ND = Not differentiable from its parent lineage with ESR's CoVarSeq assay

<sup>1</sup> first detection in wastewater = sampling week end date, Report date = date the associated case was reported in Episurv, Date received = date the sample was received at ESR, Date collected = date the associated sample was collected as recorded in Éclair

<sup>2</sup> The first genome detected for a given lineage may be of a sublineage. Two lineages indicate there was more than one case at the dates indicated with more than one lineage/sublineage
