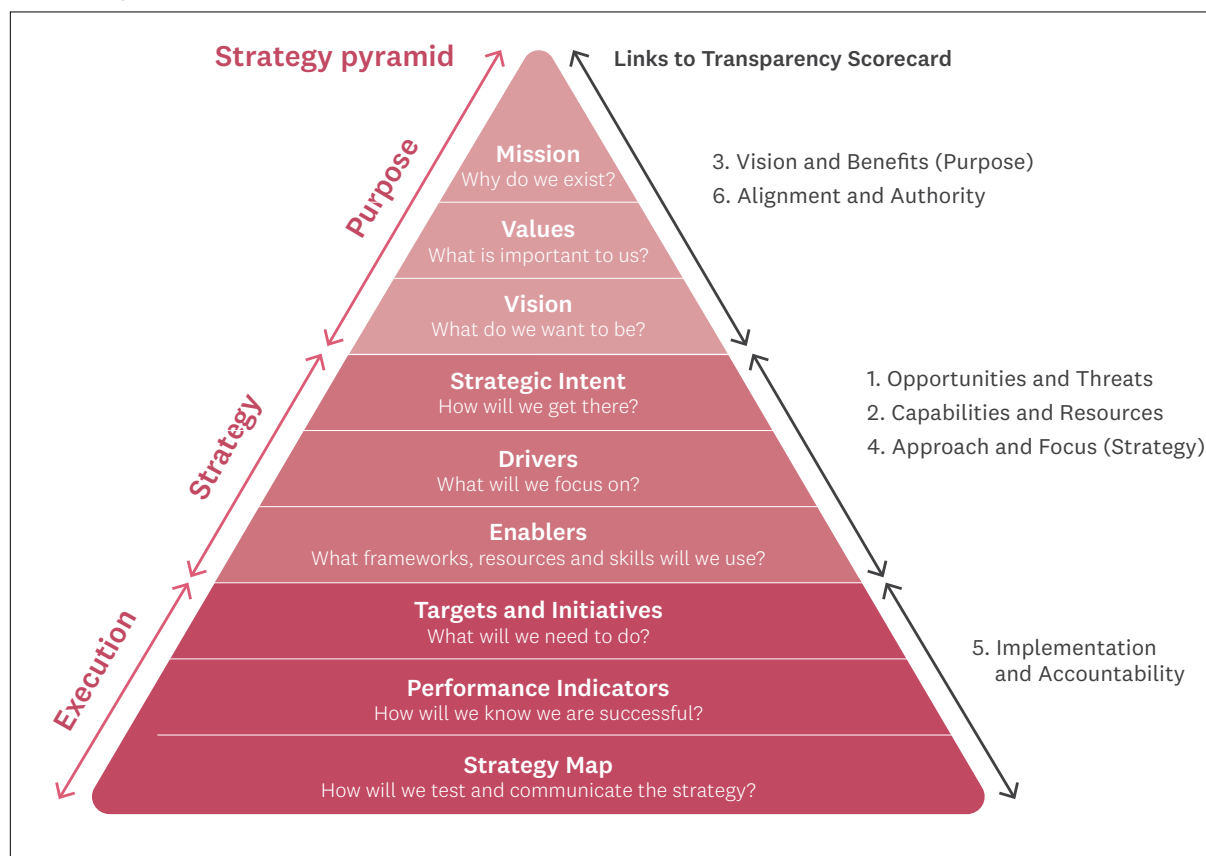

- (1) A chief executive of a department or departmental agency is responsible to the appropriate Minister for—
  - (a) improving ways of working across public service agencies; and
  - (b) their agency’s responsiveness on matters relating to the collective interests of government; and
  - (c) the operation of their agency, including in carrying out the purpose of the public service under section 11; and
  - (d) supporting that Minister to act as a **good steward of the public interest**, including by—
    - (i) maintaining public institutions, assets, and liabilities; and
    - (iii) providing advice on the long-term implications of policies; and...
  - (h) the efficient and economical delivery of the goods or services provided by the agency and how effectively those goods or services contribute to the intended outcomes. See more detail in Appendix 1.

Figure 1.2 shows how the Institute’s strategy pyramid connects to the Transparency Scorecard.

**Figure 1.2: The link between the Institute's strategy pyramid and the Transparency Scorecard**

Source: Adapted from McGuinness Institute (2012)<sup>4</sup>

## 1.5 Foresight thinking

Governments today are often criticised for prioritising short-term goals and quick fixes at the expense of investing in long-term change, and without considering long-term feasibility. An article by the Public Health Communication Centre states that ‘short-term thinking dominates policymaking in Aotearoa NZ’ and calls for structural change and parliamentary reform to further institutionalise long-term thinking.<sup>5</sup>

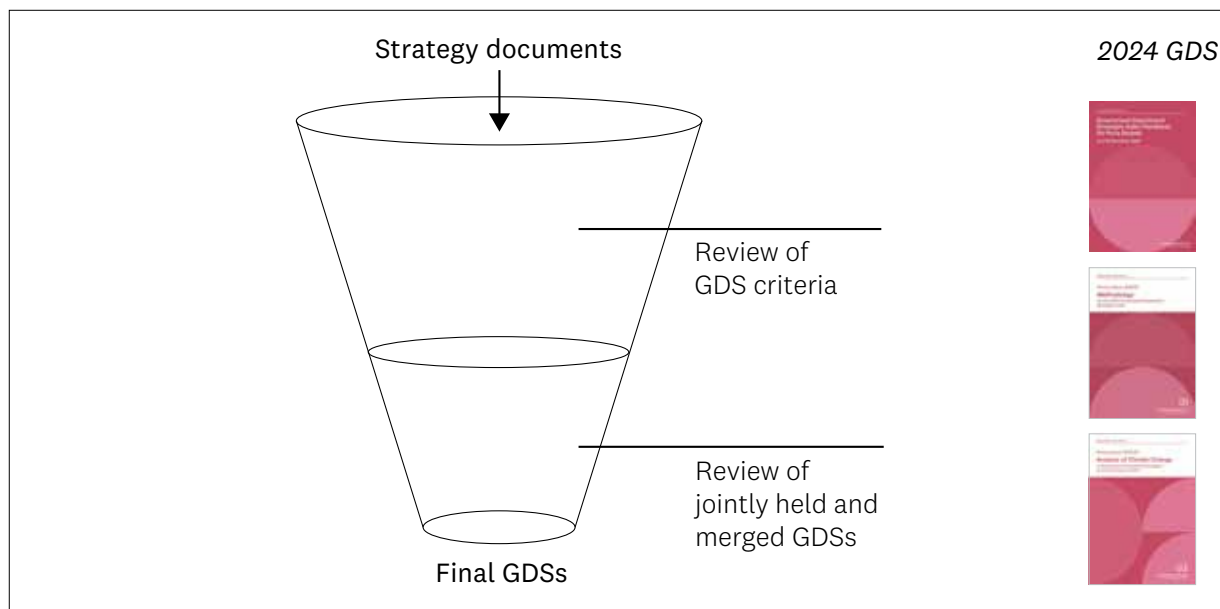

GDSs have a key role in embedding long-term thinking into government decision-making and policy. With some strategies spanning 40 years, they encourage politicians to think beyond the three-year election cycle. Applying foresight is essential in addressing and reducing uncertainty, and can provide more clarity over what the future may hold and enable us to be prepared for it. The Institute has a particular interest in foresight thinking and foresight tools, especially given the increasingly pressing nature of slowly evolving crises such as climate change.<sup>6</sup> Increasing the prevalence, prominence, public accessibility and accountability of GDSs should enable New Zealand to map a comprehensive pathway to meeting long-term targets, such as its Nationally Determined Contribution (NDC).<sup>7</sup>

## 2.0 Methodology

### 2.1 Method

The method has remained relatively consistent since 2014; see Figure 2.1. However, the GDS criteria have varied slightly over the years, with a few changes to the criteria to align with recent developments. See Appendix 2: Changes to criteria over time.

**Figure 2.1: Illustration of the method**

### 2.2 Previous GDS Index data sets

We have collected GDS data seven times (in 2014, 2015, 2018, 2020, 2021, 2023 and 2024). Table 2.1 below provides a comprehensive list of all GDS data sets generated to date.

**Table 2.1: GDS Index data sets over time**

GDS data set	GDSs in operation	GDSs archived	Total GDSs since 1 July 1994	GDSs in operation as a percentage of all GDSs since 1 July 1994
GDSs as at 30 June 2014	136	154	290	46.9%
GDSs as at 30 June 2015	134	168	302	44.4%
GDSs as at 31 December 2018	148	265	413	35.8%
GDSs as at 31 December 2020	199	288	487	40.9%
GDSs as at 31 December 2021	221	327	548	40.3%
GDSs as at 31 December 2023	230	406	636	36.2%
GDSs as at 31 December 2024	195	470	665	29.3%

**Note to Table 2.1**

This includes GDSs that have been jointly held. Jointly held GDSs are listed under each department that holds them. Hence, a strategy jointly held by four departments is included four times in the GDS Index. See Appendix 6 for a list of all jointly held GDSs.

**Table 2.2: GDS Index reconciliations over time**

	Date of GDS Index	Total GDSs from previous GDS Index	GDSs archived this year <sup>ii</sup>	GDSs carried over from previous year <sup>iii</sup>	GDSs new to the GDS Index this year <sup>iii</sup>	Total active GDSs in GDS Index <sup>iii</sup>
<i>2014 GDS Index<sup>i</sup></i>	as at 30 June 2014	290	-154	136	0	<b>136</b>
<i>2015 GDS Index</i>	as at 30 June 2015	136	-14	122	12	<b>134</b>
<i>2018 GDS Index</i>	as at 31 December 2018	134	-97	37	111	<b>148</b>
<i>2020 GDS Index</i>	as at 31 December 2020	148	-23	125	74	<b>199</b>
<i>2021 GDS Index</i>	as at 31 December 2021	199	-39	160	61	<b>221</b>
<i>2023 GDS Index</i>	as at 31 December 2023	221	-78	143	87	<b>230</b>
<i>2024 GDS Index</i>	as at 31 December 2024	230	-64	166	29	<b>195</b>

**Notes to Table 2.2**

- i The *2014 GDS Index* was the first Index published by the Institute. As such, the 290 GDSs represent all GDSs found that were published between 1 July 1994 and 30 June 2014. The 154 GDSs are those that had been archived between 1 July 1994 and 30 June 2014, while the 136 GDSs are those that were still active as at 30 June 2014.
- ii See Appendix 8: GDSs archived between October 1994 and 31 December 2024 [470].
- iii See Appendix 9: GDSs in operation in the *2024 GDS Index*, by department [195].

Over time, the methodology of the GDS Index has been further developed and refined. This is the fifth time the methodology has been refreshed. A complete list of GDS publications can be found in Appendix 1.

Table 2.3 sets out the process applied to generate the GDS Index.

**Table 2.3: The 2024 GDS Index process**

Stages	2024 GDS Index		Total
Stage 1 Additions	<b>List of potential new GDSs</b>		
	OIA requests were made to each government department in January 2025, requesting all GDSs they hold (see Worksheets 1 and 2). <sup>1</sup>	<b>42</b>	
	Less documents that did not meet the criteria (see Appendix 4)	-10	
	Less strategy documents merged by the Institute (see Appendix 5)	-3	
	<b>New additions to the 2024 GDS Index (see highlighted rows in Table A9.1, Appendix 9)</b>		<b>29</b>
Stage 2 Carried Over	<b>Previous 2023 GDS Index GDSs in operation</b>	<b>230</b>	
	Less GDSs archived by department as GDS is no longer in operation (see note * of Table A8.1, Appendix 8)	-45	
	Less GDSs archived by department as GDS is no longer held by that department but is still active and held by another department/s (see note ** of Table A8.1, Appendix 8)	-6	
	Less GDSs archived by the Institute as GDS no longer meets the GDS criteria (see note *** of Table A8.1, Appendix 8)	-13	
	<b>2023 GDSs to be carried forward (see rows with asterisk in Table A9.1, Appendix 9)</b>		<b>166</b>
Total	<b>Total GDSs in operation as at 31 December 2024 (see Appendix 9, Table A9.1)</b>		<b>195</b>

**Note to Table 2.3**

- i An OIA schedule combines all correspondence with government departments. It is published on the McGuinness Institute's 'OIAs and other correspondence' web page.<sup>8</sup>

## 2.3 Does the document meet the Institute's definition of a GDS?

For the purposes of the *2024 GDS Index*, 'government department strategy' (GDS) is defined in terms of the following criteria.

A 'government department strategy' must:

1. be a publicly available document that is published by a government department
2. be a public-facing document that is written for the public to read
3. be an externally facing document (i.e. not written for internal management purposes)
4. be a strategic document that contains long-term thinking (i.e. it sets out the approach [the means] and the purpose [the ends] of the strategy)
5. be a national document (i.e. it excludes local and regional strategies)
6. be a document that looks out at least two years or more, and
7. not be a corporate document.\*

\* Corporate documents are defined as regular public sector entity reports and include reports on strategic intentions or annual reports, as required under ss 38 and 43 of the Public Finance Act 1989 respectively. They also include performance improvement framework reviews (PIFs) and briefings to the incoming Minister (BIMs).

A strategy will be excluded if it does not meet the definition of a GDS above. In cases where it is not clear whether a strategy meets the criteria, it is subject to a more detailed review. Question 1 below explains the process for reviewing a strategy and gives some examples. See Appendix 4 for the full list of GDSs rejected from the *2024 GDS Index*.

### Technical questions with practical examples

Please note, when discussing a specific GDS in the *2024 GDS Index*, the Institute's protocol is to include the GDS number in square brackets. As noted, titles are not always consistently used by departments, so this protocol ensures there is no doubt as to what GDS the Institute is referring to.

#### 1. How does the Institute deal with strategies that may not meet the definition of a GDS?

Before accepting a document as a new operational GDS, we check its publication and operational dates to ensure they align with the year for which the analysis is carried out. For example, a new GDS published in January 2025 will be excluded from the *2024 GDS Index* as it is past the cut-off date for this GDS Index update.

For some types of documents, it is less clear whether they meet the GDS criteria and hence they require a deeper review. These document types are summarised below:

##### National policy statements issued under the RMA (NPSs)

These are excluded as, while they often meet the GDS criteria, the Institute considers the purpose and users they serve are different from GDSs. NPSs are designed to establish rules and guidelines for decision-makers and are written to be used by officials within government rather than the general public. They all share the same pre-determined purpose, which is to 'state objectives and policies for matters of national significance that are relevant to achieving the purpose of the RMA'.<sup>9</sup>

Note: NPSs are distinct from Government Policy Statements, which are not issued under the RMA and set out a government's plans, priorities and intentions related to a concrete cause such as health or land transport.<sup>10</sup> Government Policy Statements are often included in the GDS Index.

##### Long-term insights briefings (LTIBs)

These are often excluded because they do not have sufficient detail to meet criterion 4.

In the *2023 GDS Index*, there was one exception to this: [GDS34-02] *He Tirohanga Mokopuna 2021 – Combined Statement on the Long-Term Fiscal Position and Long-Term Insights Briefing*. This is because it was combined with a statement on the long-term fiscal position that did contain long-term thinking and a means and ends.

## Regulatory stewardship documents

These were excluded unless they had sufficient detail to meet criterion 4. In the *2024 GDS Index*, there were two exceptions to this: LINZ's [GDS09-03] *Regulatory Stewardship Strategy* and [GDS16-11] MBIE's *Regulatory Systems Stewardship Strategy 2023-2028*.

## Strategies produced by Interdepartmental Executive Boards (IEBs)

These are included, even though they often do not appear to be directly published by a government department (criterion 1). In cases where IEBs solely consist of government department officials (who are employed by government departments), the strategies that they publish are included in the GDS Index. For example, [GDS03-03], [GDS19-09], [GDS21-15], [GDS23-01], [GDS24-02], [GDS25-09] and [GDS29-01] *Te Aorerekura: The national strategy to eliminate family violence and sexual violence* (December 2021) was produced and published by the IEB Te Puna Aonui (TPA). In the *2024 GDS Index*, it was considered jointly held by the seven departments that are members of TPA and therefore share a responsibility for the strategy's implementation.

## Cabinet strategy documents

Cabinet can issue strategy documents independent of departments. These are excluded as they do not meet criterion 1. However, if the strategy document is later published by a government department, it can be considered a GDS.

Example: [GDS19-14] *Approach to Improving Attendance in Schools* (May 2024): This Cabinet paper was included as a GDS in the *2024 GDS Index* as it was published in the public arena by MOE in May 2024 and met all the other GDS criteria.

Other types of documents that are used by government to bring about change but do not meet the GDS criteria include:

- Government work programmes

A few departments set out a programme of action. These are typically excluded as they do not contain long-term thinking (criterion 4) or are less than two years in duration (criterion 6).

Example: *Carbon Neutral Government Programme*: Documents published under the *Carbon Neutral Government Programme* typically function as guidelines, not strategic documents that set out the means and the ends. Therefore, they do not meet criterion 4.
- Government priorities

These are excluded as they are not produced by a government department (criterion 1). A general discussion on government priorities can be found in the *Speech from the Throne* (every three years), the *Budget Policy Statement* (usually in November or December) and the *Budget Speech* (usually in May or June).
- Political manifestos

These do not meet criterion 1 as they are not produced by a government department.

If a document is deemed not to be a GDS, an explanation is provided to the respective government department via email.

## 2. How are strategy documents that are related treated?

Some government departments have GDS packages that comprise multiple interconnected documents, such as a broader strategy document and an implementation plan or an amendment or extension. If such documents meet the criteria below, they have been combined and considered as one strategy to avoid giving undue weight to the package or making unfair assumptions if departments separate their GDS across several documents. It also ensures greater comprehensiveness and transparency because supplementary strategies, which may otherwise be excluded for not meeting our GDS criteria, can be incorporated.

For GDS documents to be merged, the documents must:

- include at least one document that meets the GDS criteria
- clearly be related to the same strategy, i.e. they were released under the same project name and the supporting document references the main strategy document

- be held by the same government department/s
- be published within three years of each other (does not apply to amendments or extensions).

In the 2024 GDS Index, there were 10 GDSs that consisted of more than one document (see Table A5.1 in Appendix 5).

Examples:

[GDS11-03] and [GDS22-04] *Fale mo Aiga – Pacific Housing Strategy 2030: Fale mo Aiga – Pacific Housing Action Plan 2030* (November 2022) was merged with *Fale mo Aiga – Pacific Housing Strategy 2030* (November 2022) and the two documents were scored as one strategy due to their equivalent project name and publication date.

[GDS22-01] *Public Housing Plan 2021–2024 [Updated to 2025]: The Updated Public Housing Plan: Including 2024–2025 delivery* (September 2023) was merged with the *Public Housing Plan 2021–2024* (January 2021). This was because HUD described the former as an extension of the latter and the former did not meet criterion 6 as it only had a duration of one year. The title in the GDS Handbook has been updated to reflect the merge.

[GDS21-01] *He Korowai Oranga – Māori Health Strategy 2014* (June 2014) and [GDS21-11] *Whakamaaua – Māori Health Action Plan 2020–2025* (July 2020): These two strategies have not been merged and instead are treated as separate strategies. This is due to the six-year gap between the publication dates and [GDS21-11] *Whakamaaua – Māori Health Action Plan 2020–2025* being detailed enough to warrant standing on its own.

### 3. What happens when a merged document is archived?

If the main strategy document is archived, then all other documents it has been merged with are also treated as archived.

If an action/implementation plan or amendment is archived and replaced, then the old document is simply removed from the merged PDF and the new plan/amendment is added. The number of pages and duration of the merged GDS is updated accordingly. These documents are not included in the archived or new additions lists. Instead, a note is added to Appendix 5: Merged GDSs stating what has been added and what has been replaced.

### 4. How is a jointly held GDS treated?

In the 2024 GDS Index, 27 of the 195 GDSs in operation were jointly held by two or more government departments (see list in Appendix 6). The term ‘jointly held’ is defined in the glossary (see p.21). A jointly held strategy is treated as a separate GDS for each department that holds it (i.e. a GDS owned by four departments is treated as four GDSs). Although this means more weight is put on jointly held GDSs, it allows for more accurate GDS comparison across departments and sectors and illustrates each department’s ownership of the strategy and responsibility for its implementation.

If a jointly held document is no longer held by one of the departments, it is archived for that department.

Example: *Te Aorerekura – The Enduring Spirit of Affection: The national strategy to eliminate family violence and sexual violence*: In their OIA response, the Public Service Commission (PSC) informed us that they ceased being a member of TPA (the IEB that published this strategy) on 1 July 2023 and therefore no longer hold this strategy. The GDS is still active and included in 2024 GDS Index Handbook for the remaining seven departments: DOC, MOE, MOH, MOJ, TPK, MSD and OT.

### 5. What happens when a new department is established between GDS Index updates?

The Institute adds this department into the analysis. For example, two new departments were established in 2024: the Ministry for Regulation (MFR) and the Social Investment Agency (SIA). The Ministry of Disabled People (MDP) was also a new department in the 2024 GDS Index. Although established in 2022, it was not added to Schedule 2, Part 1 of the Public Service Act 2020 until December 2024. Four GDSs were transferred to MDP in 2024, three from MSD and one from MOH. All three of these departments were sent OIA requests, bringing the total number of government departments included in the 2024 GDS Index up to 34, from 31 in the 2023 GDS Index.

## 6. What happens if there is more than one GDS in a document?

If a government department publishes two GDSs in one document but indicates in their OIA response that these are two distinct GDSs, they are treated as two separate GDSs. These GDSs may have been combined in one document because they were part of the same work programme, or for another reason unknown to the Institute.

Example: [GDS19-08] *Tertiary Education Strategy* and [GDS19-07] *Statement of National Education and Learning Priorities*: In 2021, MOE indicated that the former was contained within latter. Therefore, the latter document has been treated as two GDSs.

## 7. How is this information ordered?

Spreadsheets and hard copy folders of departments are ordered alphabetically, consistent with the order of departments in Schedule 2, Part 1 of the Public Service Act 2020 (see Appendix 3). GDSs within each department are ordered by publication date, from oldest to most recent.

## 8. Which government departments are included?

Each time the GDS Index is updated, an updated version of Schedule 2, Part 1 of the Public Service Act 2020 is used. This is the record of which government departments exist.

## 9. How does the Institute check whether a GDS has been updated or replaced?

The Institute requests this information in its initial OIA request. A department will normally specify whether a GDS has been updated or whether a GDS has been archived and replaced with a new strategy. If a department indicates that a strategy has been replaced, this strategy is archived. Replacements often carry the same title but have a different duration.

Example: [GDS26-04] *Government Policy Statement on Land Transport 2024/25–2033/34* (June 2024): In the 2024 GDS Index, this GDS, held by MOT, replaced the previous GDS *Government Policy Statement on Land Transport 2021/22–2030/31* (September 2020), which is now archived.

Updates are not treated as a new GDS; only the publication date is changed. Updates typically have the same title and duration.

Example: [GDS05-03] *New Zealand's Countering Terrorism and Violent Extremism Strategy* (October 2022): DPMC first published this GDS in February 2020 and then updated it in June 2021 and October 2022. The publication date is given as October 2022.

Extensions and amendments, which are typically published as separate documents, are merged with the existing GDS they relate to (see question 2 for more information).

## 10. What happens if a GDS has been published by a department but is not yet fully operational?

If aspects of the strategy are already being actioned and taken into account in government decision-making, the GDS is included as active. If the strategy is still in draft form and is not yet publicly available it is rejected.

Examples: [GDS14-10] *New Zealand's Second Emissions Reduction Plan 2026–30*: This strategy does not become fully operational until 1 January 2026. However, it was published in the public arena in December 2024 and states 'work on ERP2 initiatives is already underway'.<sup>11</sup> Therefore, it has been included in the 2024 GDS Index.

ERO's *Pacific Strategy*: This strategy was included as a new GDS in ERO's response to our OIA request for the 2024 GDS Index. However, the strategy is still in draft pending final approval and is not yet publicly available. Therefore, it has been excluded from the 2024 GDS Index.

## 11. What if a GDS remains on a department's website as operational after the Institute has been advised it should be archived?

The Institute seeks to align the Index as closely as possible with the OIA responses received directly from government departments. Therefore, if a department has stated a strategy is archived but it is still available on the department's website, the strategy is archived in the GDS Index. However, the Institute recommends that archived strategies are taken offline in order to avoid misleading the public as to the work the department is pursuing.

**12. If a GDS is published as a web page (not in a PDF format) and is not dated, does it meet the Institute's GDSs definition?**

Yes. While ideally a GDS should be a position 'statement' or a 'report' at a fixed point of time, GDSs published as web pages are now included. This is due to the increase in GDSs being published as web pages on departments' websites. (This also allows for Cabinet papers that have been published on departments' websites to be included.)

**13. How does the Institute determine if a GDS is internally or externally facing?**

A strategy is considered internally facing if it is focused on the operations of the department that are specific to the department's staff or resources. An externally facing strategy is considered to be focused on subject matter outside of the department.

Examples:

[GDS07-01] *GCSB Strategy 2023-27* (NK): This strategy was treated as externally facing because, despite its actions being focused on the operations of the department, its outcomes are related to better serving New Zealand so it can navigate future challenges.

*Diversity and Inclusion Strategy 2021-2025* (July 2021): This strategy, jointly held by GCSB and NZSIS, was treated as internally facing as it is focused on creating a diverse and inclusive workforce. As a result, it was removed from the *2023 GDS Index*.

**14. How does the Institute deal with GDSs that are held by government department agencies not listed in Schedule 2 of the Public Finance Act 1989?**

If the department agency has a host department, GDSs held by them are treated as being held by the host department. Government agencies do not have a host department, therefore their strategies are rejected under criterion 1.

Examples:

The Ministry of Ethnic Communities is a 'departmental agency' under Schedule 2, Part 2 of the Public Service Act 2020, with the Department of Internal Affairs (DIA) being its host department. Therefore, the Ministry's GDSs are treated as held by DIA.<sup>12</sup>

Health New Zealand does not have a host department. Therefore, despite working closely with MOH, its strategies are not treated as GDSs.

## 2.4 Worksheets

The following worksheets describe how the GDS Index is created. Briefly, the Institute creates (with the help of government department officials) a list of all GDSs (as at the specified date). Of these, only the operational GDSs are scored against the Transparency Scorecard. These worksheets are written in such a way that the process can be repeated by future McGuinness Institute staff. This methodology only contains the worksheets that have been updated since *Working Paper 2024/08 Methodology for the 2023 Government Department Strategies Index as at 31 December 2023* (the *2023 Methodology*) (i.e. Worksheets 1 and 2). For the remaining worksheets, please refer to the *2023 Methodology*.

- Worksheet 1: Collecting the data
- Worksheet 2: Formatting the data for the Handbook
- Worksheet 3: How to create the Transparency Scorecard Excel  
See Worksheet 3 of the *2023 Methodology* (pp.41-53)
- Worksheet 5: How to search statements of intent and annual reports  
See Worksheet 5 of the *2023 Methodology* (p.56)
- Worksheet 6: How to create the legislation folder  
See Worksheet 6 of the *2023 Methodology* (pp.57-58)
- Worksheet 7: How to search within GDSs for mention of the term 'Act'  
See Worksheet 7 of the *2023 Methodology* (p.59)
- Worksheet 8: How to update the operational GDS table on the McGuinness Institute website  
See Worksheet 8 of the *2023 Methodology* (pp.60-61)

## 2.5 Assumptions and limitations

### The GDS analysis has three general limitations:

1. The Transparency Scorecard is designed to examine the content of the strategy document. Therefore, no judgement is made in regard to the quality of the problem definition (i.e. whether the strategy is appropriate given the current policy landscape); the cleverness of the strategic approach; or how the strategy is envisaged to be implemented.
2. The Transparency Scorecard does not review whether the strategy has been implemented and what outcomes actually resulted from its implementation. Although an important exercise, this question is beyond the scope of the analysis, as the resources required to carry this out would be beyond those of the Institute.
3. The Institute is highly reliant on the accuracy of the government departments' OIA responses.

### Specific limitations of the analysis include:

- The GDS Index relies on the OIA responses from each department being comprehensive, consistent and accurate. The Institute did not search for GDSs independently on department websites and so if departments have missed GDSs from their responses, these will not be included in the *2024 GDS Index*. Although the Institute has attempted to correct clear inconsistencies and gaps where possible (e.g. confirming jointly held GDSs were co-owned by each of the listed departments), we have not sought to further verify the responses beyond this.
- In some cases, departments may have missed a GDS that is operational and notify the Institute in order to have it retrospectively added to the Index.
- The Transparency Scorecard does not analyse the drafting history of the GDS and whether this included consultation and engagement with the public. It does not look at the extent to which the public collaborated in its vision or outcomes.
- A level of judgement was necessary when carrying out the analysis of GDSs against the Transparency Scorecard. Similarly, setting the elements themselves and the values attributed to each sub-element was a wholly subjective exercise based on the Institute's position on what makes a strategy 'good'. Therefore, others who undertake a similar analysis may reach different results due to using a different metric or differences in the values awarded to each sub-element.
- The reviewer's judgement as to the accessibility of GDSs to public servants and the public (featured in the three qualitative questions at the bottom of each scoring form) is subjective. The reviewers strove, however, to take a moderate, neutral and representative approach in their answers.
- Where departments did not have publicly available strategic documents (report on strategic intentions or annual report), the analysis under element 6 (Alignment and Authority) was limited, as the reviewers could not assess the integration of the GDS with the missing strategic document. In this case, the missing sub-element was given a score of 0. This occurred four times in the *2024 GDS Index*. The Ministry of Disabled People had no publicly available report on strategic intentions, therefore the four GDSs it holds were given a score of 0 for sub-element 6.2.
- Where departments have published a GDS after the annual report year end date, the Institute was unable to check that the GDS was mentioned in their annual report. Therefore, these GDSs were marked as 'NA' in sub-element 6.3 of the Transparency Scorecard. In the *2024 GDS Index*, this relates to these following GDSs:

**Table 2.4: GDSs Ineligible for Sub-Section 6.3 of the Transparency Scorecard**

2024 GDS Index Number	Government Department Strategy (GDS)	GDS Publication date	Annual Report Publication Date (as at 30 June 2024)
GDS02-23	Critical Ecosystem Pressures on Freshwater Environments (CRESP): 4-year research strategy	August 2024	October 24
GDS02-24	Te Ara Mōrehu: He rautaki whakaora kākāriki karaka   Kākāriki Karaka Recovery Strategy 2024–2034	September 2024	October 24
GDS05-05	2024 National Fuel Plan: Planning and response arrangements for fuel supply disruptions and emergencies supporting plan [SP 04/24]	August 2024	October 24
GDS16-13	Employment Action Plan	August 2024	October 24
GDS16-14	Major Events Strategy	August 2024	October 24
GDS16-15	2024 National Fuel Plan: Planning and response arrangements for fuel supply disruptions and emergencies supporting plan [SP 04/24]	August 2024	October 24
GDS16-16	Space and Advanced Aviation Strategy 2024–2030	September 2024	October 24
GDS21-27	New Zealand Pandemic Plan: A framework for action (Interim update – July 2024)	July 2024	October 24
GDS25-13	The Child and Youth Strategy 2024–2027	November 2024	October 24

- We have, as a policy, not gone back and removed older GDSs from any previous GDS Index on the grounds that they no longer meet the criteria today. This is important to note if comparing the number of operational GDSs across different years and GDS Indexes.
- The Institute is aware of GDS documents that are not signed but have been officially signed off by relevant parties such as Cabinet. For example, the *Migrant Settlement and Integration Strategy*, archived in the *2018 GDS Index* update, was not signed. However, the strategy itself (as opposed to the document) was signed off by Cabinet. To obtain this additional information for all GDSs is beyond the scope of this research.
- For merged documents, it is assumed that if the main strategy document is archived, all supplementary documents are also archived.

As our intention is to provide comprehensive analysis of GDSs published over the last 30 years, the Institute welcomes feedback on this working paper and the *2024 GDS Index*.

## 3.0 Scoring

Please see sections 3.1 to 3.3 (pp.22–29) of the *2023 Methodology* for a breakdown of how the Institute scores each GDS and the purpose of each element. See also Worksheet 3 (pp.41–51) of the *2023 Methodology* for the scoring criteria applied by reviewers.

In the *2024 GDS Index*, the scores from the *2023 GDS Index* were carried forward and only the additions were scored.

For the *2024 GDS Index*, only one reviewer was used. This resulted in some changes to the scoring process that was previously used, particularly: the scoring form was used only once; only physical copies of each GDS were used during the scoring process (with soft copies marked up later to evidence points); and the third party review of the scoresheet did not occur as there were no variations to average or reassess (i.e. scores did not need comparing or resolving).

**Table 3.1: GDS Index reviewers 2014–2024**

GDS Index	Reviewer 1 30 minutes	Reviewer 2 As long as needed
<i>2014 GDS Index (as at 30 June 2014)</i>	George	Madeleine
<i>2015 GDS Index (as at 30 June 2015)</i>	Madeleine	Karri
<i>2018 GDS Index (as at 31 December 2018)</i>	Madeleine	Wei Kai
<i>2021 GDS Index (as at 31 December 2021)</i>	Gemma*	Thomas*
<i>2023 GDS Index (as at 31 December 2023)</i>	Eilish/Paddy	–
<i>2024 GDS Index (as at 31 December 2024)</i>	Paddy	–

# Glossary

## **Adaptation (climate intelligence scoring)**

Responding to the effects of climate change (e.g. moving from impacted areas).

## **Archived GDS**

The department responsible for the GDS has advised it is no longer active. Occasionally, a department retrospectively advises the Institute of a strategy that should have been included in a previous GDS Index, but is no longer active. In this situation, the GDS is included in the current GDS Index as 'active', then moved immediately to 'archived GDSs'. For this reason, it is not scored, and does not appear in the *Handbook*.

## **Basic response (climate intelligence scoring)**

The GDS contains some discussion on climate change impacts and/or how it hopes to deliver better climate outcomes in terms of mitigation and/or adaptation but does not explain any detail (e.g. the GDS states it plans to do more research but does not explain what, when or how).

## **Both mitigation and adaptation (climate intelligence scoring)**

Simultaneously responding to the causes and effects of climate change (e.g. reducing emissions while also moving from impacted areas).

## **Budget goals and objectives**

The Government's overarching goals are generally set out in the *Budget Policy Statement*. However, there exist a wide range of terms used to describe the broader goals and objectives of Government.<sup>13</sup>

## **Capabilities**

Soft skills (including existing relationships and in-house expertise). See also resources.

## **Climate intelligence**

The GDS contains some form of climate intelligence (i.e. a basic or detailed response to climate change impacts)

## **Corporate document**

A corporate document is defined as a regular public sector entity report such as a report on strategic intentions or an annual report, as required under ss 38 and 43 of the Public Finance Act 1989 respectively. Corporate documents also include performance improvement framework reviews (PIFs) and briefings to the incoming Minister (BIMs).

## **Criteria (GDS selection)**

The criteria developed by the Institute to determine whether a document is a GDS.

## **Detailed response (climate intelligence scoring)**

The GDS contains a detailed discussion of climate change impacts and how it will deliver better climate outcomes in terms of mitigation and adaptation (e.g. the GDS contains several clear and measurable next steps, explaining what, when and/or how).

## **Duration (GDS key data)**

The length of time the strategy lasts, from beginning to end. If there is no start date given, the publication date is used. If there is no end date given, it is listed as NK. In some cases, a GDS may remain active after the stated end date has passed, in which case, the proposed completion date is stated as '(was initially YYYY)'.

## **Element (Transparency Scorecard)**

An element is a characteristic that is considered of primary importance in the publication of a GDS. In the GDS Index, six high-level elements make up the Transparency Scorecard.

## **Explicit mention of a GDS**

This is where either (i) the exact title of the GDS is stated, or (ii) the full title is not given or the subtitle is missing, but the supporting information and/or context makes it clear which GDS is being referred to.

## **Externally facing strategy (GDS selection)**

An externally facing strategy considers matters outside of the general operations of the department.

## **Good strategy**

Determining what makes a good strategy is a matter of judgement. One aim of the GDS Index is to invite departments to be more transparent, so that citizens can make their own assessments on the quality of strategy.

## **Government department**

The term 'government department' refers to the list of entities found in Schedule 2, Part 1 of the Public Service Act 2020. The GDS Index reflects the list in the Schedule in terms of the department's name and order.

Since the commencement of the Act in 2020, four changes have been made to Schedule 2, Part 1. On 1 July 2022, Te Kāhui Whakamana Rua Tekau mā Iwa – Pike River Recovery Agency was disestablished. In 2024, the Ministry for Regulation, the Social Investment Agency and the Ministry of Disabled People (established in 2022) were added to Schedule 2 of the Public Service Act 2020.

## **Government department strategy (GDS)**

A 'government department strategy' must:

1. be a publicly available document that is published by a government department
2. be a public-facing document that is written for the public to read
3. be an externally facing document (i.e. not written for internal management purposes)
4. be a strategic document that contains long-term thinking (i.e. it sets out the approach [the means] and the purpose [the ends] of the strategy)
5. be a national document (i.e. it excludes local and regional strategies)
6. be a document that looks out at least two years or more, and
7. not be a corporate document (see definition opposite).

## **Government targets**

Government targets are six-year aspirations set by the current Government and are expected to be delivered by 2030. The targets aim to achieve better results on public services and priorities that matter to New Zealanders.<sup>14</sup>

## **Implicit mention of a GDS (Transparency Scorecard)**

This is where the GDS is indirectly mentioned in the report on strategic intentions or annual report (i.e. not word for word). The test is if there is some doubt as to whether the strategy is being referred to (e.g. the department's energy strategy).

**Internally facing strategy (GDS selection)**

A strategy document that focuses solely on the internal management and/or operations of a department (e.g. it focuses on the department's staff diversity and inclusion policies or the sustainability practices related to how the department manages its resources).

**Jointly held GDS**

A GDS that is owned and managed by two or more departments. This includes where a department is not the lead agency but is responsible and accountable for some or all aspects of the strategy's implementation. The extent to which a GDS is shared jointly between departments indicates the extent to which departments collaborate to achieve a shared goal, rather than operate in silos.

**May issue (legislation)**

The GDS is a voluntary requirement in legislation. Terms often used are 'may issue', 'may allocate responsibility for', or 'may approve'. For example, 'may approve' relates to two fisheries GDSs, where the GDSs themselves say they were developed under the Fisheries Act, but the Fisheries Act says 'May ... approve ... a fisheries plan', implying that the GDS may have been developed under the Fisheries Act.

**Mention only (climate intelligence scoring)**

The GDS mentions climate change and may discuss its impacts, but it does not go into any detail on how it hopes to deliver better climate outcomes in terms of mitigation and adaptation.

**Merged (combined)**

Where two documents are significantly interrelated (e.g. a strategy document and an implementation plan/ action plan, or a strategy document and an amendment document), they are combined into one PDF and treated as a single GDS.

**Mitigation (climate intelligence scoring)**

Responding to the cause of climate change (e.g. reducing greenhouse gas emissions).

**Narrow scope (scope scoring)**

The nature of the subject matter discussed by the GDS relates to a group of individuals or species, or covers a specialised topic (e.g. hoiho penguin, syphilis).

**No mention (climate intelligence scoring)**

The GDS does not mention climate change at all.

**Points (Transparency Scorecard)**

Points are allocated to each sub-element. In the GDS Index there are 21 sub-elements. Seventeen of those are given four points each for a reviewer to score. Two sub-elements (6.2 and 6.3) are allocated six points each. The remaining two (sub-elements 1.3 and 3.3) are allocated eight points each. This additional weighting recognises the importance of these sub-elements. The highest possible total in the GDS Index is 96 points.

**Purpose statement (the ends)**

An aspirational future-focused statement that explains in a concise, unique, coherent and specific way what the strategy aims to achieve and provides an impetus for action (e.g. the purpose statement sets out what success looks like).

**Rank (Transparency Scorecard)**

The rank reflects where a specific GDS, department or sector sits when its Transparency Scorecard totals are compared to the average score of all GDSs, the average score of the department by which it is held, or the average score of its sector.

**Regulatory Management System (RMS)**

RMS is the set of policies, institutions, processes and tools used by central government to pursue and maintain good quality regulation. The responsibility for New Zealand's RMS was with The Treasury but has now moved to the newly established Ministry for Regulation. Some GDSs are specifically mentioned in legislation by name as being mandatory while others are less specific (see 'required' and 'may issue' in this glossary). Importantly, even when a GDS is not mentioned specifically by name in law, GDSs are one of the key tools of the RMS. This is because GDSs implement public policy set by Cabinet or in law. A good example is the Public Service Act which specifies that chief executives have responsibility for stewarding the legislation their agencies administer.<sup>15</sup>

**Rejected**

A document is rejected when the Institute and the department conclude it does not meet the criteria, in which case it is never added to the GDS Index. In the rare case of a disagreement, the final decision is the Institutes's.

**Required (legislation)**

The GDS is a mandatory requirement in legislation. Terms often used are 'must' or 'shall'.

**Resources**

Physical hardware (including physical and financial assets). See also capabilities.

**Reviewer (Transparency Scorecard)**

A person who is employed by the Institute to read and then score each GDS in operation against the Transparency Scorecard.

**Score (Transparency Scorecard)**

The number of points a GDS has accumulated as a result of the scoring process.

**Sector**

The grouping of departments is based on the summary tables of the Estimates of Appropriations in the Treasury's Budget (in the *2024 GDS Index*, it is the 2024 Budget).<sup>16</sup> The introduction to each volume of the Estimates of Appropriations 2024/25 explains how Votes and departments have been grouped into sectors. The 2024 Budget sector groupings are:

- Economic Development and Infrastructure
- Education and Workforce
- External
- Finance and Government Administration
- Health
- Justice
- Māori Affairs
- Natural Resources
- Social Services and Community.

**Strategy horizon**

The time frame the authors of the strategy contemplated when writing the strategy.

**Strategic options**

The range of options a government department might explore before deciding on the best approach. Exploring a range of strategic options often leads to a new and improved approach.

**Strategy map**

A visual illustration of the proposed strategy, usually on one page, showing the cause-and-effect relationships between the desired purpose and the choices made on how to achieve the strategy (e.g. types of goals/priorities/themes/actions capabilities/resources).

**Strategy statement (the means)**

The 'means' to an end. The unique approach a department has chosen to adopt to bring about change. It describes the choices made.

**Sub-element (Transparency Scorecard)**

In the GDS Index there are 21 sub-elements shared across six elements.

**Transparency Scorecard**

The lens through which each GDS has been assessed. The Transparency Scorecard is made up of six elements and 21 sub-elements.

**Wide scope (scope scoring)**

The nature of the subject matter discussed by the GDS relates to a broad range of demographics or species, and/or covers a generalised topic (e.g. seabirds, climate change).

Generally GDSs with a wide scope tend to be more strategic and high-level than narrow scope strategies. For example, a GDS focusing on the wellbeing of all New Zealanders (which would be considered to have a wide scope) may lead to development of a more specific strategy, such as a strategy focusing on the wellbeing of New Zealanders in aged care (which would be considered narrow in scope).

# Worksheet 1: Collecting the data

Note: The following explains how this process was undertaken for the 2024 GDS Index.

Outlined below is the process by which the raw data for a GDS Index update is collected. As in any research process, the process for gathering and refining the data is amended and refined as issues and questions are raised and answered, and so a degree of back and forth between process stages is to be expected. Specific issues and questions are outlined in Section 2.2 of this document.

## Inputs

Previous GDS Index Master spreadsheet (to be saved as new Master spreadsheets 1 and 2 [MS1 and MS2])

Letter for each department detailing our OIA request

Spreadsheet for each department

Sector tables from the latest Budget rounds

Schedule 2, Part 1 of the Public Service Act 2020 as it lists the official names of government departments

## Process

Email out OIA request of possible status of GDSs held by the department

Create schedule of OIA acknowledgements and responses (hard and soft copies)

Update MS1 with information from OIA responses

Review all new GDSs and clarify with departments any GDSs where the status is still in question

Update MS2 with final status of all GDSs

Create folders of all GDSs in operation (hard and soft copies)

## Outputs

New GDS Index MS1 and MS2

This data is used to create the 2024 GDS Index Handbook – *He Puna Rautaki* and update the two tables on the McGuinness Institute's website (the table of operational GDSs and the table of archived GDSs).

## Stage 1 – Preparing OIA requests – attachments

1. Make up an individual spreadsheet for each department, each consisting of two sheets. Sheet 1 is titled 'Review of 2023 GDS'. Sheet 2 is titled 'Potential new GDSs'.
2. To prepare sheet 1, copy over all rows of GDSs for that department that were active in the previous GDS Index from the previous Master spreadsheet.
3. Adjust the title for column F to say:
 

Q1: Choose one of three options:

  - (i) 'still active'
  - (ii) 'archived' (i.e. no longer in operation), or
  - (iii) 'no longer owned and operated by this government department'. If this is the case, please say who it has been transferred to (e.g. your comment might be 'transferred from MOH to Health NZ in March 2024')

Yellow highlight column F to indicate where the department should put their response.
4. To prepare sheet 2, make up the following four columns, all highlighted in yellow:
  - a Title of Strategy
  - b Link to PDF of strategy
  - c Q2: Choose one of two options:

- (i) 'replaces an existing GDS'. If this is the case, please name the GDS it replaces in column D (you can copy from the list in Sheet 1), or
  - (ii) 'is a completely new strategy document'
  - d Any specific comments from the Department?
5. Write up a letter outlining the information we are requesting and any other information departments should be aware of. The *2024 GDS Index* letter can be used as a template.

## Stage 2 – Preparing OIA requests – emails

1. Compile a list of OIA emails for each government department.
2. Write up a generic email that summarises our request and the content of the attachments.
3. Attach the relevant letter and spreadsheet to the email for each department.

## Stage 3 – Preparing the Master spreadsheets

The Institute now uses two Master spreadsheets to track the status of GDSs. They both have the same format but reflect slightly different things.

The first spreadsheet, MS1, is titled 'Spreadsheet of all GDSs listed by government departments in initial OIA responses'. It consists of the collated content of Sheets 1 and 2 from all government departments in their initial response to our OIA request.

The second spreadsheet, MS2, is titled 'Spreadsheet of GDSs found in the 2024 GDS Index'. It reflects the final status of all GDSs listed by government departments after follow-up questions have been clarified in OIA correspondence and the Institute has reviewed proposed new GDSs against the GDS criteria. This spreadsheet is used to update the Handbook and the appendices in the Methodology.

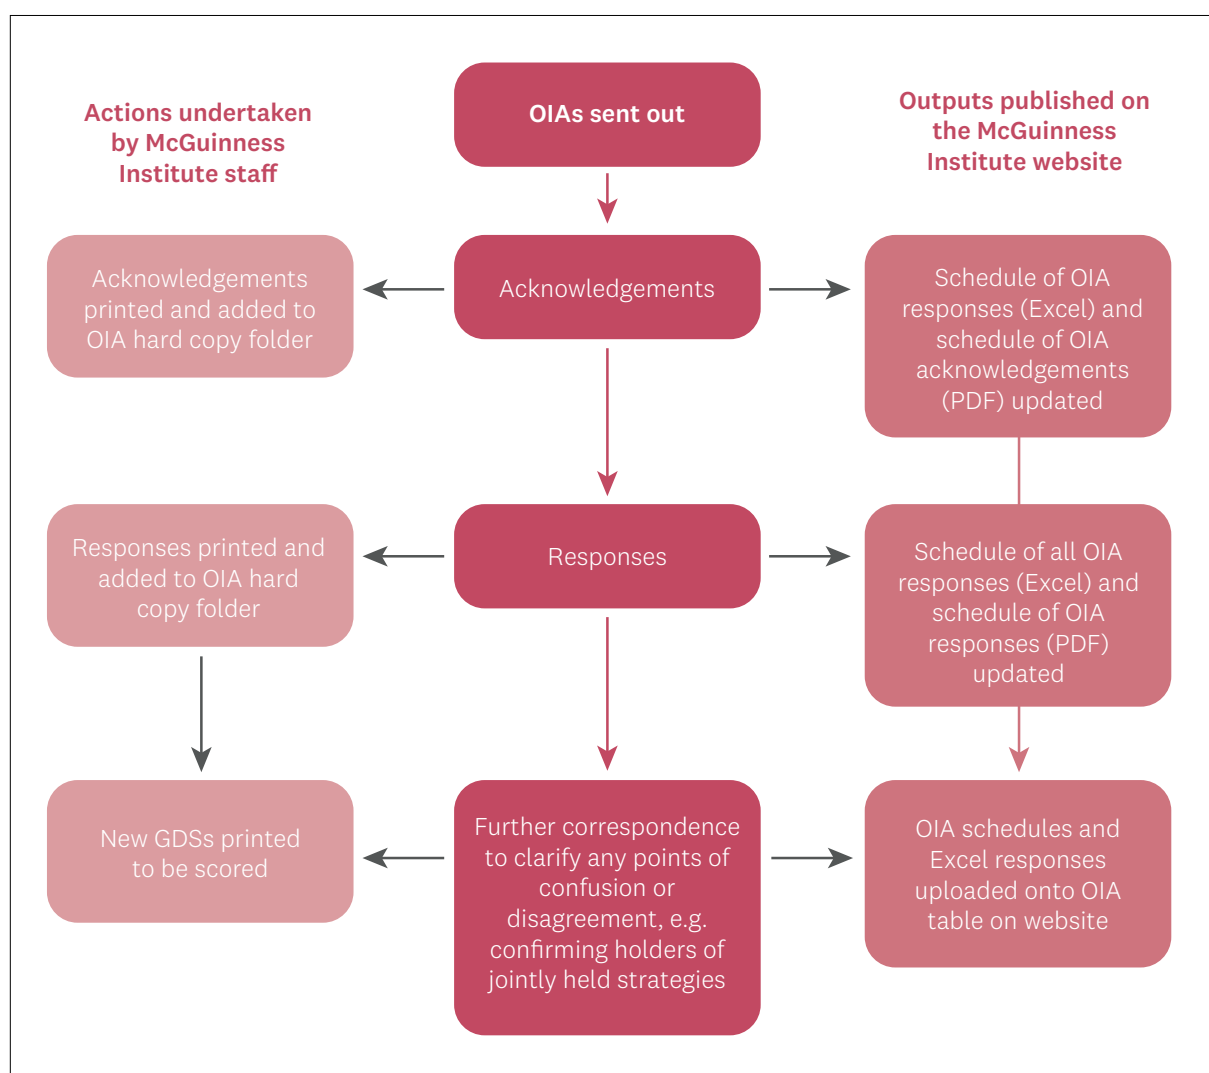

Both MS1 and MS2 should have a sheet for each government department.

Each sheet should have a column for:

1. Government department currently holding the GDS
2. Index number
3. Title of strategy on GDS Index (each title should be linked to the PDF of the strategy document)
4. Publication date
5. Duration
6. Current status (i.e. 'still active', 'archived' or 'transferred')
7. Number of pages
8. Signed by
9. This GDS replaces
10. Jointly held with
11. Transferred from
12. Strategy map
13. Legislation
14. Merged?
15. Climate intelligence
16. Action points?
17. Further actions (to determine whether further correspondence is needed)

## Stage 4 – Processing OIA responses

Figure W1.1: Actions and outputs of the Institute at each stage of the OIA process

Gather the collected information by:

- printing out all correspondence with each government department,
- printing out all Excel spreadsheets that each government department has prepared,
- printing out all new GDS documents or webpages provided by government departments, and
- filing these documents with a folder for each department and GDSs filed in date order (with the most recently published at the front).

Once government departments have answered the OIA requests and MS1 has been completed, review all new GDSs to determine whether they align with the Institute's GDS criteria. See verification process below, and section 2.2 of this working paper for the criteria.

If further clarification for a GDS is required, note this in column 17 and send another OIA email to the respective department. This can often be a back-and-forth process.

Once this process is complete, MS2 and the additions and deletions lists can be finalised.

## Stage 5 – OIA email of thanks

Email each department to thank them for their OIA responses and send them the final list of GDSs for their respective department.

## Stage 6 – Upload GDSs and OIA correspondence onto the McGuinness Institute website

1. Upload/update the final list of operational GDSs since 1994 and the list of archived GDSs on to the McGuinness Institute website.
2. Upload all OIA correspondence onto the OIA table with the name of the person(s) emailing redacted.

### Verification process

During the process of receiving OIA responses from government departments, each strategy needs to be reviewed against the McGuinness Institute GDS criteria. If a strategy does not meet all of the criteria it is not considered a GDS. In the *2024 GDS Index*, this led to 10 strategies being rejected as they did not meet the criteria (see Appendix 4 for the list of rejected GDSs).

All rejected strategies are kept track of and put into a ‘GDS rejects folder’.

## Worksheet 2: Formatting the data for the Handbook

The following explains how this process was undertaken so that it can be replicated by future McGuinness Institute staff.

Note: Where the Institute is quoting material from a GDS such as the purpose or strategic approach, the page number used is the page number that is provided on the document itself, not the PDF page number. The exception is when we have merged multiple PDFs. In these cases, the PDF page number of the merged PDF is used, alongside the total number of pages of the merged PDF. For example, if the merged PDF is 102 pages, and the quoted page referred to is page 67, it is written as (p. 67 [out of 102]).

**Table W2.1: Master spreadsheet columns defined**

Information sought	Objective	Explanation
Title of strategy on GDS Index	To establish a unique and easily identifiable name for each GDS while avoiding repetition.	<p>As a general rule, titles are taken directly from the strategy itself. The following steps explain how to cite the title:</p> <p>Step 1: Look in the inside cover and if there is text that states how the report is to be cited, use this as the title of the strategy. If the title is not cited here, go to Step 2.</p> <p>Step 2: Look on the front cover for the full title of the document. If it includes a series title, ignore this. If the title is unclear, review how the document has been referred to in the header or footer. If the title is still unclear, review how the document has been described on the department web page where it is published, or even in a press release.</p> <p>In terms of capitalisation, give main titles in title case and subtitles in sentence case, regardless of how they appear on the document itself, or any recommendations on how to cite the document.</p> <p><b>Variations</b></p> <ul style="list-style-type: none"> <li>Do not include years and year ranges in the title, unless these are needed to distinguish one strategy from a previous publication with the same or a very similar name. Years are also added if they are clearly part of a document's title.</li> <li>If a GDS has two subtitles and both are needed to determine what the GDS relates to, the second subtitle is put in square brackets. For example, <i>Taking Flight: An aviation system for the automated age [drone integration paper] (2019)</i>.</li> </ul> <p>If necessary, use square brackets to add text that provides clarity about the document. For example, [GDS22-01] <i>Public Housing Plan 2021-2024 [Updated to 2025] (January 2021)</i>. Also, use square brackets to change the emphasis of a title when a generic identifier for the type of document is stated first. For example, [GDS20-01] <i>International Cooperation for Effective Sustainable Development (ICESD) [Policy statement] (2019)</i>, rather than <i>Policy Statement: International cooperation for effective sustainable development (ICESD)</i>.</p> <p>Text in square brackets should be roman if it has been added by the Institute and italics if it was part of the original title.</p> <ul style="list-style-type: none"> <li>In most cases, remove 'Aotearoa' and 'New Zealand' from the start of titles. The exceptions are when it is part of the name of an entity (e.g. New Zealand Geographic Board), or when it provides context or identification to a title (e.g. the New Zealand subantarctic islands rather than subantarctic islands in general).</li> <li>The names of government departments are also removed from the start of titles. The exceptions are when departments have similarly titled strategies, or the department name is directly incorporated into the title (rather than generically placed at the start of the title) and it is clear that the strategy is specific to the department's approach. For example, [GDS04-05] <i>DIA's Approach to Regulation of Anti-Money Laundering and Countering Financing of Terrorism (2022)</i> and [GDS16-11] <i>MBIE's Regulatory Systems Stewardship Strategy 2023-2028 (2023)</i>.</li> <li>In some cases, additional punctuation needs to be added to titles, for example, to separate a title and subtitle, or an English and te reo Māori translation. The Institute decides which punctuation is appropriate based on the following key:</li> </ul>

Information sought	Objective	Explanation
		<p><b>Key:</b></p> <ul style="list-style-type: none"> <li>: Colon used to separate main titles and subtitles. For example, [GDS08–02] <i>Multinational Enterprises: Compliance focus 2024</i> (2024).</li> <li>  Pipe used to separate Māori to English translations and vice versa. Importantly, it must be a comprehensive translation (i.e. a direct translation or as closely translated as possible). For example, [GDS12–06] <i>Science Strategy   Rautaki Putaiao</i> (2015).</li> <li>[] Square brackets used for second subtitles or changing the emphasis of a title. For example, <i>Taking Flight: An aviation system for the automated age [drone integration paper]</i> (2019).</li> <li>- En dash used before sub-clauses of the main title or subtitle. The sub-clauses must not be part of a Māori to English translation. For example, [GDS04–03] <i>Office of Ethnic Communities – Strategic Framework</i> (2020).</li> <li>• For merged GDSs, the title of the main strategy document is used. For example, [GDS04–06] <i>Te Rautaki Matihiko mō Aotearoa   The Digital Strategy for Aotearoa</i> (September 2022): This GDS consists of a strategy document, <i>Te Rautaki Matihiko mō Aotearoa   The Digital Strategy for Aotearoa</i> (2022), and an action plan, <i>Action Plan for the Digital Strategy for Aotearoa</i> (2022). The merged title is equivalent to the strategy document title.</li> </ul> <p>Note: An exception to this rule is where the main strategy document title contains a date that no longer reflects the duration of the merged GDS. In these cases, additional text can be added in square brackets to provide clarity and accuracy. For example, [GDS22–01] <i>Public Housing Plan 2021–2024 [Updated to 2025]</i> (January 2021): This GDS consists of the main strategy document, <i>Public Housing Plan 2021–2024</i> (2021) and an extension, <i>Updated Public Housing Plan: Including 2024–2025 delivery</i> (2024). For clarity, '[Updated to 2025]' has been added to the merged title to account for the extension.</p>
Publication date	To establish the year and month each GDS was published.	<ul style="list-style-type: none"> <li>• The publication date (year and month) is taken from the OIA response or GDS itself (typically from the front or inside cover). If the GDS document does not indicate its publication date, its department's website is checked for any indication of when the GDS was published. If a date cannot be found the website is checked for press releases, web pages or other documents to determine proof of publication. If the date still cannot be located, this information is sought through OIA requests and follow-up communications. If the month or year is not confirmed then it is recorded as not known (NK), e.g. NK, 2023.</li> <li>• For merged GDSs with multiple publication dates, the date of the main strategy document is used. Typically, this is also the earliest date. For example, [GDS11–01] <i>Pacific Languages Strategy 2022–2032</i> consists of two documents: (i) <i>Pacific Language Strategy</i>, published in August 2022 and (ii) <i>Pacific Languages Government Action Plan</i>, published in June 2023. The publication date is given as August 2022.</li> </ul>
Duration	To first establish the length of time that the GDS is intended to be in operation for (year range), and secondly to help understand how the GDSs fit into a tendency towards political short-termism or long-termism.	<ul style="list-style-type: none"> <li>• This information is presented as year–year.</li> <li>• The duration, in the first instance, is taken from the OIA response, then checked in the GDS document. If no duration is stated on the cover page, the document is searched for mentions of the year it was published (e.g. '2023') or the term 'duration'.</li> <li>• If a date range is indicated within the duration (e.g. 2017/18–2020/21), the earliest and latest years are taken (e.g. 2017–2021). This also applies to merged documents. For example, [GDS21–16] <i>Strategy to Prevent and Minimise Gambling Harm 2022/23 to 2024/25</i> (June 2022): The earliest year is 2022 and the latest year is 2025 so the duration is given as 2022–2025. For example, [GDS22–01] <i>Public Housing Plan 2021–2024 [Updated to 2025]</i> (January 2021): The duration for this merged GDS is given as 2021–2025. The duration of the two documents are 2021–2024 and 2024–2025 respectively. Therefore, by taking the earliest and latest years of the documents, the duration is 2021–2025.</li> </ul>

Information sought	Objective	Explanation
		<ul style="list-style-type: none"> <li>If there is no year range stated in the OIA response or in the GDS, the year of publication is taken as the start date and the end date is recorded as NK, e.g. 2020–NK.</li> <li>Often strategies remain active after the end date stated in the document. In these cases, the initial duration is still given as it is an important element in the framing, development and intentions of the strategy. For example, [GDS21–02] <i>Cancer Plan: Better, faster cancer care 2015–2018</i> (2014): The end date was seven years ago, but MOH stated the strategy was still active in their 2025 OIA response. For this reason, the duration is listed as ‘2015–NK (was initially 2018)’.</li> <li>Sometimes the duration dates and the publication date of a document do not align. For example, [GDS14–10] <i>New Zealand’s Second Emissions Reduction Plan 2026–30</i>: This GDS was published in December 2024 but it does not become fully operational until 2026. Therefore, the duration is given as 2026–2030.</li> </ul>
Current status (i.e. active, archived or transferred)	To establish that the GDS is operational for the year end to which the GDS Index relates.	This information is found in the OIA responses.
Number of pages	To determine the length of GDS documents. This also helps to establish the range of lengths of GDSs.	<p>This information reflects the number of PDF pages.</p> <p>Note: Where GDS documents have been merged, the combined total of page numbers is used and a note stating that this is the merged total is included. For example, [GDS26–02] <i>Transport Evidence Base Strategy</i> consists of two documents that have a combined total of 72 pages. Therefore, the number of pages is written as: 72 (merged).</p>
Signed by	To establish the level at which the GDS is publicly signed without identifying the specific signatory.	<ul style="list-style-type: none"> <li>This information is found in the GDS document, usually through a signed foreword or similar, and is not sought anywhere else. The title, name and office of the signatory (e.g. Hon Name of Minister, portfolio; name, position in organisation) is recorded as written in the GDS document. This means that the Minister’s full title is the name used when the document was signed. For example, [GDS21–05] <i>Health Research Strategy</i> (June 2017): The Minister who signed this GDS was the Minister of Science and Innovation (i.e. the current title, the Minister for Research, Science and Innovation, is not used).</li> <li>Signatories are categorised into the following: ‘Crown’, ‘Chief Executive’ (‘CE’), ‘Department staff (other than CE)’, ‘Not signed’, ‘Other’, or combinations of these. Director-General, Secretary to ..., Solicitor-General (CLO), Chief Review Officer (ERO), Director (SFO), Comptroller (NZCS), Government Statistician (Stats NZ) and Commissioner (SSC) or any other role that is highest within a department are considered in this context to be at the same level as CE, so are recorded as CE.</li> <li>Surveyor-General (LINZ) and Convenor (MOT) are not considered in this context to be at the same level as CE, and so are recorded as ‘Department staff (other than CE)’.</li> <li>The role title and the category are both mentioned in the <i>2024 GDS Index Handbook – He Puna Rautaki</i>. For example, ‘Signed by: Crown (Minister for the Prevention of Family Violence and Sexual Violence)’.</li> <li>If a GDS has a name stated but does not have a signature, it still counts as being signed.</li> </ul>

Information sought	Objective	Explanation
This GDS replaces	To record the history of strategies over time.	<ul style="list-style-type: none"> <li>This information is found in the OIA responses.</li> <li>If the replaced GDS was held by a different department, this department is noted after the title and year of publication. For example, [GDS18–01] <i>Disability Strategy 2016–2026</i>: In 2024, this GDS was transferred to MDP, having been previously jointly held by MOH and MSD. This GDS replaced the <i>Disability Strategy 2001</i> which was held by MOH. Therefore, the information is written as follows: ‘This GDS replaces: <i>Disability Strategy 2001</i> (2001), originally held by MOH’</li> <li>Where departments have noted documents that have been replaced by new GDSs in their OIA correspondence, but they have not been considered a GDS by the Institute in previous indices, they have not been included in this section. For example: <i>National Fuel Plan</i> (March 2020): In DPMC’s OIA response for the <i>2023 GDS Index</i>, they noted that this GDS replaced the <i>Oil Emergency Response Strategy</i> (2008) and <i>National CDEM Fuel Plan</i>. The former is noted as it was in the <i>2021 GDS Index</i>. The latter is not listed as it was never considered a GDS. Therefore, the information is written as follows: ‘This GDS replaces: <i>Oil Emergency Response Strategy</i> (2008)’</li> </ul>
Jointly held with	To record which GDSs are held by more than one government department.	<ul style="list-style-type: none"> <li>This information is found in the OIA responses. If one department states that a strategy is jointly held with other departments, these other departments are sent an OIA to confirm this. GDSs are only considered jointly held if all departments have confirmed they hold the strategy. For example, [GDS12–05] <i>Wilding Conifer Management Strategy 2015–2030</i> (December 2014): In the <i>2023 GDS Index</i>, this strategy was treated as jointly held between DOC and MPI. However, in DOC’s OIA response for the <i>2024 GDS Index</i>, they stated that this strategy was solely held by MPI. This was confirmed with MPI in a follow-up OIA. Therefore, in the <i>2024 GDS Index</i>, the strategy was treated as solely held by MPI.</li> <li>GDSs held by more than one department are included as a GDS for each department. For example, [GDS02–03] and [GDS14–03] <i>Mātauranga Whakauka Taiao   Environmental Education for Sustainability</i> (July 2017): This strategy is jointly held by DOC and MFE. Therefore, it is included in the <i>2024 GDS Index Handbook</i> under both departments and has two GDS numbers.</li> </ul>
Transferred from	To establish where the GDS is transferred to if it is no longer owned by the government department that originally published it.	This information is found in the OIA responses.
Strategy map	To establish which GDSs are using a visual framework to map out the strategy for users.	<ul style="list-style-type: none"> <li>This information is found by looking through the GDS documents, using the links provided by government departments in their OIA responses.</li> <li>See Glossary for the definition of a strategy map (p.23).</li> <li>See <i>Working Paper 2022/06 – Strategy Maps: Copies of All Strategy Maps Found in Government Department Strategies in Operation as at 31 December 2021</i> for more information and examples.</li> </ul>
Purpose	To establish, in a statement, what the intention of the GDS is at its core (essentially, what issue is it addressing?).	The purpose statement is a quote taken from the GDS that summarises the strategy’s overarching goal or vision.

Information sought	Objective	Explanation
Strategy (to achieve the purpose)	To establish, in a paragraph, what the approach of the GDS is to achieve its goal.	The strategy statement is a paragraph generated by McGuinness Institute staff to articulate the strategic approach (i.e. the 'how').
Government sector	To establish which sector each GDS comes under.	<ul style="list-style-type: none"> <li>This information is found in the Treasury's 2024 Budget in <i>The Estimates of Appropriations for the Government of New Zealand for the Year Ending 30 June 2025</i> under 'Votes in Each Sector'.</li> <li>Two government departments straddle two sectors: MBIE and MOJ. The Institute took a view on what GDS related to what sector based on the respective topic. This was previously advised to the relevant departments in an email of 22 February 2022, during research for the <i>2021 GDS Index</i>, seeking their feedback. In the 2024 Budget, these two departments still straddled the same two sectors.</li> </ul>

# **Appendix 1: GDS Index publications, 2014–2024**

# Appendix 1: GDS Index publications, 2014–2024

Table A1.1 below lists the publications produced by the Institute under each edition of the GDS Index. We initially planned to update the GDS Index annually. However, due to the resources required to produce the GDS Index, a decision was made in 2015 to update the GDS Index only when resources were available.

**Table A1.1: GDS Index publications, 2014–2024**

Title	Publication date
<b>2014 GDS Index (GDSs as at 30 June 2014)</b>	
2014/01 – List of Government Department Strategies Between 1 July 1994 and 30 June 2014	September 2014

## **Appendix 2:**

# **Changes to criteria over time**

## Appendix 2: Changes to criteria over time

This appendix contains GDS criteria since 2015. These have evolved as a result of feedback from officials.

### GDS criteria (2024)

The definition below was used to produce the *2024 GDS Index*.

For the purposes of the *2024 GDS Index*, ‘government department strategy’ (GDS) is defined in terms of the following criteria.

A ‘government department strategy’ must:

1. be a publicly available document that is published by a government department
2. be a public-facing document that is written for the public to read
3. be an externally facing document (i.e. not written for internal management purposes)
4. be a strategic document that contains long-term thinking (i.e. it sets out the approach [the means] and the purpose [the ends] of the strategy)
5. be a national document (i.e. it excludes local and regional strategies)
6. be a document that looks out at least two years or more, and
7. not be a corporate document.\*

\* Corporate documents are defined as regular public sector entity reports and include reports on strategic intentions or annual reports, as required under ss 38 and 43 of the Public Finance Act 1989 respectively. They also include performance improvement framework reviews (PIFs) and briefings to the incoming Minister (BIMs). However, if a corporate document contains strategy, for example a long-term insights briefing (LTIB), it may be included as a GDS.

### GDS criteria (2023)

The definition below was used to produce the *2023 GDS Index*.

For the purposes of the *2023 GDS Index*, ‘government department strategy’ (GDS) is defined in terms of the following criteria.

A ‘government department strategy’ must:

1. be a publicly available document that is published by a government department
2. be a public-facing document that is written for the public to read
3. be an externally facing document (i.e. not written for internal management purposes)
4. be a strategic document that contains long-term thinking (i.e. it sets out the approach (the means) and the purpose (the ends) of the strategy)
5. be a national document (i.e. it excludes local and regional strategies)
6. be a document that looks out at least two years or more, and
7. not be a corporate document (i.e. not a statement of intent, a four-year plan or an annual report).

### GDS criteria (2021)

The definition below was used to produce the *2021 GDS Index*.

For the purposes of the *2021 GDS Index*, ‘government department strategy’ (GDS) is defined in terms of the following criteria.

A ‘government department strategy’ must:

1. be a publicly available document accessible on a government department website
2. be public-facing, therefore excluding a strategy only made public as the result of an OIA request

3. be strategic, containing long-term thinking and setting out both the means (how) and the ends (the purpose)
4. be produced by a government department, therefore excluding situations where a strategy is written or published by another party (e.g. a Cabinet paper)
5. be national rather than local in focus, therefore excluding regional strategies
6. guide the department's thinking and operations over two years or more, and not be a statement of intent or annual report.

### **GDS criteria (2015)**

The definition below was used to produce the *2015 GDS Index*.

For the purposes of the *2015 GDS Index*, 'government department strategy' (GDS) is defined in terms of the following criteria.

A 'government department strategy' must:

7. be a publicly available statement or report;
8. be generated by government departments with a national rather than a local focus;
9. contain long-term thinking, in such a way that the strategy links to a long-term vision or aim, and ideally provide clarity over the factors that may impinge on the attainment of that vision or aim; and
10. guide the department's thinking and operations over the long term (i.e. contain a work programme to achieve change over two years or more).

## **Appendix 3:**

### **List of government departments [34]**

## Appendix 3: List of government departments [34]

Within the GDS Index, each department is assigned a number according to the order the departments appear in the legislation below. Importantly, the Ministry for Regulation, the Ministry of Disabled People and the Social Investment Agency were added to Schedule 2 of the Public Service Act 2020 in 2024. These departments were included in the *2024 GDS Index*, bringing the total number of government departments up to 34, from 31 in the *2023 GDS Index*.

**Table A3.1: List of government departments [34]**

Department number	Department name
01	Crown Law Office
02	Department of Conservation
03	Department of Corrections
04	Department of Internal Affairs
05	Department of the Prime Minister and Cabinet
06	Education Review Office

Schedule 2 Part 1 Te Kāhui Whakamana Rua Tekau mā Iwa—Pike River Recovery Agency: repealed, on 1 July 2022, by clause 4 of the Public Service (Te Kāhui Whakamana Rua Tekau mā Iwa—Pike River Recovery Agency Disestablishment) Order 2022 (SL 2022/147).

## Part 2

### Departmental agencies and host departments

**Note:** A tick in the third or fourth column alongside the name of a departmental agency means that the working arrangement referred to above the tick applies to the departmental agency.

Departmental agency	Host department	Chief executive may operate outside strategic and policy framework of host department (see section 24(2)(a))	Chief executive may manage assets and liabilities (see section 24(2)(b))
Aroturuki Tamariki—Independent Children's Monitor	Education Review Office	✓	
Cancer Control Agency	Ministry of Health		
Charter School Agency	Ministry of Education		✓
Ministry for Ethnic Communities	Department of Internal Affairs		
National Emergency Management Agency	Department of the Prime Minister and Cabinet		
Office for Māori Crown Relations—Te Arawhiti	Ministry of Justice		

Schedule 2 Part 2 Aroturuki Tamariki—Independent Children's Monitor: inserted, on 1 May 2023, by clause 4 of the Public Service (Aroturuki Tamariki—Independent Children's Monitor) Order 2023 (SL 2023/32).

Schedule 2 Part 2 Charter School Agency: inserted, on 1 July 2024, by clause 4 of the Public Service (Charter School Agency) Order 2024 (SL 2024/71).

## Relevant excerpts from the Public Service Act 2020

Section 12 of the Public Service Act 2020 sets out five public service principles, of which the fifth principle is stewardship:

- (e) to proactively promote stewardship of the public service, including of—
  - (i) its long-term capability and its people; and
  - (ii) its institutional knowledge and information; and
  - (iii) its systems and processes; and
  - (iv) its assets; and
  - (v) the legislation administered by agencies.

Section 52 sets out the general responsibilities of chief executives of departments and departmental agencies, and states:

- (1) A chief executive of a department or departmental agency is responsible to the appropriate Minister for—
  - (a) **improving ways of working across public service agencies;** and
  - (b) their agency's responsiveness on matters relating to the collective interests of government; and
  - (c) the operation of their agency, including in carrying out the purpose of the public service under section 11; and
  - (d) supporting that **Minister to act as a good steward of the public interest**, including by—
    - (i) **maintaining public institutions, assets, and liabilities;** and
    - (ii) maintaining the currency of any legislation administered by their agency; and
    - (iii) **providing advice on the long-term implications of policies;** and
  - (e) the performance of the functions and duties and the exercise of the powers of the chief executive or of their agency (whether those functions, duties, or powers are imposed or conferred by an enactment or by the policies of the Government); and
  - (f) giving advice to Ministers; and
  - (g) the integrity and conduct of the employees for whom the chief executive is responsible; and
  - (h) the efficient and economical delivery of the goods or services provided by the agency and how effectively those goods or services contribute to the intended outcomes.

## **Appendix 4:**

### **Rejected documents [10]**

## Appendix 4: Rejected documents [10]

A document is rejected when a department proposes a strategy document as a potential GDS, but together the Institute and the department conclude it does not meet the criteria. In the rare case there is a disagreement, the final decision is the Institute's. See rejected documents below in Table A4.1.

**Table A4.1: Potential new GDSs rejected from the 2024 GDS Index**

Row	Department (number & name)/ organisation	Title of strategy	Reason for rejection*
01	02. Department of Conservation	<i>Conservation Management of the Critically Endangered Matuku-Hūrepo/ Australasian Bittern: A review of threats and preliminary management techniques</i>	This document does not meet criterion 4 as it is a guidance document rather than a strategic document. It is a resource for conservation managers to make up management plans.
02	04. Department of Internal Affairs	<i>AML/CFT Programme Guideline</i>	This document does not meet criterion 4 as it is a guidance document rather than a strategic document. It does not set out an strategic approach but an overview of the requirements of an AML/CFT programme to assist users in establishing them.
03	06. Education Review Office	<i>Pacific Strategy</i>	This document does not meet criterion 1 as it is still in draft and has not yet been published by ERO.
04	08. Inland Revenue Department	<i>Offshore Tax Transparency</i>	This document does not meet criterion 4 as it is a guidance document rather than a strategic document. It is a resource to educate New Zealanders on the international tax landscape. There is no clear purpose and related approach specific to the document itself.
05	16. Ministry of Business, Innovation and Employment	<i>New Zealand Migrant Settlement and Integration Strategy</i>	This document does not meet criterion 4 as it does not set out an approach, only outcomes.
06	16. Ministry of Business, Innovation and Employment	<i>A Minerals Strategy for New Zealand to 2040</i>	This document was published in January 2025, after the 2024 GDS Index cut-off date of 31 December 2024.
07	20. Ministry of Foreign Affairs and Trade	<i>Strategic Intentions 2024-2028</i>	This document does not meet criterion 7 as it is a corporate document required under the Public Finance Act 1989.
08	25. Ministry of Social Development	<i>Employment Investment Framework for 2024/25</i>	This document does not meet criterion 6 as it only has a duration of one year.
09	29. Oranga Tamariki – Ministry for Children	<i>Our Strategy</i>	This document does not meet criterion 7 as it is published within a corporate document.
10	Health New Zealand	<i>Mental Health and Addiction Workforce Plan 2024 – 2027</i>	This document does not meet criterion 1 as it is published by Health New Zealand, which is not a government department.

## Appendix 5: Merged GDSs [13]

## Appendix 5: Merged GDSs [13]

In some cases, a government department will publish several strategy documents that work in conjunction with one another to achieve the same outcome(s). In such cases, it is important to consider whether these documents should be merged to form one GDS, to ensure a fairer representation of strategies that are significantly inter-related.

The Institute first decided to merge some strategy documents in the *2023 GDS Index*. 73 GDSs were reviewed for potentially merging, with 12 merged GDSs listed in the final *2023 GDS Index Handbook*. See Appendix 6 of *2023 Methodology* (pp.82–92) for the method used to merge GDSs for the first time.

In the *2024 GDS Index*, the criteria below were used in decisions about whether to merge GDSs.

For GDS documents to be merged, the documents must:

- include at least one document that meets the GDS criteria
- clearly be related to the same strategy, i.e. they were released under the same project name and the supporting document references the main strategy document
- be held by the same government department/s
- be published within three years of each other (does not apply to amendments or extensions)

Table A5.1 lists all documents in the *2024 GDS Index* that are merged and highlights the three new merges made since the *2023 GDS Index*.

**Table A5.1: Strategy documents that were merged**

Row	Department (number & name)	Overarching GDS	Merged with (GDS added to overarching GDS)	Reason for merging	Final 2024 GDS Index number
GDSs held by one department only (not jointly held)					
01	02. Department of Conservation	<i>Te Mana o te Taiao – Aotearoa New Zealand Biodiversity Strategy 2020</i> (August 2020)	<i>Te Mana o te Taiao: Aotearoa New Zealand Biodiversity Strategy Implementation Plan</i> (April 2022) [Addition to the 2024 GDS Index]	The implementation plan follows the same strategic framework and has the same outcomes as the strategy document.	GDS02–15
02	04. Department of Internal Affairs	<i>Te Rautaki Matihiko mō Aotearoa   The Digital Strategy for Aotearoa</i> (September 2022)	<i>Action Plan for the Digital Strategy for Aotearoa</i> (September 2022) [Addition to the 2023 GDS Index]	The action plan was published alongside the strategy and contains actions that directly relate to the three goals identified in the strategy.	GDS04–06
03	11. Ministry for Pacific Peoples	<i>Pacific Languages Strategy 2022–2032</i> (August 2022)	<i>Pacific Languages Government Action Plan (December 2024)</i> <sup>i</sup> [Addition to the 2023 GDS Index]	The action plan outlines how the strategy will be implemented in order to advance the key objectives and vision of the strategy.	GDS11–01
04	14. Ministry for the Environment	<i>Aotearoa New Zealand's First Emissions Reduction Plan</i> (May 2022)	<i>New Zealand's First Emissions Reduction Plan: Amendment 2024</i> (December 2024) [Addition to the 2024 GDS Index]	The amendment is supplementary to the main strategy document and highlights the adjustments made by the new government.	GDS14–05

Row	Department (number & name)	Overarching GDS	Merged with (GDS added to overarching GDS)	Reason for merging	Final 2024 GDS Index number
05	17. Ministry of Defence	<i>Defence Policy and Strategy Statement 2023</i> (August 2023)	<i>Future Force Design Principles</i> (August 2023) [Addition to the 2023 GDS Index]	<i>Future Force Design Principles</i> acts as a key bridging document between the information outlined in the <i>Defence Policy and Strategy Statement 2023</i> and the investment planning that is to be included in an upcoming <i>Defence Capability Plan</i> (not the one currently included in the 2023 GDS Index).  Note: The Ministry of Defence website as at 19 November 2024 notes that work is underway on options to inform a new <i>Defence Capability Plan</i> as the next phase of the Defence Policy Review.	GDS17-02
06	22. Ministry of Housing and Urban Development	<i>Public Housing Plan 2021-2024</i> [Updated to 2025] <sup>ii</sup> (January 2021)	<i>Updated Public Housing Plan: Including 2024-2025 delivery</i> (September 2023) [Addition to the 2024 GDS Index]	The <i>Updated Public House Plan</i> is described as an extension of the <i>Public Housing Plan 2021-2024</i> .	GDS22-01
07	25. Ministry of Social Development	<i>Better Later Life / He Oranga Kaumātua 2019-2034</i> (November 2019)	<i>Better Later Life Action Plan / He Oranga Kaumātua: Action plan 2021-2024</i> (September 2021) [From 2021 GDS Index]	The action plan outlines the actions that will be taken to support the strategy from 2021 to 2024 and is underpinned by the guiding principles of the strategy. As well as developing 25 new actions, the 10 initial actions identified in the strategy are carried forward.	GDS25-04
08	25. Ministry of Social Development	<i>Youth Plan Voice, Leadership, Action: Strategic framework</i> (August 2023)	<i>Youth Plan Voice, Leadership, Action: Rolling suite of actions</i> (August 2023)  <i>Youth Plan Voice, Leadership, Action: Youth plan measurement framework</i> (August 2023) [Addition to the 2023 GDS Index]	The action plan and the measurement framework were published alongside the strategy. The action plan sets out actions that directly relate to the two identified focus areas that underpin the vision of the strategy. The measurement framework provides monitoring and assessment of how the action plan contributes to the key outcomes of the strategy.	GDS25-12
09	26. Ministry of Transport	<i>Transport Evidence Base Strategy</i> (December 2019)	<i>Te Rautaki Whai-Taunakitanga Waka a Aotearoa – Transport Evidence Base Strategy Implementation Plan</i> (October 2022) [Addition to the 2023 GDS Index]	The action plan outlines a work programme to implement the high-priority initiatives that are identified in the strategy and sets out the actions that need to be taken to achieve the strategy's vision.	GDS26-02

Row	Department (number & name)	Overarching GDS	Merged with (GDS added to overarching GDS)	Reason for merging	Final 2024 GDS Index number
10	29. Oranga Tamariki – Ministry for Children	<i>Oranga Tamariki Action Plan 2022</i> (July 2022)	<i>Implementing the Oranga Tamariki Action Plan</i> (July 2022) [Addition to the 2023 GDS Index]	The implementation plan was published alongside the strategy and contains actions that directly relate to the six outcomes identified in the strategy.	GDS29-02
Jointly held [3]					
11	03. Department of Corrections, 19. Ministry of Education, 21. Ministry of Health, 23. Ministry of Justice, 24. Ministry of Māori Development – Te Puni Kōkiri, 25. Ministry of Social Development, 29. Oranga Tamariki – Ministry for Children and 30. Public Service Commission	<i>Te Aorerekura: The national strategy to eliminate family violence and sexual violence</i> (December 2021)	<i>Action Plan for the National Strategy to Eliminate Family Violence and Sexual Violence</i> (December 2021) [Addition to the 2023 GDS Index]	The action plan was published alongside the strategy and contains actions that directly relate to the six focus areas identified in the strategy.	GDS03-03, GDS19-09, GDS21-15, GDS23-01, GDS24-02, GDS25-09 and GDS29-01
12	11. Ministry for Pacific Peoples and 22. Ministry of Housing and Urban Development	<i>Fale mo Aiga – Pacific Housing Strategy 2030</i> (November 2022)	<i>Fale mo Aiga – Pacific Housing Action Plan 2030</i> (November 2022) [Addition to the 2023 GDS Index]	The action plan was published alongside the strategy and contains short-, medium- to long-term and long-term actions and targets that directly relate to the four priority areas identified in the strategy.	GDS11-03 and GDS22-04
13	22. Ministry of Housing and Urban Development and 24. Ministry of Māori Development – Te Puni Kōkiri	<i>MAIHI Ka Ora: The national Māori housing strategy</i> [strategy] (December 2021)	<i>MAIHI Ka Ora: The national Māori housing strategy</i> [implementation plan] (March 2022) [Addition to the 2023 GDS Index]	The action plan was published alongside the strategy and contains actions that directly relate to the six priority areas identified in the strategy.	GDS22-03 and GDS24-03

**Notes to Table A5.1.**

- i This document was updated in December 2024, hence this is given as the publication date. It was first published in June 2023.
- ii The title of the overarching strategy document is *Public Housing Plan 2021–2024*. ‘[Updated to 2025]’ has been added to the final GDS title to account for the extended duration of the merged document.

## **Appendix 6: Jointly held GDSs [27]**

## Appendix 6: Jointly held GDSs [27]

Table A6.1 lists GDSs that are jointly held by two or more departments. Jointly held GDSs are listed under each department that holds them, so a GDS that is jointly held by four departments will appear in the GDS Index four times as four separate GDSs. This is to illustrate each department's ownership of the strategy and responsibility for its implementation.

The decision to treat a GDS as jointly held is made through OIA correspondence with the relevant departments. A department will typically inform the Institute that another department has a role to play in a certain part of a GDS, or the GDS as a whole. The Institute will then confirm this with the department that was mentioned before recognising the strategy as jointly held.

In certain cases, a department may disagree and state that they do not hold the strategy. In this case, the Institute will accept a commitment from the department concerned that it is no longer responsible or accountable for the strategy. Obtaining clarity over which department holds each GDS has been difficult and very time-consuming.

**Table A6.1: Jointly held GDSs [27]**

Row	Publication date	GDS title	Department (number & name)	GDS number	Sector

# **Appendix 8: GDSs archived between October 1994 and 31 December 2024 [470]**

## Appendix 8: GDSs archived between October 1994 and 31 December 2024 [470]

Table A8.1 below lists all archived GDSs.

During the OIA process, departments inform the Institute whether any GDSs have been archived since the previous GDS Index. GDSs will typically be archived due to being replaced by a new GDS, or having simply run their course (no longer in operation).

Occasionally a department fails to inform the Institute of an operational GDS until after the GDS has expired. In these situations the GDS is treated as both accepted and archived in the same GDS Index. This situation is recorded in the column titled 'Reason archived' as 'Accepted and archived'. This did not apply to any of the GDSs archived in the 2024 GDS Index.

**Table A8.1: GDSs archived between October 1994 and 31 December 2024 [470]**

**Notes to Table A8.1:**

\* GDSs archived by department as no longer in operation

\*\* GDSs archived by department as no longer held by that department, but still active and held by another department/s

\*\*\* GDSs archived by the Institute as no longer meets the GDS criteria

## Appendix 9: GDSs in operation in the *2024 GDS Index*, by department [195]

## Appendix 9: GDSs in operation in the 2024 GDS Index, by department [195]

Table A9.1 lists all the operational GDSs in the 2024 GDS Index. The list of GDSs in operation ranked by the Transparency Scorecard can be found in the 2024 GDS Index Handbook.

Note the 166 GDSs that were carried forward from the 2023 GDS Index are shown with an asterisk (\*).

This table includes the 29 additions in the 2024 calendar year, see ‘GDS Index when GDS was added’ column. Note the 29 additions are highlighted by row and have a hash symbol (#).

The 35 GDSs that have passed their proposed end date are marked with a tilde (~).

- The ‘Sector’ column refers to the groupings used in *The Estimates of Appropriations for the Government of New Zealand for the Year Ending 30 June 2025*.<sup>17</sup>
- The ‘GDS Index when GDS was added’ column states when a GDS was first added to a GDS Index. Both of these columns are analysed further in the 2024 GDS Index Handbook.
- The ‘Method used to score GDS’ column refers to which year’s methodology was used to score each strategy against the Transparency Scorecard.

**Table A9.1: GDSs in operation in the 2024 GDS Index, by department [195]**

Row	Department (number & name)	GDS number	GDS title	Publication date	Duration	Sector	GDS Index when GDS was added	Method used to score GDS

- 7 An NDC outlines how a country plans to contribute to meeting the targets set under the Paris Agreement through emissions reduction and climate actions. All signatories of the Paris Agreement are required to submit NDCs every five years, with each NDC representing a progression beyond the country's current NDC and reflecting the country's highest possible ambition. New Zealand's first NDC set a target of reducing net emissions by 50 per cent below the gross 2005 level by 2030. Its second NDC aims to reduce emissions by 51 to 55 per cent compared to 2005 levels by 2035.

- 13 The goals and objectives of government are confusing. In addition to ‘government targets’, there are a range of other terms used to indicate the direction of public policy. Key terms in the Public Finance Act 1989 alone include:
  1. long-term objectives
  2. short-term intentions
  3. strategic objectives
  4. strategic intentions
  5. wellbeing objectives.Other terms used in the 2024 Budget include:
  6. overarching goals (in 2024, there are three)
  7. (Government) priorities (in 2024, there are five). Treasury (2024). *Budget Policy Statement 2024*. [online], pp.1–2. Available at: <https://www.treasury.govt.nz/publications/budget-policy-statement/budget-policy-statement-2024#budget-policy-statement> [Accessed 5 Jan. 2025].
- 14 The DPMC website states: ‘Government Targets will focus attention, resources and accountability on improving service outcomes. The Targets are intentionally ambitious to ensure New Zealanders get better results and the public services they deserve in health, education, law and order, work, housing and environment. Ministers and agency chief executives are accountable for delivery, and the Government expects the public service to dig deeply into root causes, to be innovative, and to be disciplined in directing resources to where they will have the greatest impact on outcomes.’  
Department of the Prime Minister and Cabinet (DPMC) (2025). *Government Targets*. [online]. Available at: <https://www.dPMC.govt.nz/our-programmes/government-targets> [Accessed 20 Dec. 2024].
